RE: In-stream stockwater right Place of Use and Point of Diversion Location Maps

Dear Mr. Lowry,

As the result of our meeting on October 8, 2020, I have prepared and enclosed several maps showing the place of use and points of diversion for your various in-stream stockwater rights.

At the end of our October 8, meeting, instead of abandoning the portions of your water rights that are located on Tim Lequerica's property, you wanted to look into the possibility of filing a transfer to move any place of use or point of diversion decreed on Mr. Lequerica's property to a different location. We discussed that the minimum transfer filing fee is \$200, so I said I would look at your rights as a whole and make some maps showing the various places of use so you could try to group multiple rights that need corrected into a single transfer.

I am including 7 maps:

- Reference Map Overview - North
- Reference Map Overview – South
- North – Group 1 Map
- South – Group 1S Map
- South – Group 2S Map
- South – Group 3S Map
- South – Group 4S Map

The maps represent groups of water rights within a drainage. I think you could submit 1 transfer per drainage listing all the water rights that need to be modified on a transfer.

As we discussed, you have several options:

- 1) Abandon the portions of the water rights that fall on Mr. Lequerica's property.
- 2) File transfers to modify your water rights so they no longer list points of diversion or places of use on Mr. Lequerica's property.
- 3) Do a combination of 1 and 2
- 4) Quit claim deed all or portions of the water rights to Mr. Lequerica.
- 5) Take no action.

In several cases, filing a transfer makes the most sense because it will allow for “cleaning up the water right” if there are missing points of diversion or place of use descriptions. In other cases, it might make more sense to follow one of the other options.

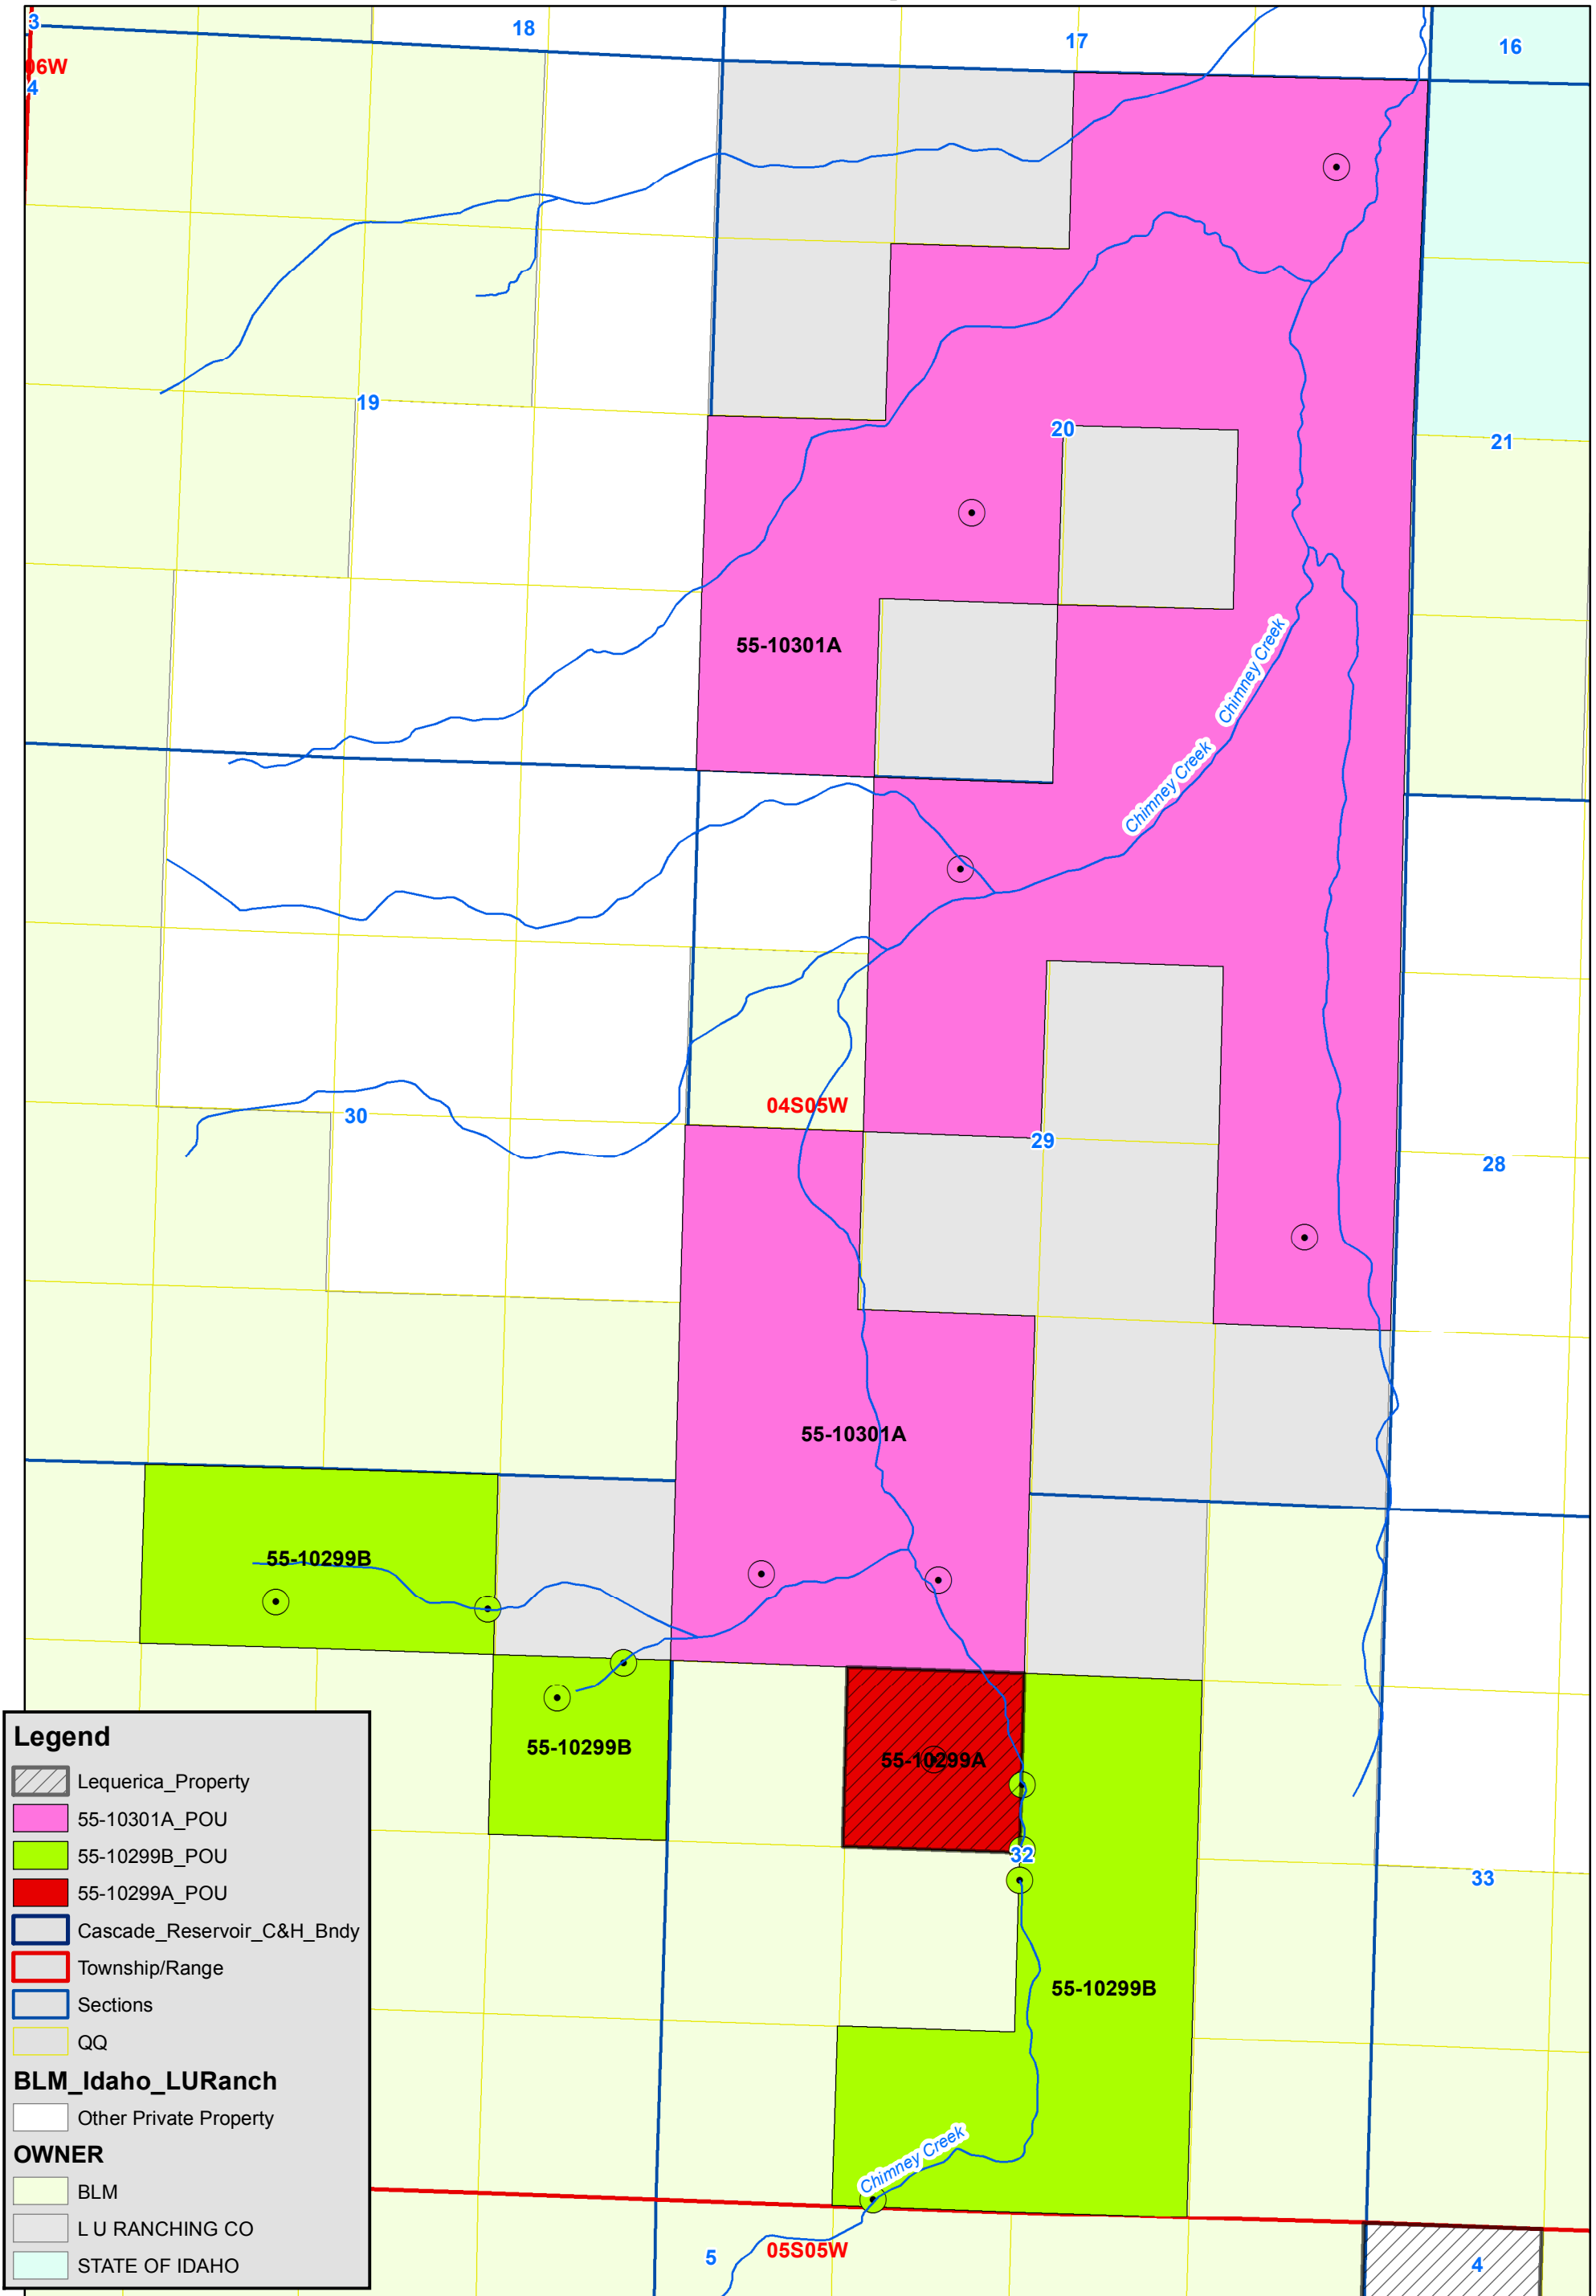

After reviewing the information please feel free to contact me to discuss any of the options.

Respectfully,

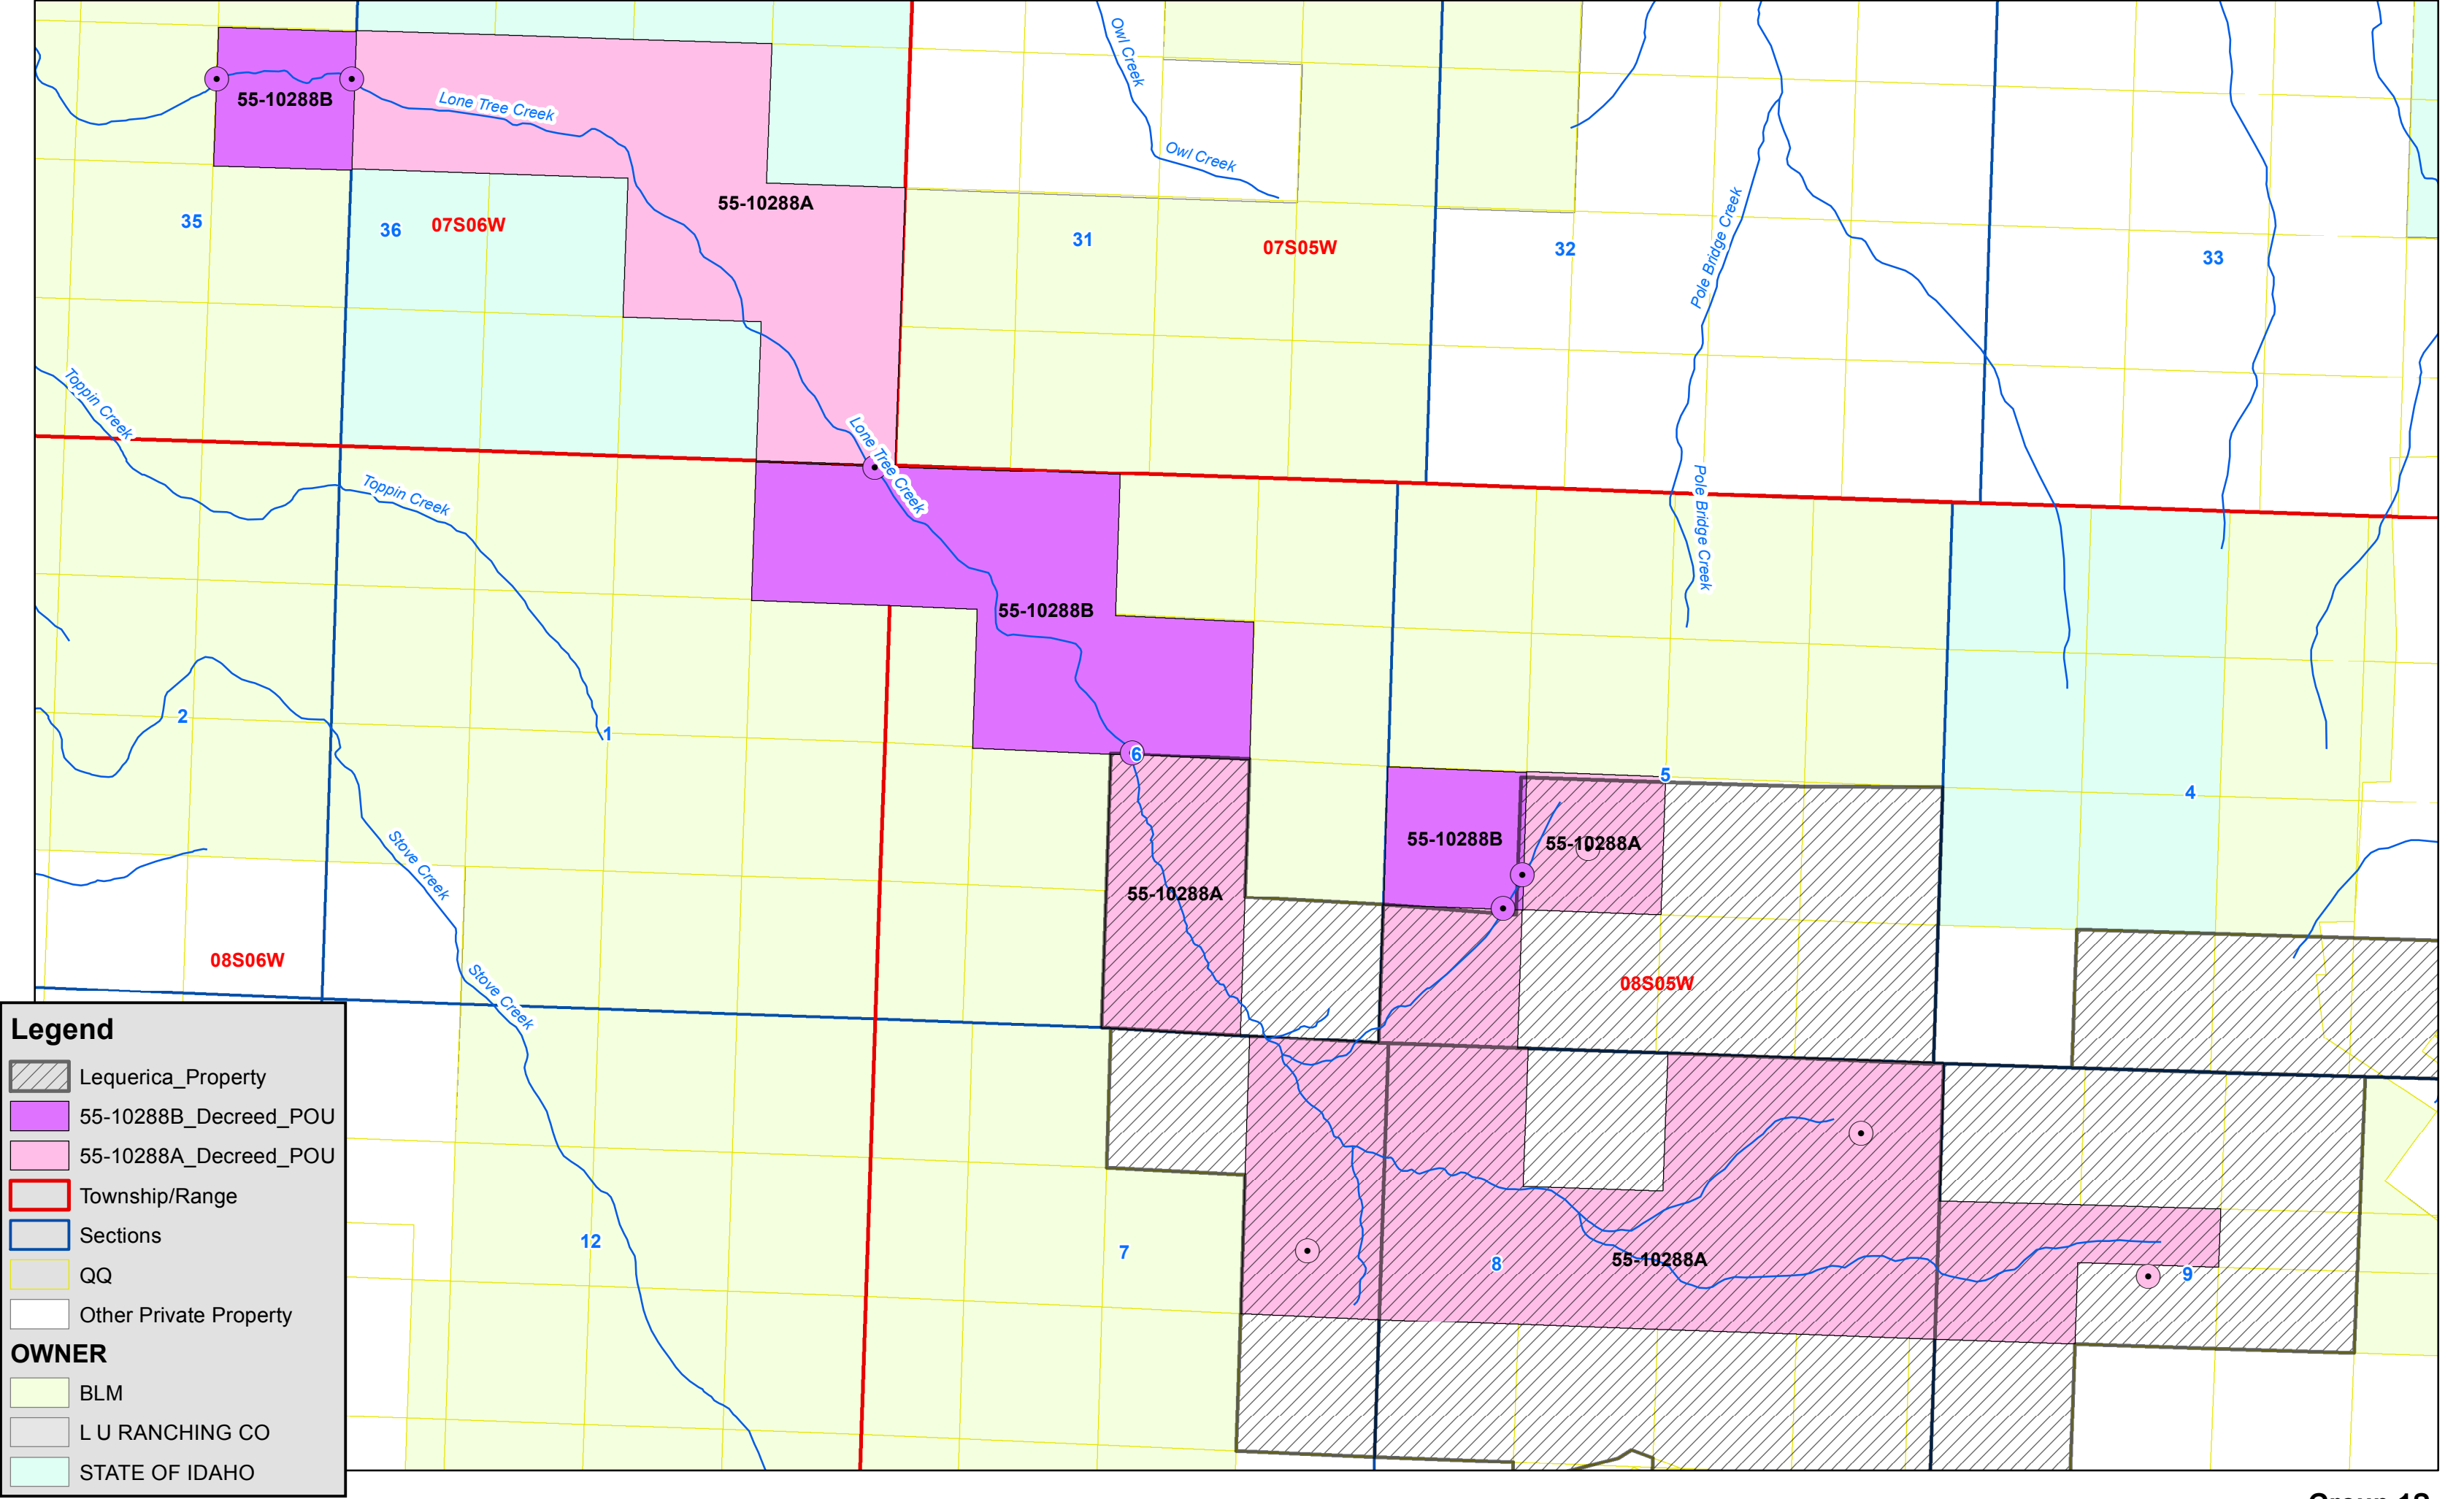

Craig L. Saxton
