Subject: RE: 67-7376 Cambridge Ditch Co

Monica,

I have updated the pou & the shape on the Draft License to reflect the removal of the acres on BLM land per your e-mail. The license is still an unfinished product, but the e-mail & changes have been added to the folder.

Pam

Hi Pam,

I have been handling this objection, but it looks like the draft of the license needs to be changed (see below). Can you help me with that? Thanks!

Monica

Monica,

No I can't change the draft license. It has been submitted to the State Office for licensing, and I no longer have the file. I suggest that you go and speak with Pam Skaggs about this issue. I think that she has the authority to make those changes in the licensing process. She also has access to the file.

Subject: 67-7376 Cambridge Ditch Co

Hi Dan,

This license shows up as draft active. We made a recommendation based on the draft and have received an objection from the BLM because some of the POA overlaps BLM

8/30/2007

ground. I spoke with Jerry Jaeger, head of the ditch company, this morning and they are on board with removing the acreage overlapping BLM ground. I am deleting it from the recommendation, but I wanted to see if you can change the draft of the license so the license won't supersede the corrected recommendation. Overlapping ground is: 0.6 acres in 15N2W32 NESE and 2.4 acres in 15N2W (same ENE). Thanks!

Monica

**NOTICE OF ERROR
REPLY**

Please type or print clearly, fill out this form completely and mail.

Return this reply form to IDWR by the deadline date printed below if you want IDWR to change your recommendation or you want to let IDWR know that you agree with its recommendation.

YOUR DEADLINE FOR RETURNING A NOTICE OF ERROR REPLY IS: 12-08-2006

Water right number: 67-7376

CAMBRIDGE DITCH CO
C/O JERRY JAEGER SEC
2953 SALUBRIA RD
CAMBRIDGE ID 83610
Telephone Number: (208)257-3713

1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

2. Describe the changes you wish to make in the proposed recommendation:

3. Give a brief explanation as to why you disagree with these portions:

 I AGREE with this proposed recommendation: no changes need to be made.

DATE: 11-29-06 SIGNATURE: *Jerry Jaeger*

Please print your name: Jerry Jaeger

EXPLANATORY MATERIAL: BASIS OF CLAIM - Permit

Saxton, Craig

Subject: Cambridge Ditch Company Permit Meeting
Start: Thu 7/21/2005 2:00 PM
End: Thu 7/21/2005 3:00 PM
Recurrence: (none)
Meeting Status: Accepted
Required Attendees: Nelson, Dan; Keen, Shelley; Saxton, Craig

Hello Shelley and Craig,

I have heard back from each of you, and it seems like Thursday afternoon would be best. I am planning on single meeting with both of you, this way we can do what we need to and go from there. Craig, I would like to meet with you after we are done with Cambridge Ditch Company to go over the Yantis permit. This is pretty basic as far as the water allocation side goes, so Shelley doesn't need to stay for that part.

I will come over to the State Office for the meeting. If it is alright with you Craig, I would like to meet in your office. That way we talk about the other permit afterward. I don't think we need a conference room. It will only be the three of us.

Thank you for having this meeting. It will really help out.

Dan Nelson
Western.

G. NARRATIVE/REMARKS/COMMENTS

The water for this permit is diverted from the Weiser River in the SESESW S16 T15N R2W. The water is then run through a large ditch that travels approximately 2.2 miles in a southwesterly direction to the first diversion. This diversion is discussed in the field report for 67-2219. The water then travels another $\frac{3}{4}$ of a mile to the next diversion point. This diversion point is also discussed in water right 67-2219. Water from right 67-2219 and a portion of the ditch company water are diverted out of these first two points of diversion.

Immediately after this second diversion, the water runs over the ditch company's flume. After the flume the water is run through approximately 6 miles of ditch through various farms. The individual water users then take their proportionate share of the water through their headgates along the ditch.

Several issues have arisen with this permit that need to be addressed. The first issue is that the point of diversion was moved from the NWNW S21 T15N R2W to the SESESW S16 T15N without amending the permit. However, a licensing amendment can be used to correct the legal description of the point of diversion. I have informed the ditch company representatives of this issue.

There is an issue with this permit concerning the company's measurement devices. The point of diversion for this permit is approximately 3 miles from the measurement point on the ditch. The reasoning behind this is that the ditch travels through a fairly narrow canyon and access to the point of diversion is very limited. In order to get to the point of diversion the ditch rider must take a road around the other side of the hill. The entire trip takes at least 20 to 30 minutes.

COPY

In order to remedy the long drive time, the ditch company built a discharge point approximately ½ mile up from the flume. This discharge point is used to control the water going over the flume. Any excess water is then diverted back into the river. This works well for the ditch company, because the only point of diversion between their point of diversion and this discharge point is a backup diversion for water diverted through their ditch, so it wouldn't be used unless the ditch was inoperable. This discharge point is also used to discharge any runoff water that enters the ditch from the hillside. The runoff water comes directly from the hillside, since the ditch doesn't intercept any streams or creeks. This runoff water has washed the ditch out in past years, and this discharge point gives the water a way out before it can wash out the ditch.

My main concern with the location of the measurement device is that there is actually more water being diverted from the river than is actually being sent through the ditch. Some of this water is lost to ditch loss and the rest is sent through the discharge point. The actual amount of water being diverted from the headgate is greater than the amount of water running over the flume. This permit doesn't ask for ditch loss, but there is definitely some ditch loss accrued through a ditch of this length. This practice could be an acceptable solution to the ditch loss scenario.

I am also concerned about the two points of diversion from the ditch above the canal company's flume. The watermaster has approved the practice of shutting off these diversions and measuring them over the flume, but this isn't a very accurate way of measurement. The flume should be located above the first diversion or each of these diversions should have a measurement device installed on them.

OVERLAPPING WATER RIGHTS:

The Cambridge Ditch was originally developed by group of farmers to more efficiently deliver their personal water rights, and this permit was filed to cover those lands not already covered by an existing right. Therefore, there are approximately 29 water rights that use the same point of diversion as is listed in this report. These existing rights currently allow approximately 27.42 cfs to irrigate 959.7 acres of the 1827.9 acres recommended in this report. The Snake River Basin Adjudication (SRBA) is currently reviewing these rights, but it appears as though some of these rights could be altered or reduced. Please refer to the Flow calculation sheet, which discusses the diversion rates in depth.

Whereas the ditch company delivers all these rights, they have requested that all these rights be changed into their name through the adjudication process. Dave Tuthill decided that to try and do this type of conversion would delay the adjudication process, so it would be better to do this conversion after the adjudication process is complete with a transfer. The transfer process would be able to take all of these rights and condition each right in a way that would prevent any problematic overlaps.

COPY

RECOMMENDATIONS

This permit limits the rate of diversion to 5/8-inch per acre or 0.0125 cfs. I am recommending that all of the 1827.9 acres be licensed at the 5/8 inch per acre, with a condition limiting the use of this right with all other rights to the diversion of 5/8 of an inch at the field headgate of each water user. This would allow a total rate of diversion of 22.85 cfs. This will ensure that the all of the acres within the borders of the ditch company will receive at least 5/8 of an inch of water. The ditch company will have the responsibility of establishing a record keeping procedure to ensure that lands irrigated by this permit do not exceed the 5/8-inch limitation.

With the overlapping water rights and the lack of measurement devices on the system, it will be difficult to monitor and keep reasonable records of this system. The ditch company should be able to provide adequate records on request of the department and/or the watermaster. Therefore, I recommend that this permit be licensed with conditions similar to the following:

- 1.) Diversion through the Cambridge Ditch is limited to 47.8 cfs unless they can show that a measurement device has been installed to properly measure the excess water flow. To increase the current capacity of the ditch the Cambridge Ditch Company will need provide an accounting of the water rights diverted through the ditch requiring the increase in ditch capacity.
- 2.) This right is limited to a maximum rate per acre of 5/8 of an inch or 0.0125 cfs at the field headgate of each property owner using the Cambridge Ditch Company's delivery system.
- 3.) The Cambridge Ditch Company shall provide upon request records showing the rate and volume of water delivered to each water user on any given irrigation season.
- 4.) This right may not be diverted to lands where existing water rights already provide a rate per acre at the field headgate in excess of 5/8 of an inch or 0.125 cfs.
- 5.) All water diverted under this right must flow through a measuring device approved by the department and the watermaster prior to being diverted for irrigation.
- 6.) A measurement device approved by the department and the watermaster must be installed within 50 ft of the ditch headgate.

Have conditions of permit approval been met? X Yes ____ No

FLOW CALCULATION SHEET FOR FIELD EXAM ON 67-7376
BY DAN NELSON

There were several factors to consider when calculating the flow rate for this permit. A measurement device has been installed in the ditch. This device is a 4 ft wide Parshall flume that is 2 feet deep. During my visit the ditch company had approximately 1.5 ft of water flowing through the flume.

Even though the water in the ditch was at this level during my field visit, it was very clear from the surrounding vegetation and water marks that the water in the ditch had totally submersed the flume. I checked water district records for basin 67, and found that the ditch company did divert 2.21 ft of water through the flume on July 15, 2001 and 2.2 ft on July 15, 2002. These two records confirm my observation that the water in the ditch has been run at least 0.2 ft above the top of the flume. The records for the water district are not very consistent, so I couldn't find any other instances of water being run above the top of the flume. However, the ditch rider and manager for the Cambridge Ditch Company have informed me that it is common practice to totally flood out the flume for this system.

In order to ensure the watermaster has the ability to properly measure and regulate the ditch, the capacity of the ditch must be limited to what can be accurately measured. Allowing more than the maximum amount that can be measured would cause serious problems for the watermaster.

DITCH CAPACITY:

The Bureau of Reclamation Water Measurement Manual's table A8-12 lists the flow of water in a 4 ft flume that is 2.00 feet deep is 47.8 cfs of water.

Therefore, the ditch capacity is limited to 47.8 cfs

MAXIMUM RATE ALLOWABLE PER ACRE FOR THIS PERMIT:

The permit limits this permit to 5/8 of an inch per acre or 0.0125 cfs per acre in an effort to keep this right consistent with the earlier Weiser River decree. I found a total of 1827.9 acres irrigated from the ditch. The maximum allowable rate of diversion is as follows:

$0.0125 \text{ cfs} \times 1827.9 \text{ acres} = \mathbf{22.85 \text{ cfs}}$ maximum allowable rate of diversion.

COPY

OVERLAPPING RIGHTS:

There are approximately 29 privately owned water rights that use the Cambridge Ditch to carry the water to their place of use. Most of these rights have an earlier in time priority date than this permit, so it is important to mention these rights. Most of these rights will be altered or changed when they are recommended in the Snake River Basin Adjudication (SRBA), but it is important to be aware that a portion of the ditch capacity goes to these rights.

Approximately, 959.7 acres of the 1827.9 acres have existing water rights on them, for a combined diversion rate of 27.42 cfs. At this rate of diversion, many of these rights would need to be reduced, because they allow more than the standard inch per acre or 0.02 cfs ($27.42 \text{ cfs} / 959.7 \text{ acres} = 0.029 \text{ cfs/acre}$). If these water rights were limited to the 0.02 cfs per acre standard, the overlapping water rights would only use 19.19 cfs of the ditch capacity ($0.02 \text{ cfs} \times 959.7 \text{ acres} = 19.19 \text{ cfs capacity}$), and if they are limited to the earlier decree's duty of water of 5/8 inch of water they would only be allowed 12.00 cfs of water ($0.0125 \text{ cfs} \times 959.7 \text{ acres} = 12.00 \text{ cfs}$).

This permit does supply water to approximately 868.2 acres that don't have any earlier water right associated with the land. At the 5/8-inch of water allowed under this permit, these acres account for 11.19 cfs of the maximum allowable rate per acre ($0.0125 \text{ cfs} \times 868.2 \text{ acres} = 10.85 \text{ cfs}$).

CONCLUSION:

It is impossible to determine at this time what rate of diversion and the number of acres that will be recommended for the existing water rights. The ditch capacity of 47.8 cfs is more than enough to supply the existing water rights at an inch per acre or 19.19 cfs and the new acres irrigated by this permit at 5/8 inch per acre or 10.85 cfs ($47.8 \text{ cfs} > (19.19 + 10.85 \text{ cfs})$). The unknown part of this equation is what will and will not be recommended in the SRBA.

Therefore, there are only two options available at this time. The first option would be to not license this right until the SRBA has been completed. The second option is to allow the maximum allowable of 22.85 cfs for this permit, and condition the license to limit the various possible combinations with the overlapping water rights. Whereas, we have been asked to license this right prior to the SRBA review, I must go with the second option and make the following recommendation:

I RECOMMEND THAT THIS RIGHT BE LICENSED WITH A DIVERSION RATE OF 22.85 CFS WITH THE CONDITIONS SIMILAR TO THOSE MENTIONED IN THE NARRATIVE.

COPY

OVERLAPPING RIGHTS:

There are approximately 29 privately owned water rights that use the Cambridge Ditch to carry the water to their place of use. Most of these rights have an earlier in time priority date than this permit, so it is important to mention these rights. Most of these rights will be altered or changed when they are recommended in the Snake River Basin Adjudication (SRBA), but it is important to be aware that a portion of the ditch capacity goes to these rights.

Approximately, 959.7 acres of the 1827.9 acres have existing water rights on them, for a combined diversion rate of 27.42 cfs. At this rate of diversion, many of these rights would need to be reduced, because they allow more than the standard inch per acre or 0.02 cfs ($27.42 \text{ cfs} / 959.7 \text{ acres} = 0.029 \text{ cfs/acre}$). If these water rights were limited to the 0.02 cfs per acre standard, the overlapping water rights would only use 19.19 cfs of the ditch capacity ($0.02 \text{ cfs} \times 959.7 \text{ acres} = 19.19 \text{ cfs capacity}$), and if they are limited to the earlier decree's duty of water of 5/8 inch of water they would only be allowed 12.00 cfs of water ($0.0125 \text{ cfs} \times 959.7 \text{ acres} = 12.00 \text{ cfs}$).

This permit does supply water to approximately 868.2 acres that don't have any earlier water right associated with the land. At the 5/8-inch of water allowed under this permit, these acres account for 11.19 cfs of the maximum allowable rate per acre ($0.0125 \text{ cfs} \times 868.2 \text{ acres} = 10.85 \text{ cfs}$).

CONCLUSION:

It is impossible to determine at this time what rate of diversion and the number of acres that will be recommended for the existing water rights. The ditch capacity of 47.8 cfs is more than enough to supply the existing water rights at an inch per acre or 19.19 cfs and the new acres irrigated by this permit at 5/8 inch per acre or 10.85 cfs ($47.8 \text{ cfs} > (19.19 + 10.85 \text{ cfs} = 30.04 \text{ cfs})$). The unknown part of this equation is what will and will not be recommended in the SRBA.

Therefore, there are only two options available at this time. The first option would be to not license this right until the SRBA has been completed. The second option is to allow the maximum allowable of 22.85 cfs for this permit, and condition the license to limit the various possible combinations with the overlapping water rights. Whereas, we have been asked to license this right prior to the SRBA review, I must go with the second option and make the following recommendation:

I RECOMMEND THAT THIS RIGHT BE LICENSED WITH A DIVERSION RATE OF 22.85 CFS WITH THE CONDITIONS SIMILAR TO THOSE MENTIONED IN THE NARRATIVE.

PLEASE NOTE: Water right 67-2219 is for 120 acres within a 156.5-acre permissible place of use. The remaining 36.5 acres are covered by Cambridge Ditch Company water right 67-7376. Therefore, the final totals should show a reduction of the covered acres by 36.5 acre and an increase in the new acres of 36.5 acres. It wasn't possible to show this discrepancy in these tables.

PHOTOGRAPHER AND DATE OF PHOTOS DANIEL A NELSON 5/24/2005

FILE NUMBER 67-7376

These photos are taken of the spot down stream of the point of diversion. The ditch company constructs a dam across the river every year to back up the water. This dam washes out each spring during the high water. The picture above shows the river without the dam and the picture below shows the river with the dam. The above picture was taken during my exam and the lower picture was taken during an exam that was done several years ago.

PHOTOGRAPHER AND DATE OF PHOTOS DANIEL A NELSON 5/24/2005

FILE NUMBER 67-7376

The above pictures are of the headgate and ditch flowing from the headgate at the Cambridge Ditch Company point of diversion.

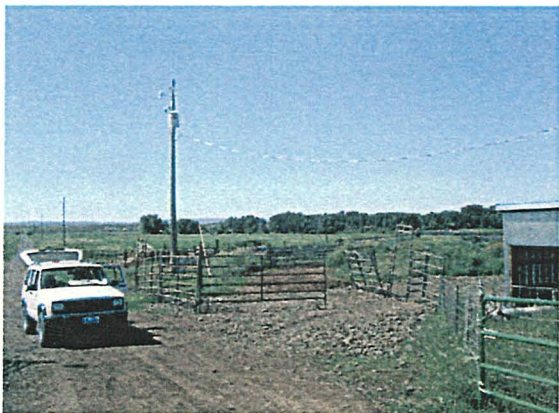

The picture below is of the Cambridge Parshall flume and the ditch after the flume. The flume is in a fairly good location and I am comfortable with any measurements made.

COPY

PHOTOGRAPHER AND DATE OF PHOTOS DANIEL A NELSON 5/24/2005

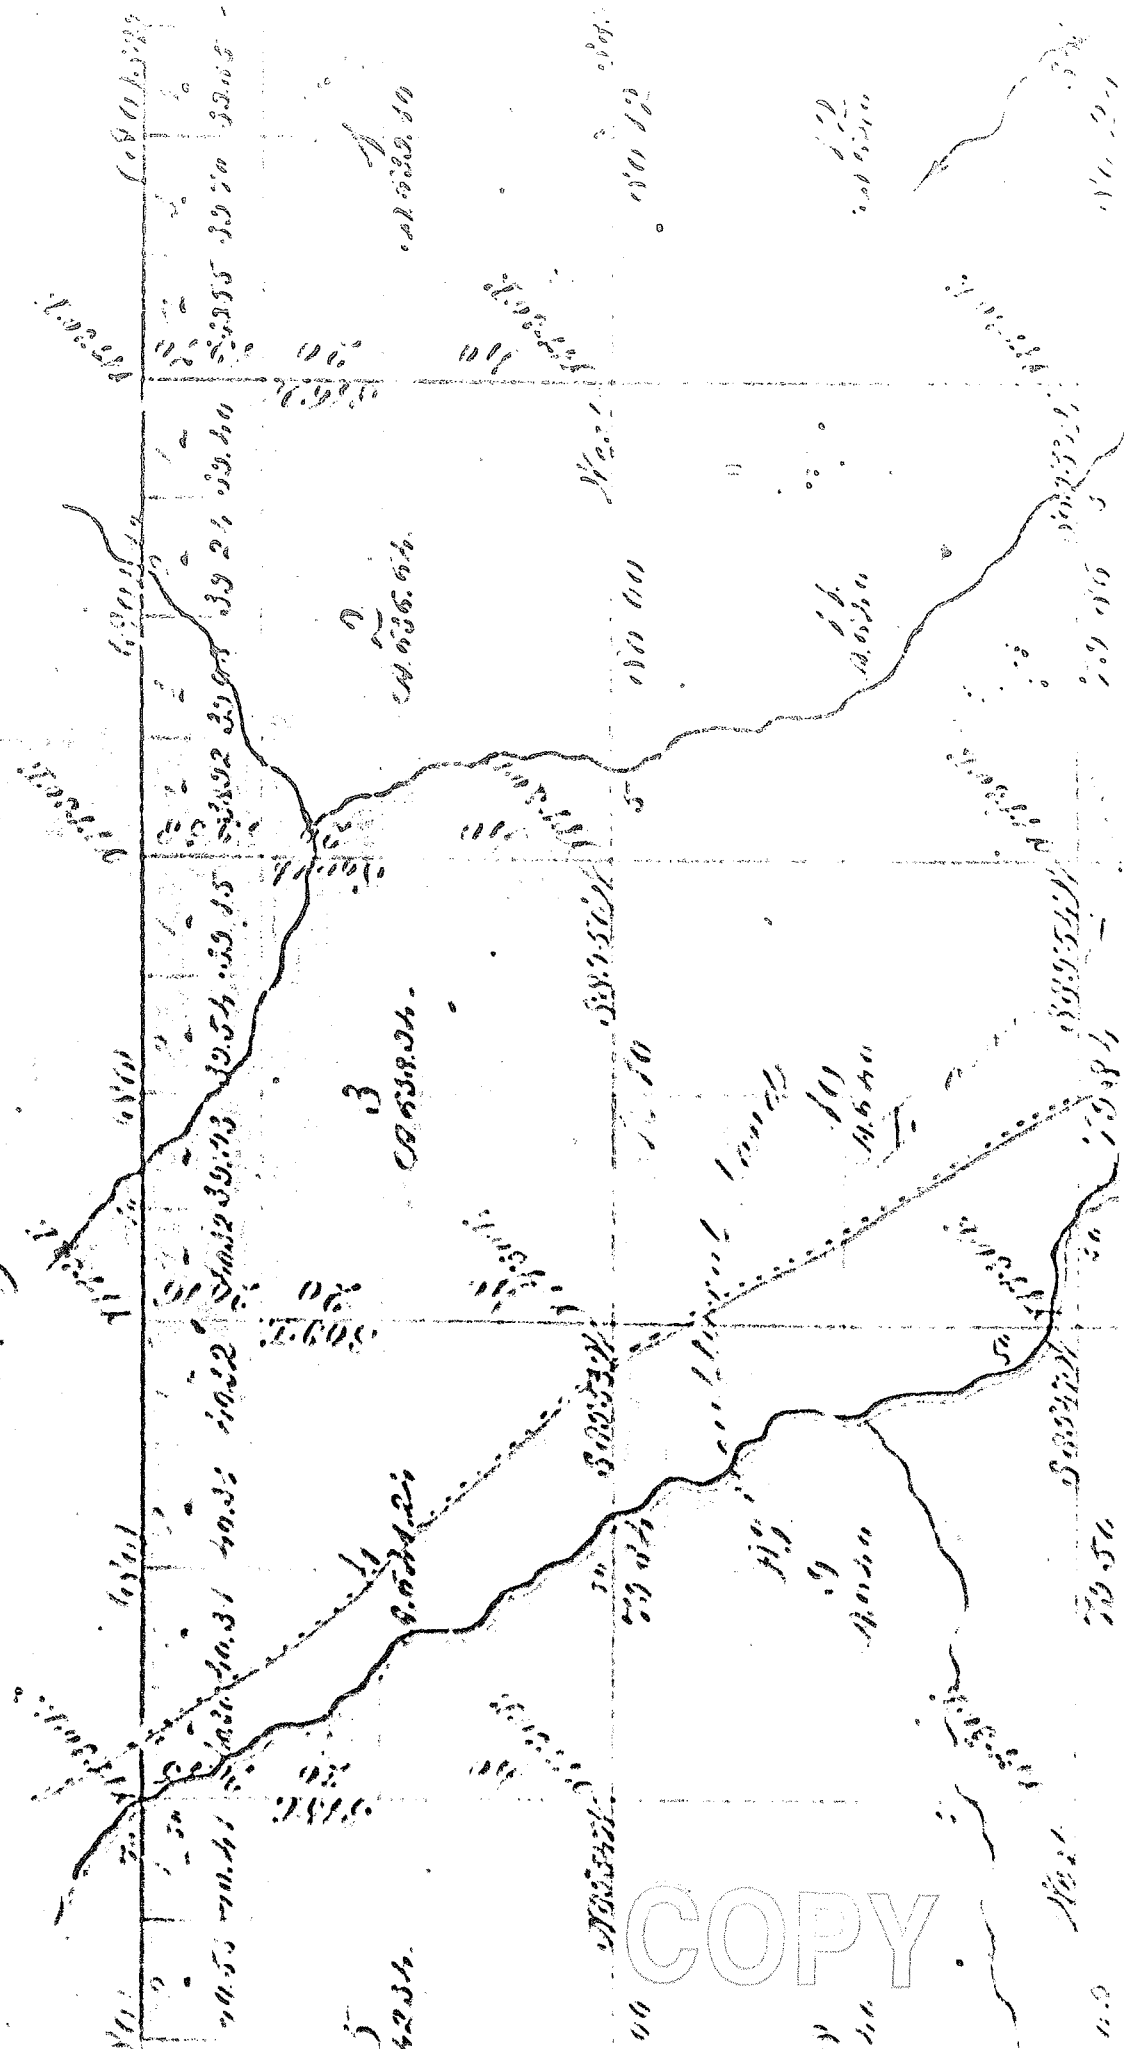

FILE NUMBER 67-7376

These are photos of the ditch and lands irrigated out of the ditch to the south. The picture was taken at the flume. It wasn't possible to photograph all the acres being irrigated, but this is a representation of the lands irrigated.

COPY

With kindest regards to all,
Yours truly,
John D. B. B. B.

REQUEST OF SHAREHOLDERS

We, the undersigned shareholders of the Cambridge Ditch Company, do hereby request that the Cambridge Ditch Company, on behalf of the undersigned, claim all water rights entitled to the Cambridge Ditch Company in the Snake River Basin Adjudication with the Idaho Department of Water Resources, in the name of the Cambridge Ditch Company.

In return for claiming all water rights to which the Cambridge Ditch Company is entitled for the benefit of its shareholders, the undersigned agree not to file separate, individual claims for Cambridge Ditch Company water in the Snake River Basin Adjudication with the Idaho Department of Water Resources. If a claim for Cambridge Ditch Company water has been filed by any of the undersigned, that person or persons agrees to withdraw his or her claim.

09/17/2008

IDAHO DEPARTMENT OF WATER RESOURCES
RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 67-7376

NAME AND ADDRESS: CAMBRIDGE DITCH CO
C/O JERRY JAEGER SEC
2953 SALUBRIA RD
CAMBRIDGE ID 83610

SOURCE: WEISER RIVER

TRIBUTARY: SNAKE RIVER

QUANTITY: 9.400 CFS
3,007.20 AFY

This right when combined with all other rights shall provide no more than 4.0 afa per acre at the field headgate for irrigation of the lands above.

The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion(s).

PRIORITY DATE: 03/14/1978

POINT OF
DIVERSION:

T15N R02W S16 SESESW Within ADAMS County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	04/01 10/31	9.400 CFS 3,007.20 AFY

PLACE OF USE:

751.8 ACRES TOTAL

This right is limited to the irrigation of 751.8 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The rate of diversion of water rights for irrigation under this right & all other rights on the same land shall not exceed 0.0125 cfs for each acre of land.

The boundary encompassing the place of use for this water right is described with a digital boundary as authorized by Idaho law. The data comprising the digital boundary are stored in the electronic document management system of the Department and are incorporated into this approval by this reference. A map depicting the place of use is attached to this approval document to illustrate the place of use described by the digital boundary.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

The issuance of this right does not grant any right-of-way or easement across the land of another.

Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 67.

5-10-05 : let Dan do licensing FE, then base recommendation
off of his findings.

CLAIMANT'S NAME: Barbara Ertel 257-3491 DATE: 10-27-89EMPLOYEE: Helen Harrington-ThomsonRE: C.H.E. Enterprises - AC7-000810

This claim, AC7-000810 will not be claimed, rather Cambridge Ditch Co. will incorporate those acres into the Ditch Co. claim of AC7-00081.

Mrs. Ertel took an amended version of AC7-00081 on this day and will deliver it to Mr. Jaeger to sign and notarize.

A new version of AC7-07376 was also sent out in order to get a correct signature block. This claim may also need to be amended to include the missing acres. But Mr. Jaeger will decide that.

There are not additional fees as they have been paid by the Ertels on AC7-020536.
