Returned the call about 2 pm.
Talked to his wife. She said he sent
a copy of the map in with the changes
made on the map. It sounds like he
also sent in the Notice of Error. She
said he sent them by certified mail.

12-8-06

Talked to Vernon again. I still have not
received his information he sent certified. He
thinks he sent it to the S. O. From the
phone conversation we determined the POD
is in the wrong Q Q and the shape is
wrong, but the biggest problem is the 1987

photography. It is quite a ways off. Once we both understood that we were able to agree on where the shape should be and what it should look like. I am changing the description of the POD back to the NWSE per the license. Vernon says that is correct. I will wait to receive his maps to place the POD.

Vernon called again & said the POD in the NESW is correct as recommended. It is ~~not~~ ^{near} ~~on~~ the line between the NESW and the NWSE which has added to the confusion. I left his recommendation alone (POD in NESW) and will just move the POD ~~to~~ closer to the QQ line & adjust the shape.

E. NARRATIVE/REMARKS/COMMENTS

This system uses a 350' well that has a 8" casing.
The 5 hp motor brings water from a standing water
level of 42'. After a few hours however, the
pumping level becomes 355'. The system is used
both in the house and in the garden in summer.
From the pump-head lines on to the lower
pasture where speggs and horses come to
the system. From my pump, I estimated that
there were 12 or 13 acres that were irrigated, but
10 as the permit limit. The line system, I think,
is not adequate by this design, but the
well is in good shape & permit conditions have
been met.

* please note that the owner has also filed an
adjustment plan for the second well, head etc. This
is in compliance with the state laws, as their permit
was filed before Nov. 1987.

Have conditions of permit approval been met? ☒ yes ☐ no
