STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP

Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
 Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

Water Right No(s).	Adjudication Claim No(s).	Split	Water Right No(s).	Adjudication Claim No(s).	Split
67-11178	67-11178				

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts.
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).
 OR
 If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

3. Name and Address of Former Owner/Claimant(s) Eugene Aldrich
240 Outlook Rd, Outlook, WA 98938
4. New Owner/Claimant(s) Wayne D. Aldrich and/or Brenda Aldrich
 Name Connector (Check one): ☐ and, ☐ or, ☐ and/or
- New Mailing Address 1500 Cove Rd.
- City, State and ZIP Code Weiser, ID 83672
- New Telephone Number 208 549-0239
5. Date you acquired the property 8-31-95

6. If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7. If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

I did advise Mr. Aldrich in our conversation yesterday

Dear Mr. Aldrich:

I am writing in regard to the two Notices of Claim to a Water Right submitted to this office. One is for the domestic usage and the other is for irrigation of 187 acres out of the Weiser River. There are a few items on these claims which need to be addressed.

1. Both claims were received in this office after the deadline for Washington County. This deadline was October 19, 1989; and your claim was received on October 30, 1989. There is a late fee required of \$50.00 per claim. You have the option of filling out a Request for Extension of Time form (enclosed) which, if approved, will entitle you to a refund of the late fee. I do, however, need this late fee before I can process your claims.

2. Item two, date of priority, should be shown to the closest month, day and year the usage was first put into effect. You may estimate.

3. On your domestic claim it appears that the first two quarter, quarters (item 10) were listed rather than the last two quarter, quarters. Note item 4.

4. It appears that there may be a previous water right on this property. I have enclosed two water right proof reading reports which indicate that some of your land may have a licensed water right. Water rights are appurtenant to property; therefore, if Edwin Ford, Jr., or any other individual, was a previous owner of your property then this may be the case. As long as this water is being used on your property, it would still be necessary to file an adjudication claim.

This land was owned by Edwin Ford Jr.,

I am returning both claims to you for the necessary corrections. If the aforementioned water rights are appurtenant to your property we will need to do more with these rights. Please return these claims to the attention of Linda Werner within 30 days of the date of this letter.

Jan Shurte

Comment: Recommend one day after license 67-2204. Part of the claimed POU was covered by licenses 67-2200 and 67-2204, and the other part of the POU was decreed under right 67-498. Am recommending one day after the license as part of the claimed POU was not covered under the two licenses and I cannot confirm an accomplished change in POU. Recommended as PPU with 67-498.

RE: Priority date recommendation for 67-11178

Dear Mr. and Ms. Aldrich,

Per my conversation with Brenda on 7-24-06, I re-reviewed the information in file 67-11178 along with the faxed information that Brenda sent in on July 21, 2006 regarding the power line easement.

I just do not see solid evidence that the ground licensed under 67-2200 and 67-2204 was irrigated prior to Mr. Ford filing for the application for permits and establishing the licensed priority dates of 9/19/1950 and 7/11/1951. The statements found in the file from Mr. Ford stating that the ground licensed under rights 67-2200 and 67-2204 was converted from dry land farming to sprinkler irrigation at the time the permits were filed is evidence that I cannot overlook when I make my recommendation to the Snake River Basin Adjudication (SRBA) court.

However:

As Brenda and I discussed, a portion of your farm was not licensed under 67-2200 and 67-2204 and therefore it has been argued that that ground could have been irrigated prior to the early 1950's. As I briefly mentioned in my July 12, 2006 letter, it appears that ground at the north part of the field falls within the place of use described under decreed right 67-498 (see enclose map). 67-498 was decreed with a priority date of May 1, 1890 and was for 62.4 acres of irrigation from the Weiser. One option is to file a claim for this water right.

When two water rights are combine into one claim, then the most Jr. priority date is recommended as that is the time all of the ground was being irrigated. Since you have one claim filed for ground covered with the 1890 water and the 1951 water, then I would have to recommend 1951 as the priority date for the whole water right (this is the situation we are facing now with 67-11178). However, if you filed a separate claim for the 1890 water, then we could preserve both priority dates. This would preserve at least

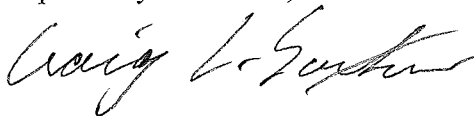

62.4 acres of 1890 water and then the remaining acreage would most likely remain 1951 water. The drawback is it will cost \$100.00 to file a new claim.

For convenience, I am enclosing a claim I prepared for decreed right 67-498. If you wish to file the claim, please look over the claim and initial any changes you wish to make, when satisfied, sign the claim in front of a notary and return it to this office with \$100.00 filing fee. The filing fee break down is \$100 per claim and \$2 per acre. However, the acres have already been paid for under claim 67-11178. So the final filing fee is \$100.00

In conclusion, the recommended priority date for 67-11178 will most likely not change from the preliminary report I sent you. But filing a new claim could secure a historical water right that was established on a portion of your property.

I do want to make clear that my recommendation is not the final say on how your water right will be decreed. If you still disagree with my recommendation, you will have a chance to file and objection and be heard by the SRBA court.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Craig L. Saxton". The signature is fluid and cursive, with the first name "Craig" being the most prominent.

RE: Evidence of Priority Recommendation for 67-11178

Dear Ms. Aldrich,

I received the additional information you sent supporting the priority date for claim 67-11178. I just wanted to drop you a line and go over what I found.

Part of the claimed place of use under your water right was licensed under old licenses 67-2200 and 67-2204. These licenses had the priority dates of 9/19/1950 and 7/11/1951 respectively. In addition, part of the place of use claimed in 67-11178 that was not licensed under 67-2200 and 67-2204 appears that it might have been covered with flood irrigation water as described by decreed right 67-498. That ground being the ground that lies south of the Weiser River in the N1/2 of the SE1/4

When Eugene Aldrich filed claim 67-11178 in 1989, he opted not to file on the original licenses but file on a beneficial use claim. *A beneficial use claim is a claim to a water right established through historical use, but the elements of the water right have not been verified.* This is generally done when the claimed place of use covers ground that was not described in the license(s), or in order to establish an earlier priority date.

I believe Eugene filed his beneficial use claim both to add ground not covered in the licenses and to gain an earlier priority date. However, as you know from our requests, Eugene did not provide information in the file showing us why he felt that the ground claimed was initially irrigated in 1947 rather than 1950 and 1951 as stated in the license.

Analysis:

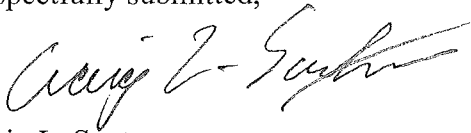

In the old files I found two documents, that speak of the ground being, "***converted from dryland to fully irrigated land...***" in 1950 and 1951. So it does not appear that the system was in place and irrigating for several years prior to Mr. Ford filing for an application for permit. It appears that the priority date on the licenses represent the date(s) water was first put to beneficial use on the ground.

You have provided several affidavits, that along with the above information, really seem to support the development of the ground under licenses 67-2200 and 67-2204.

At this time, the evidence I have appears to support that the earliest date, that all the ground claimed under 67-11178, would have been irrigated would be **7-11-1951**, or the most jr. priority date of the two licenses.

I know you have put a lot of work into researching a priority date for 67-11178 and I personally really appreciate your working with us to help us make our recommendation as accurate as possible. I am enclosing the historical documents I spoke about above, as well as the preliminary recommendation I plan to submit to the SRBA court. If you still disagree with my analysis, then give me a call and we can talk about it.

Respectfully submitted,

School Starts Beef, Swine Feed Trials

Tests Will Demonstrate
Comparative Values Of
Antibiotic Combinations

Livestock feeding trials are being set up for the winter program at the Weiser high school agriculture department farm under plans formulated by Calvin H. Crandall, farm manager, and approved by Arthur Breshears, Arlo Alder and Bob Eamons, members of the special agriculture committee of the school board, District 431-A.

Each year these feeding trials are conducted as one of the parts in the educational program for the benefit of the high school vo-ag students, for the Veteran's vo-ag classes and for the community. They are all designed to help solve some of the real feeding problems of the farmers of the Weiser area whether future farmers or those presently engaged in farming.

The beef feeding trials will demonstrate the comparative feeding values of the hormone stilbestrol when fed in combination with the antibiotic terramycin as compared to rations containing only terramycin. A final pen will be fed only the basic ration of chopped hay, corn silage, wheat, barley and dried beet pulp as a check.

36 Feeder Steers

Three pens of cattle will be fed using 36 feeder steers beginning at about 600 pound weights. This year's feeding program is a continuation of the 1955-56 trials when three pens of Hereford steers were fattened.

Tests last year were run on the comparison of the hormone stilbestrol fed alone against a combination of stilbestrol and terramycin. A check pen was also fed.

Results of the 1955 feeding program showed: Check pen—Average daily gain 2.14 lbs.; stilbestrol pen—average daily gain 2.65 lbs.; terramycin-stilbestrol pen—average daily gain 2.86 lbs. Both pens fed the feed supplements showed a lower cost per pound of beef produced. All steers were marketed at the same time and there were no significant grade differences between the pens.

Six Pens Of Pigs

Swine feeding demonstrations are also an important part of the high school ag department farm program. Tests showing the differences in rate of gains and the

Social Security Talk Set Midvale, Nov. 29

C. Ben Reavis, Social Security manager in Boise, will conduct an informational meeting on the subject at 8 p.m., Thursday, November 29, at Shoe Peg Grange hall, about three miles north west of Midvale.

Reavis is a native of Midvale and well known throughout the county. He has been invited by the Grange to discuss all aspects of social security as a public service.

The Grange stressed that everyone is welcome to attend whether or not they are Grange members.

Bridge Coffor Dam For First 2 Piers Nearing Finish

The first coffer dam for the new Union Pacific railroad bridge near Huntington is about two-thirds completed. The dams are being built from rock and dirt to hold back the water so that two piers and the Oregon side abutment of the bridge can be erected.

After the dam is completed, water will be pumped out and excavation to bedrock will start. The time schedule calls for installation of the piers and the pouring of concrete around them by February 1, according to Glenn C. Johnson, Brownlee project manager.

The bridge is being built for the Union Pacific railroad by the Idaho Power company with the work being done by Morrison-Knudsen company as a part of the Brownlee project. The new bridge will be above the high water level of the pool to be created by Brownlee dam and will necessitate the relocation of eight miles of track mostly on the Idaho side.

The bridge will be located about 200 feet above the present one which will be partially under the water when the lake is created. About three-fourths

Edwin D. Ford, Pioneer Resident, Dies At Age Of 93

Edwin Douglas Ford, who came to Washington County in 1898 and was one of its oldest residents, died early Thanksgiving morning at Weiser Memorial Hospital. Had he lived to January 1 he would have been 94 years old.

Mr. Ford was born at Watertown, Wis., the son of Capt. Edwin W. Ford and Sarah Wetherbee Ford. At the time of his birth, his father was being held as prisoner of the Confederate Army in Libby Prison, Charleston, South Carolina. Mr. Ford was two-years-old before his father was released.

Mr. Ford's youth was spent in LaCrosse, Wis., where at the age of 15 he worked in a railroad office. At 21 he was postmaster of LaCrosse.

Came West In 1890

In 1890 he came west with a surveying crew of the Great Northern Railway and settled in Wenatchee, Wash., where he operated a general store for a number of years. From there he moved to Cripple Creek, Colo., at the time of the gold rush, where he also operated a general store and became the first mayor of the community. While living in Colorado he married Miss Hortense Alling Wright of LaCrosse.

Mr. Ford and his brother, Simon W. Ford, discovered and operated a gold mine at Black

Industry Showing Interest in Area, Chamber Is Told

Much interest has been shown by industries in southwestern Idaho and Eastern Oregon and particularly in the Weiser area, it was reported at the Chamber of Commerce meeting today noon by Gene Stanford, industry chairman.

He said that the interest in Weiser is mainly due to the fact that it is located on Snake river, being the last town on the river, and because of its nearness to Brownlee dam.

The industry committee has had meetings with several industrial representatives interested in this area but in all cases has been asked not to divulge who they are or their plans for expansion or relocation.

Several Meetings Scheduled

Meetings scheduled by the committee include: January 9, with an industrial prospect that has spent much time investigating this area; November 29, with Ralph Gale, executive manager of Idaho Power company, regarding other industrial prospects; in December with Sam Reinhardt of Union Pacific regarding relocation of the railroad tracks from Huntington bridge, and another with Jess Adrian who has options on land near Olds Ferry.

Stanford said the committee has investigated possible industrial sites and has several aerial photographs and maps showing possible sites.

Home Decorators Offered Cash Lure

Eight cash prizes allocated by Weiser merchants will be awarded exclusively to new winners in the annual home Christmas decorating contest.

This was announced today by Weiser beauticians, who annually sponsor the contest. They said that all cash awards will be devoted to encouraging new entrants.

Winners of previous years will compete among themselves in a separate category for awards of permanent waves at the participating shops.

Names of the top 18 entrants who have not won a prize in the past three years will be placed in a box for a drawing of eight cash winners. Amount of the individual cash prizes will be announced later.

Present plan is to hold the drawing at the annual community Christmas party at East Side gym.

Rural decorations are encouraged and may enter the competition for prizes by notifying any of the beauty operators so judging can be accomplished.

Churches also are being asked to join again in placing Christmas scenes, although no prizes are offered.

Saddle Club To Elect At Meeting December 6

The Indian Head Saddle club will hold its annual election at Hotel Washington Thursday, December 6, 8 p.m., Francis Larson, president, announced today.

No public health program is complete without the availability of adequate laboratory services. Good community health is achieved only by a "team" approach, and one of the important members of this team is the public health laboratory.

We believe Idaho is fortunate in having five well-equipped, strategically located public health laboratories. In addition to the central state laboratory at Boise, there are branch laboratories at Coeur d'Alene, Lewiston, Twin Falls and Pocatello.

One of the important jobs performed by laboratory personnel is sanitary bacteriology, which lays the foundation for a healthy community by regularly checking water, milk and restaurant utensils for bacteria.

Diagnostic Aid

Diagnostic serology and bacteriology assist physicians in diagnosing and treating diseases, and in controlling epidemics. Such contagious diseases as typhoid fever, diphtheria, tuberculosis, syphilis and others come under almost daily scrutiny by Board of Health bacteriologists.

Public health chemistry serves the public by performing chemical analyses of foods, drugs and water, and by testing for the extent of pollution in streams and air.

To assist in keeping communities healthy, the Division of Laboratories of the State Board of Health distributes, statewide, sufficient biologicals for thousands of immunizations for diphtheria, smallpox, whooping cough, typhoid fever, poliomyelitis and other diseases.

Can Identify Polio Virus

Scientific laboratory techniques change rapidly, and the Board of Health's laboratories have kept up to date so that Id-

service possible.

One of the most notable achievements recently has been the establishment of a virus laboratory in Boise. For the first time in Idaho, facilities are now available to isolate and identify the various strains of polio virus. This has proved of great value in helping physicians diagnose polio, and in continuing virology studies on the Salk polio vaccine.

Lake which they incorporated as the Idaho Gold Mining company.

Promoted Crane Reservoir

The construction of the Crane Creek Reservoir was also promoted by Mr. Ford. He first appreciated the value of such a reservoir would be to the community about 1909 and devoted the next four or five years to its financing and construction.

In more recent years he engaged in farming three miles east of Weiser, on Route 4, and at one time he and Mrs. Ford operated one of the leading poultry farms in this area.

Mrs. Ford preceded her husband in death in November, 1936. Up to recent months Mr. Ford had been in excellent health and until his death he took a keen interest in his farm and in current political events.

Services Held Saturday

Services were conducted Saturday afternoon at Northam-Jones Chapel by the Rev. Robert Gutherlet, minister of the Methodist Church, and interment was at Hillcrest cemetery.

Surviving in addition to his brother, Simeon W. Ford of Weiser, are his daughter, Mrs. Eugene Aldrich of Weiser; a son, Edwin D. Ford, Jr., of Weiser and New York City; seven grandchildren and eight great-grandchildren.

EDUCATION FACTS

from THE IDAHO EDUCATION ASSOCIATION

This is the ninth of a series of twelve articles which will appear in the Weiser American. These articles have been prepared by Idaho public school teachers in the public interest.

SOCIAL SECURITY FOR IDAHO TEACHERS

By Irene Smith,
Junior High School Teacher,
Idaho Falls

Governor Robert Smylie, in 1935, requested the board of trustees of the Idaho Teachers' Retirement System to recommend "a plan, or plans, to make available to Idaho teachers the benefits of social security without loss to any of the prospective benefits under the teacher retirement system."

The Legislative Interim Committee on the Minimum Program, the North Idaho Chamber of Commerce, the Idaho Congress of Parents and Teachers, the Idaho School Trustees' Association, all have concurred with the Idaho Education Association in endorsing the proposal that Idaho teachers should have social security benefits in addition to present teacher retirement system benefits. A teacher must have rendered 35 years of service in Idaho, with a salary at no time during the last ten years of service below \$3,000 per year, to qualify for teacher retirement benefits of \$125 monthly. Most teachers now retiring receive benefits considerably below this amount.

The retirement systems of several states make it possible for a teacher to receive retirement in-

come in excess of the average salary of teachers in service in Idaho.

Would Improve Permanency

We have an obligation as teachers and members of a profession to ask the parents of this state to work for legislation which will contribute to the permanency of the teaching staff in the schools and to quality of applicants who are available for the jobs in those schools because this in turn makes a strong school unit and results in better training for children. In Idaho the 1954-55 turnover was one in five, much too high for effective co-ordinated operation of the school systems.

The loss of teachers to other states, as shown by the last survey, was predominantly from junior and senior high school staffs, most of whom had a bachelor's degree or better. Sixty per cent had between 3 and 10 years of experience. As teachers we must not stand idly by and watch many of our best qualified co-workers move to other states where they can secure adequate retirement benefits without describing the situation to you, the people, and giving you an opportunity to decide the quality of school you want by the quality of teacher you are willing to put forth an effort to hold.

All major employers in commerce and industry have retirement systems supplemental to social security for their workers. Teachers must have the same consideration. Many other states have recognized this fact. Do your part, as parents, to maintain high standard schools for your children by explaining the situation to your legislators and asking them to add social security to the present retirement system for teachers.

Mr. Saxon,
We cannot find any concrete proof of the 1947 date which Wayne's father, Eugene Aldrich (Civil Case #39576) put on his original claim. Didn't he send something with that claim? I will keep looking. Monica said it had to be in by August.

I am sending affidavits and Wayne's grandfather, Edwin Ford Sr.'s, obituary, for the year of 1950. Phil Aldrich seems to think it was before then but has no records to back it up.

Arlene Randal Given being first duly sworn,
deposes and says: I'm age 77 - and I'm
remembering the 1940's and early 50's. I
was dating the Given Aldrich family
oldest son Edgar at the time (40's) I
and we were married in 1949. We
returned from the army where he was stationed
and discharged in 1950. We purchased the
Webb place (40 acres) just east of the Ford house
and I remember them talking of irrigating
the whole place with sprinklers. They thought
Edgar was so impressed with the enormous
pumps being installed down at the Weber River
that he took me down to see them. The coop installed
them - But I understood there was a gas motor pump
on part of the ground before that.

WEISER VALLEY TITLE	

CORRECTION DEED

FOR VALUE RECEIVED, WAYNE D. ALDRICH, as the Personal Representative of the Estate of Eugene W. Aldrich, conveys and quit claims to WAYNE D. ALDRICH, As Trustee of the Revocable Living Trust of EUGENE W. ALDRICH, dated December 1, 1992, the following described real estate, situated in the County of Washington, State of Idaho, including the after acquired title:

All that portion of the N 1/2 of the SW 1/4 of Section 2, lying South of the Weiser River, and that portion of the NW 1/4 of the SE 1/4 of Section 2, lying South of the Weiser River, and that portion of the NW 1/4 of Section 2, lying South of the Weiser River; and the SW 1/4 of the SW 1/4 of Section 2; the NE 1/4 of the SE 1/4 of Section 3; the NW 1/4 of the NW 1/4 of Section 11; and that portion of the SE 1/4 of the SE 1/4 of Section 3 and the NE 1/4 of the NE 1/4 of Section 10 lying East of the wasteway of the main ditch of the Weiser Cove Irrigation District when the ditch is in operation; all in Township 10 North, Range 5 West of the Boise Meridian.

Situated in Washington County, Idaho

SUBJECT TO easements, rights of way, reservations and restrictive covenants appearing in the chain of title or otherwise apparent, laws, contracts and proceedings relative to water, water rights and drainage, and to taxes, assessments and charges falling due against the premises subsequent to the date hereof.

This Deed is given to correct that certain Deed dated December 1, 1992, recorded February 16, 1993 as instrument number 156312 which incorrectly included all that portion of the NE 1/4 of the SE 1/4 of Section 2, Township 10 North, Range 5, West of the Boise Meridian lying South of the Weiser River.

Dated this 31 day of August, 1995.

THEORETICAL HORSEPOWER EQUATION WORKSHEET (cjh 1/92)

Water Right No.: 67-11178
 Examiner: Craig L. Saxton
 Date of Field Exam: 6/8/2006

P/D No.:	Pump 1	Option 2	Option 3
PUMP HORSEPOWER	125	0	0
BOOSTER HORSEPOWER	0	0	0
PUMPING LEVEL	25	0	0
DISCHARGE PRESSURE	45	0	0
RATE OF FLOW (cfs)	5.97	0.00	0.00

The above calculates the formula =

$$Q = \frac{8.8 * (\text{Efficiency}) * \text{hp}}{\text{depth to water} + 2.31 * (\text{psi}) + \text{friction}}$$

Assumptions: %70 efficiency.
 No Friction

Examiners Notes: Pressure not measured, but "rule of thumb" is 45 psi. This pressure used because the system description shows all irrigation is from Sprinklers. Average nozzle flow is 5 gpm at 45 psi.

MEMORANDUM

Date: April 15, 2005

To: Roger Meyer
Bosco Bosler

From: Craig L. Saxton

Subject: 67-2200, 67-2204, 67-02223, 67-4504, 67-4150, 67-10899, 67-11178, 67-14018, and 67-14020.

Claims: 67-2200, 67-2204, 67-4504, 67-14018, and 67-14020:

All of the above claim the same point of diversion. We need to know the capacity of that point of diversion. How much it will pump.

The story with this is that in 1950 during the licensing Field exam for license 67-2200, it was determined that the pump could divert 5.15 cfs. However, the sum of these 5 claims from that point of diversion is 8.36 cfs. We need to know if the pump can produce that much water. The place of use and priority date can all be verified using the information in the files.

All I need is the capacity of that point of diversion, GPS point and picture of the pump, and when (after 1950) that system was changed so they could pump 8.36 cfs. I am giving you the files anyway in case other questions come up.

Claim 67-04150:

This claim was brought to attention because it used to be owned by Winding Brook Corp and I thought if you were meeting with them anyway, they might be able to provide you with some information. Needs full field exam.

Claim 67-11178:

This claim was brought to this group because part of the claimed POU is the same as the licensed POU for 67-02200 and 67-02204. But ignore that for now and treat as separate right. This needs a full field exam.

Claim 67-10899:

This claim was brought to this group because part of the claimed POU is the same as the licensed POU for 67-02200 and 67-02204. But ignore that for now and treat as separate right. This needs a full field exam.

Claim 67-02223:

This claim is under Winding Brooks name, but it doesn't look like they own it anymore. I thought since you were meeting with Winding Brook, you could ask them about it. See notes in file.

4-13-05: Need Evidence of Priority: No Earlier than 7-11-1951
if going to base this off of portions of 67-2200 + 2204.

: Need to Verify POD

: Need to Verify POU

: Need diversion Rate, System Capacity.

Note: Apportion of this Right in the initial Revised claims
99.5 ac and 1.58 cfs of 67-2200 + 2204.
The rest of the acres are B-use that needs
proof of use.

Conduct Regular FE, and I will figure out the rest
of this mess.

REPORT OF ENGINEER

Permit No. 22249

This proof is for Completion of Works and Beneficial Use Water District No.

1. Name of applicant Edwin D. Ford, Jr., Box 207, Weiser, Idaho

2. Source of water supply: Weiser River

3. Location of point of diversion: Is in the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 2

T. 10 N. R. 5 W. County of Washington

4. Describe works as they exist, giving dimensions and capacities of same: Two Weinman 6-L centrifugal pumps with 8" intake and 6" discharge, 18" impellers (no number plates).
1st G.E. motor # SH 6 870 469, 100 HP., 440 V., 1760 rpm., 120 amp., 3 phase, 60 cycle.
2nd G.E. motor # SJ 8 005 876, 75 HP., 440 V., 1770 rpm., 91 amp., 3 phase, 60 cycle.
Two Square-D switches, 575 V., 400 amp. Two D.E. starters. Westinghouse safety switch.
G.E. meter # 30 030 235, 480 V., 60 cycle, 3 phase, demand 2.0 X 30.
Metal pumphouse 8' x 17'. Concreted sump 6' x 8' and 15' deep. Water lift to pump is 13'. 7" intake pipe 16' long and discharge pipe 9' long and 8" dia. to 12" mainline for pump with 75 HP. motor. 9" intake pipe 16' long and discharge pipe 3' long and 8" dia. to valve to 12" mainline through a reducer for pump with 100 HP. motor. 25' of 30" pipe from river to sump with vertical gate at intake end.
5. Water is used for: Sprinkler irrigation

6. State whether or not water has been turned into works of diversion: Yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

SW $\frac{1}{4}$, SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 2;SW $\frac{1}{4}$ and SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 3;NE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 4;NE $\frac{1}{4}$ and NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 10;NW $\frac{1}{4}$ NE $\frac{1}{4}$, SW $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ NW $\frac{1}{4}$, NE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 11;

All in Twp. 10 North, Range 5 West, B. M.

See Map

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? Weiser River

Remarks: Crops: grain, beans, hay, and beets.

The actual point of diversion is approx. 5' north of 40 acre line (see map). Pumps and sump are south of said line. The diversion works are situated on the bank of the river which is being repaired to resist erosion. If, however, the erosion is not stopped the river will force the point of diversion south of the 40 acre line.

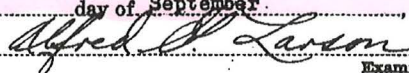

This is the third of three sprinkler installations. The mainline of all three systems are interconnected so that water from any of the three systems can be put into any part of the entire system.

The other two systems are described in permit # 21717.

Mr. Philip Ford accompanied examiner on inspection.

This examination was made on the 25th day of September, 1952

(Signed)

Examiner.
