This is the well that has the "boosters". Not sure if that is what they are called. He is running a 1/4 mile wheel line and running water to the pond to pump another 1/4 mile line. This would be about 40" of water. This is the only way that I could guage the output.

Assumptions: %70 efficiency.
 No Friction

Examiners Notes: Open discharge to ditch that can flood irrigate or flow to a pond where it is co-mingled and rediverted through sprinklers. Base diversion rate on open discharge before water is co-mingled.

SUBJECT: Ownership change and split information

In reviewing this change of ownership, the change of ownership form received indicated that water right numbers 67-11025 & 67-11026 result in a split. However, after reviewing the claims and the maps, it was determined that the claims to be split are actually 67-2208 and 67-12330, in addition to 67-11026. Claim numbers 67-322 & 67-11025 do not appear to be splits.

Anthony Finchen (new owner) purchased land in Sections 27 & 28, *South of the County Rd.* Refer to the maps in each file for further information.

Dear Claimant(s):

We have received and processed a Change of Ownership for a portion of your original Claim to a Water Right Number as referenced above. This change of ownership resulted in a split of your original claim.

When a portion of the original water right claim has been conveyed to another and the original right has been split, then the original claim number is renumbered by issuing a new water right number to represent each split. Each split contains only the portion of the original right for each separate owner. The above referenced new claim number reflects your remaining portion of the original claim after the change of ownership. Enclosed is a copy of this new claim for your records. Please refer to your new claim number when corresponding with our office.

Please note that the enclosed Notice of Claim to a Water Right is not a determination of your right. This claim represents the remaining portion of the claim filed during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you for your patience, as we have had several water right changes to process. If you have any questions concerning this ownership change, or the enclosed claim copy, please feel free to contact this office.

Sincerely,

Adjudication Section
