Remarks:Comments:

1. csaxton 1/11/2006 Diversion Rate

Comment: Diversion Rate Recommended is recommended for enough water to bring total diversion between flood and decreed water to 1 inch per acre.

2. csaxton 1/11/2006 Irrigation System

Comment: In meeting with claimant on 9-28-05, I was told that water from Pine Creek and from Camp (Spring) creek can go through the same system and irrigate all 26 acres being recommended under this PPU.

3. csaxton 1/11/2006 Source

Comment: Actual source is Camp Creek in which Spring Creek is trib to.

4. csaxton 1/11/2006 Copied from claim (1)

Comment: Original decreed right was .88 cfs.

5. csaxton 1/11/2006 Copied from claim

Re: Transfer Applications

Dear Mr. Carver:

Thank you for returning my phone call. As we discussed, our office received your two transfer applications and claim amendments 12/1/2003. It appears that the transfer applications are not necessary because the change occurred prior to 1987, which was documented in your letter to Ron Howerton dated 6/21/2003. As a result, the change in point of diversion can be considered an accomplished transfer. It does not matter that a portable (temporary) diversion works was used at the new point of diversion after the original structure washed out, it still counts as an accomplished change if done prior to 1987. Improvements, such as installing a permanent pumping station, can be made where the accomplished change has occurred without having to file applications for transfer. Enclosed are your Snake River Basin Adjudication (SRBA) claims that have been amended to reflect the new point of diversion from Pine Creek in the SENW S10 T14N R3W.

When the SRBA team reaches your area, please be aware that you may have to submit documentation or proof that the point of diversion change occurred prior to 1987. This can be in the form of an affidavit from a local resident, receipts for the temporary system that date back prior to 1987 or anything else that supports the change.

Because we did not process your transfers, a signed withdrawal form is not necessary. I have requested a refund for the \$250 fee you paid for the transfers, per receipt no. W031160, which you should be receiving within the next two weeks. I have also enclosed your transfer applications for your records.

Please let me know if you have any questions. Merry Christmas.

Sincerely,

Lori Graves

RE: Your letter of August 19, 2003 with the temporary claim forms and information for correcting record of point of diversion for Snake River Basin (SRBA) Claims 67-14388 And 67-14392.

Dear Ron:

Your letter, forms and information of above date were much appreciated. It took me some time, but I finally went to Boise and hired a consultant to figure out the paper work for us. About two weeks later I checked with him by phone and the next day I had concluded that he was not going to be much help to us. We decided to try it again ourselves. The consultant charged us \$100.00 for one hours work.

The notarized temporary claims are returned herein. I did add or change some of the information on them. I only hope it clarified the situation and did not confuse it.

Completed "Applications for Transfer", to change record of permanent point of diversion are also included. Former owners of the property had been pumping from this area for years and I had initially presumed it was of record.

I am uncertain how to calculate the fees for this change of point of diversion since it is the same one point of diversion for 1902 and 1908 water claims with total of 0.614 C.F.S. to the same pipe irrigation system I am enclosing our check for a \$250.00 filing fee. If this is not correct, or there are problems with the paper work, please let us know.

Sincerely yours,

George A. Carver

Snake River Basin Adjudication (SRBA) Claims 67-14388 & 67-14392

Dear George,

I have reviewed your request to amend the above claims to change the point of diversion for water taken from Pine Creek.

I have prepared two computer generated temporary claims referenced above with the point of diversion amended as requested in your letter.

If you agree with the information on these claims, then please return these with either one or both of your signatures along with the required notary's signature and seal to Western Region.

Please feel free to make a copy of your completed signed Notice of Claim(s) for your records. Once we receive an original signed Notice of Claim, we will then change the status from temporary to active.

Since you plan on changing the permanent point of diversion under these rights, then an "Application for Transfer" of these rights is required. I am sending a packet for filing a point of diversion transfer. This packet has a complete set of instructions and a list of consultants to help you file your application.

Sincerely,

Regards: AMENDED WATER RIGHT CLAIM, CHANGING POINT OF
DIVERSION

Pursuant to telephone conversation of June 6, I wish to file this Amended Water Right Claim, changing the point of diversion for water taken from Pine Creek, in the vicinity of Cambridge, Washington County, Idaho.

Change of point of diversion is requested for the following water rights on Pine Creek:

1. New #67-14388, priority date 05/01/1902
2. New # 67-14392, priority dates 04/15/1908. (Change for Pine Creek only)

The present record for point of diversion is a former dam sight that was located upstream for gravity irrigation. It was washed out prior to 1987 and the prior owners of the property were using a seasonal temporary pump and hand lines. We wish to install a permanent pumping station with a wheel line for irrigation. There is no water taken or diverted from Pine creek between the old dam sight and the new sight for the pump location. The pump location will be on our property approximately 225 feet downstream of our NW property corner. The property on the other side of the creek is owned by our son-in-law and daughter Randy and Kathryn Noah. They are the next ones upstream of us to use water from Pine Creek

I checked with Irv Ballou of the Army Corps of Engineers and he advised me that we were exempt for agriculture use on this and would not need to file anything with them.

A map of the area of our property is attached. It indicates the area of the former dam sight (recorded place of diversion) identified as 'A', and the proposed pump sight location as 'B'. If any questions or clarification needed please let us know.

Very truly yours,

George A Carver

Dear George,

I have reviewed your approximate property outline markings on the aerial map you sent back for me to compare.

I still have not come-up with any additional irrigated acres unfortunately... The detail of these maps are pretty conclusive, our software that calculated the acres are accurate to 1/10th (0.1) of an acre.

I have returned a copy of the map you marked up. I also produced a "new" map (same aerial) showing the fields within your boundary that appear to be irrigated and came up with the same irrigated acres as before (enclosed). Still the overall plan is to clarify the actual irrigated acres for certain is by an agent from IDWR completing a field exam. The field check versus the map should be beyond question.

Your tax information you may have, might include non-irrigated lands, which could be more than what acres are actually irrigated, this may be the difference in the two totals? If you have any more ideas, let me know and I will try to help.

Dear Ron:

Thank you for your letter of December 4. I have outlined our approximate property lines on your aerial map with a black marker pen and am returning it herein. The line I drew in on the East side toward Highway 95 is just a guess, as best I can estimate. There is a fence on that property line but it does not show on your map. The other lines are well established by the tree lines of the two creeks on the north and south, and by Bumgarner's field in light color to the North and West. The property runs to the center of the two creeks.

Please keep me informed on what you are deciding on this. I am working with the Soil Conservation District on the irrigation.

To: File 67-14387, 67-14389 & 67-14391
From: Denise Hatfield
Date: December 12, 2002
Subject: Ownership information

An address update was sent for signature to Margaret Strawn on November 26 2002. She signed and returned the letter, verifying her mailing address, however, she indicated on the letter that she had sold the property to George Carver. When that particular ownership change was processed on November 18 2002, it resulted in a split. Carver is the current owner on claim numbers 67-14388, 67-14390 & 67-14392. The splits are as follows:

67-225 split into 67-14387 (Strawn) & 67-14388 (Carver)

67-235 split into 67-14389 (Strawn) & 67-14390 (Carver)

Dear George,

I have reviewed your tax notices and noted the difference in the amount of land you own versus the land you irrigate.

I'm sending another aerial map that should be a little more detailed than what I sent. Please feel free to make copies of it. Please outline & mark the area in which you irrigate that is your land. I will then compare this information and possibly find a difference.

The overall plan that would clarify your irrigation would be a field exam, in which will be at least two years from now. I split the statutory claim 67-04055 based upon comparing our 1987 NAPP images and the aerial map I received with the ownership change, versus tax ownership lines. Some discrepancies may result in comparing these types of data.

Lets compare for now, what you draw on this map and return it to me. I will then see if an adjustment is appropriate. Please contact me if you have any questions regarding this letter or ideas to clarify prior to any field exam.

Sincerely,

Hello Ron:

We received your maps today indicating your office shows our acreage to be a total of 26 acres.

I am enclosing machine copies of our county assessor's tax bills for the two parcels we are currently billed for on the property. One shows "TOT ACS" (total acreage) of 9.350 and the other is for 22.150. They total 31.50 acres. We have a discrepancy of 5 ½ acres.

Will you please recheck your sources and advise us further. If needed, our phone number is 257-3610, and our street address is 255 N First Street, Cambridge.

Sincerely yours,

George Carver

Renumbered Notice of Claim to a Water Right No. 67-14392

Dear Claimant(s):

We have received and processed a Change of Ownership for a portion of the original Claim to a Water Right Number as referenced above. This Change of Ownership required a split of the original claim resulting in renumbering this claim, using a new water right number to represent each split. The new Notice of Claim to a Water Right number for your portion is referenced above and a copy is enclosed.

Your portion of this claim has a specified point of diversion, nature of use and place of use. If you plan on changing the nature of use, place of use, or point of diversion under this right, including adding a new point of diversion, then an Application for Transfer on your portion of this right is required. Please contact this office for further information on the Application for Transfer form. If you do not plan on changing any items on your claim, then no further action is required at this time.

Please note that the enclosed Notice of Claim to a Water Right is not a determination of your water right. This claim represents a split of the claim filed by a previous owner during claims taking in the Snake River Basin Adjudication (SRBA) and has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Please feel free to contact this office if you have any questions concerning your claim or this letter.

Sincerely,

Adjudication Section

Dear People:

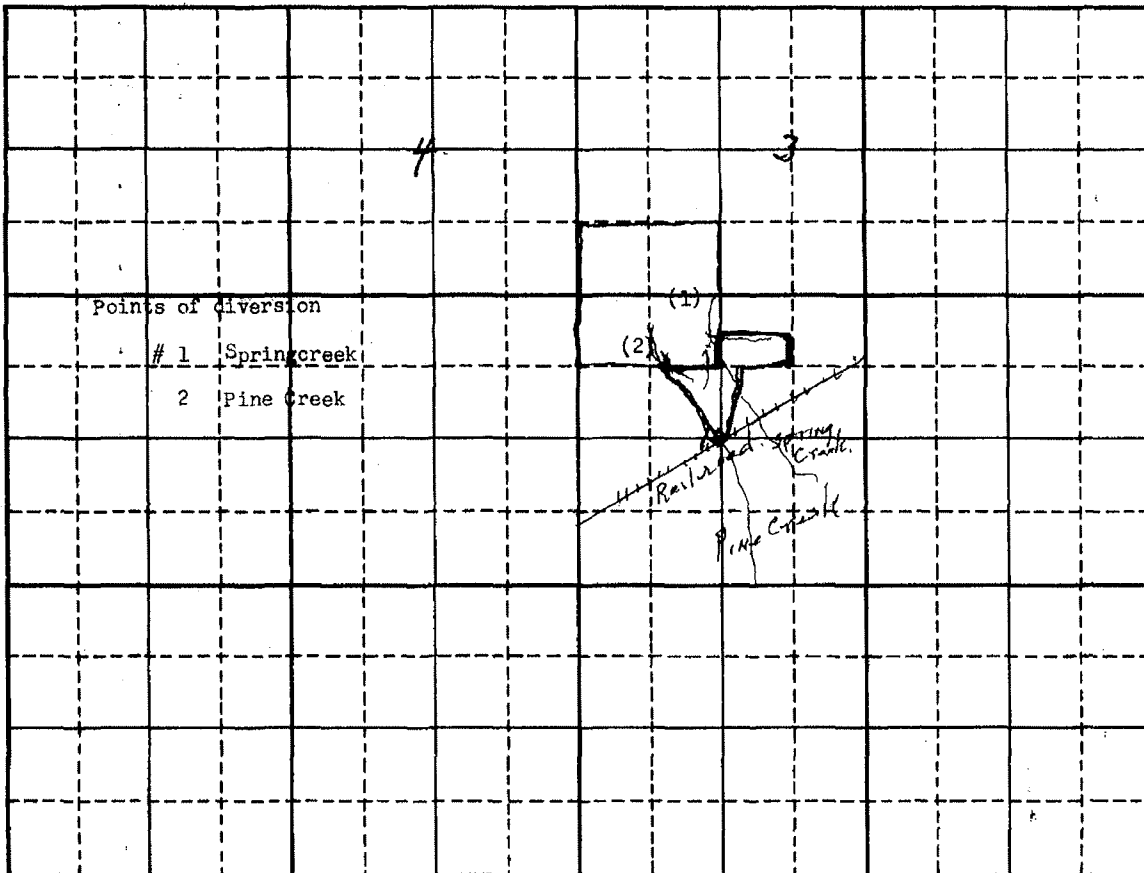

NOTICE OF CHANGE OF WATER RIGHT OWNERSHIP forms are returned herein with the additional information requested. They include a USDA Farm Service aerial photo and a County Assessors maps of the property highlighted in yellow, with the points of diversion clearly marked.

It is my understanding that the original acreage for water rights was for 44 acres, and in 1996 10 acres of that was sold to Kim Brawn and approximately 4 was sold to Lyne Nida. We have purchased the remaining 31 acres and have full title to it. It is my understanding that no application was made for transfer of any of the water rights to the other portions of the property and time would have expired to do so. I assume that the full water right would remain with our 31 acres.

Very truly yours,

George A Carver
