Mr Gardiner

Regarding the house at 1176 Scoville Road. It was built way before 1947 there was no inside plumbing nor electricity. I can't remember when electricity arrived in this area.

It was occupied by my Grandfather from about 1936 - 1945 and my brother after he returned from WWII in 1945

As for AIDS - was incorrect some marital connection since I was number 5 of 7 kids in this family I guess I must opt for MS of anything.
