RE: P/U for claim A36-7048

The delivery system has 65 risers for the campsites however 34 of those risers are designed to service two parking lots.

He feels that the current system is likely the same system as described in the field exam for licensing purposes. I concur.

Other uses includes his home & shop.

Analysis:

I am recommending this claim as "found" per the above discussion and the following calculations are also based upon the same information.

I am persuaded that the existing system is the same as the licensed system but that the current description "better" describes this right. No change in the system is recognized. but the claim has been restated from commercial use only to, domestic, commercial and irrigation. Code C04 is recommended to identify the change in use.

MICROFILMED

FEB 03 1993

CALCULATIONS

Calculations are based upon Dept standards found in Appendix III of the field examiners handbook.

The camp sites uses are compared to the "Parks" segment of uses of

A) Trailers with indiv bath units, no sewer conn = 25 gal/day

B) Trailers with indiv bath units connected to sewer = 50 gal/day

Diversion Rate Calculations

Irrigation use = 4 acres @ 0.02 cfs/acre = 0.08 CFS

Commercial use = 14 sites, use ^A above - $14 \times 50 = 700 \text{ gal/day}$

= 102 site use ^B above - $102 \times 25 = 2550 \text{ gal/day}$

total 3250 gal/day.

Based upon a 2 hr period peak use:

$\frac{3250 \text{ gal/day}}{2 \text{ hrs} \times 60 \text{ min/hr} \times 448.8 \text{ gal/cfs}} = \underline{0.06 \text{ CFS}}$

Domestic use (1 Home) = 0.04 CFS

Volume Calculations:

Irrigation = 4 acres @ 4 = 16 AFA

@ 3 = 12 AFA

Commercial = $\frac{3250 \times 365 \text{ days}}{325,851} = 3.64 \text{ AFA}$

Domestic = N/A.

Phone conversation with Robert Tanner.

Per Mr. Tanner, he purchased the campground in 1989 and he has made no changes to the system. The previous owner has owned the property since 1981 and, to Mr. Tanner's knowledge, he made no changes to the system.

A portion of the ^{delivery} system is designed for one hookup site providing service to two campsites. He stated that there are still just the original 5 mainlines leaving the well house. There are still approximately 65 hookup sites but they are set up to service the 116 campsites.

(NOTE: there may have been ~~no~~ expansion to the P/U, rather a redefining of the use)
