2. E56 The rights listed below are limited to the irrigation of a combined total of 285.0 acres in a single irrigation season. Combined Right Nos.:67-662, 67-673, 67-2063, and 67-14575.

Remarks:Comments:

1. csaxton 4/27/2006 POU

Comment: The acreage recommended in the SESE of section 3 does not show up clearly as irrigated ground on any of the aerial photographs I have found. However, the affidavit provided for evidence of priority speaks of irrigation in the SESE of section 3. And, the field examiner verified that water could and did continue on through a ditch and irrigate the ground in the SESE. The ditch is small and old but is usable. The ditch basically carries any extra water not used on the main field and irrigates the ground in section 3. Since this field is not really a primary field, that could be why it does not show up in the aerial photography. Recommend the ground in SESE of section 3 as irrigated ground under the beneficial use right 67-14575

2. csaxton 4/27/2006 PPU

Comment: This right recommended as PPU with 67-662, 67-673, 67-2063, and 67-14575 per claimant request during a meeting with him on 5-9-05. In addition, the field examiner determined that the water rights are used as a permissible place of use in the filed. All rights are diverted from the same POD and through the same irrigation system.

3. csaxton 4/27/2006 Copied From Claim

Comment: Claim filed for 1 inch per acre on 120 acres not covered by any other rights. 0.365 cfs applied for 60.5 acres to bring acreage covered by 67-00673 up to a full inch per acre.

4. csaxton 4/27/2006 Diversion Rate

Comment: Diversion rate recommended to bring this right and other PPU rights up to 1 inch per acre when used in combination.

Subject: Historic Water Use

To Whom it may concern

This will attest that, we, the undersigned, owned and operated the T & D ranch, now owned by Jerome and Jill Grandi, from fall of 1969 to fall of 1990. During that time, we irrigated with natural flow adjudicated and non-adjudicated water from Crane Creek, when available, the following parcels of land lying in Township 11N, Range 4W.

Section 3	SE1/4 of the SE1/4	Approximately 35 acres
Section 10	NE1/4 of the NE1/4	Approximately 20 acres
	SE1/4 of the NE1/4	Approximately 10 acres
	NE1/4 of the SE1/4	Approximately 10 acres
Section 11	NW1/4 of the NW1/4	Approximately 10 acres
	SW1/4 of the NW1/4	Approximately 40 acres
	NE1/4 of the NW1/4	Approximately 2 acres
	SE1/4 of the NW1/4	Approximately 30 acres

Remarks:Comments:

1. csaxton 4/27/2006 POU

Comment: The acreage recommended in the SESE of section 3 does not show up clearly as irrigated ground on any of the aerial photographs I have found. However, the affidavit provided for evidence of priority speaks of irrigation in the SESE of section 3. And, the field examiner verified that water could and did continue on through a ditch and irrigate the ground in the SESE. The ditch is small and old but is usable. The ditch basically carries any extra water not used on the main field and irrigates the ground in section 3. Since this field is not really a primary field, that could be why it does not show up in the aerial photography. Recommend the ground in SESE of section 3 as irrigated ground under the beneficial use right 67-14575

2. csaxton 4/27/2006 PPU

Comment: This right recommended as PPU with 67-662, 67-673, 67-2063, and 67-14575 per claimant request during a meeting with him on 5-9-05. In addition, the field examiner determined that the water rights are used as a permissible place of use in the filed. All rights are diverted from the same POD and through the same irrigation system.

3. csaxton 4/27/2006 Copied From Claim

Comment: Claim filed for 1 inch per acre on 120 acres not covered by any other rights. 0.365 cfs applied for 60.5 acres to bring acreage covered by 67-00673 up to a full inch per acre.

4. csaxton 4/27/2006 Diversion Rate

Mr. Grandi is irrigating the northern acres.
 Pictures of contour ditches are attached.
 This area is not heavily irrigated, but there are plans to improve the system.
 There is a ditch at the top of (eastern side) of the acreage and the Grandis use tarps to direct the water across the land & into contour ditches. It seems like he is using water unused in improved ditches here - whatever is left over.
 MVB 4-20-06

These photos are taken of the northernmost Grandi fields where imagery does not necessarily support irrigation. The contour ditches can be seen in the upper picture. The main ditch, which is tarped and runs along the east and northern portions of this acreage, can be seen meandering through the lower picture from just below the mountains on the right to the middle of the picture at the bottom.

Re: Field exam for SRBA claims 67-673, 67-662, 67-2063, and 67-14575

I met with the claimant Jerome Grandi on 5-9-05. We discussed his SRBA claims and filed claim 67-14575. So the claimed POU for 67-14575 was data entered by me upon guidance from the claimant.

67-673, 67-662, 67-2063:

There really isn't much to do with these on the field exam other than verify the delivery system as described below.

67-14575 (b-use):

Field Exam:

- verify POD
- verify historical POU. In my office, Mr. Grandi claimed historical irrigation of property in the SESE of Section 3. The evidence of priority also mentions irrigation in that QQ. However, I can not see good historical evidence of irrigation of that ground. The following sources did not show solid signs of irrigation in that QQ:

1987 NAPP

1998 DOQQ

2004 SID

In order to recommend that as irrigated ground as being irrigated with a historical water right (before May 20, 1971) we will need evidence of historical use and evidence that the water can get to that ground currently.

- We need a system description. Confirm that this water is to be recommended as a PPU with the claimant. In order to recommend a PPU, it has to be a common system meaning any of the water can get to any of the POU. I am pretty sure it can from our conversation.
- We don't need a measurement unless you find there is significantly more acreage than I initially found (shown on the layouts enclosed). I found 245 acres and we

have delivery records of 242 inches. So the system has capacity to deliver one inch per acre at the acreage initially found.

If the claimant had any measurement records, we would take that. And if there is a weir get a picture of that with dimensions. If the claimant is running sprinklers, count sprinkler heads.

IF this is not a PPU, make sure we know what ground is irrigated with what water right.

Subject: Evidence of Priority for new claim 67-14575

Hey Jerome,

Just wanted to drop you a line and remind you that I am still waiting on evidence of priority supporting 4-1-1971 for the flood water claim. Old number was 67-4469 but when we filed the new claim it is now 67-14575. We need that evidence of priority ASAP.

Thanks,

Meeting with Jerome Grandi (208) 549-1619 to file an SRBA claim on 67-4469 and possibly on Permit 67-07374.

About 600 inches of water can flow through that ditch.

67-07374 - Weiser River - What is going on with this. It is a permit in Mr. Grandi's name that proof has been submitted in 1988, but the department hasn't gone out and looked at it. If he wants to keep this right, he will have to file and SRBA claim.

Jerome has three SRBA claims in his name;

DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that R. J. TALLENT AND/OR IRENE TALLENT

(Name of Claimant)

Rt. 2, Box 48, Weiser, ID 83672
