MEMORANDUM

Date: October 26, 2005

To: File

From: Craig L. Saxton

Re: Research for TR 3234

TR 3234 added a POD following rights and re-defined the acres.

67-385B

67-386

67-404

67-405

67-4244

The important thing with this transfer is that it did not make a permissible place of use out of all of the rights. 67-385B and 67-386 are treated as a PPU. 67-404 and 67-405 are treated as a PPU. But Statutory claim 67-4244 remains separate and does not overlap any of the ground covered by the decreed rights. What this means is that claim 67-4244 stands alone despite being included in TR 3234, and therefore requires evidence of priority for the entire POU claimed under TR 3234.

As of this date, sufficient EOP has not been provided. EOP provided supports only decreed water rights. Further research can be done regarding ditches mentioned in the backfile for 67-4244, however, if no further information is found, then claimant will have to provide additional evidence.

Another possibility of EOP could be in the establishment of Hornet Creek Water Users Association.
