To Whom It May Concern:

There are eleven stockwater filings enclosed in this packet. The Claimant on all the filings is Hagenbarth Land Idaho LP and the person completing the filing is James F. Hagenbarth, who is president of the filing entity. Hagenbarth Land Idaho LP is also the BLM lessee of the BLM grazing lands where the sources of water are being put to beneficial use as stockwater. A Chain of Title is provided that follows ownership from the pertinent lease that establishes the priority claimed through subsequent leases establishing an ownership link from the original lessee to the current lessee and ownership and transfer of the base property involved. Nine of the claims are for surface water used as stockwater from small springs or streams and all have the same priority of July 1, 1944 based on the earliest grazing permit that could be found in the claimant's or local BLM office's records. Since the Chain of Title for lessees, leases and base property is lengthy and burdensome, the Idaho Department of Water Resource consultant recommended that I only include said documents in the first of the nine similar claims and reference the other eight to the first claim. 31-12490 is the claim which has the Chain of Title and other pertinent ownership documents included that is reference by the other eight claims (31-12491, 12492, 12493, 12494, 12495, 12504, 12505 and 31-12506). The Remarks on these claims clearly makes these references. The other two stockwater claims are for stockwater claimed from groundwater using wells. These two rights have different priority dates based on when the wells were drilled and consequently have slightly abbreviated chains of title depending upon the lessee of record. There are remarks explaining these wells attached to these two ground water claims (31-12488 and 31- 12489). According to instructions I have included a \$100 dollar check with the original filings sent to the District Court.

Sincerely,

James F. Hagenbarth
