Dear Claimant(s):

In the past you submitted the claim(s) identified with the number(s) shown above your name and address at the top of this letter. You indicated on the claim(s) that the basis for establishing the water right(s) was Beneficial Use, meaning the water right was not previously confirmed by a decree, water right license or permit before you filed the claim(s).

The purpose of this letter is to request evidence supporting the priority date(s) you have claimed. The enclosed pamphlet describes what this means. While I encourage you to read all of the pamphlet, I direct your attention to the right-hand half of the pamphlet after you open it. There you will find two sections: What Kind of Evidence is Required, and Some Examples of Documents which May Be Evidence of the Priority Date. These sections tell you what must be submitted. The other sections tell you why the evidence is necessary and what the consequences of not submitting the evidence could be.

Please submit the requested evidence by November 1, 1990. When returning to the Department please reference all documents with the claim(s) identification number(s) listed above.

If you have questions not addressed by the pamphlet or need other technical assistance, please feel free to contact this office. For advice on your water right(s), please contact your attorney.

Sincerely,

Allen Merritt, P.E.
Water Rights Supervisor

RE: Evidence of Priority - Snake River Basin Adjudication
Claim #A36-10547

Dear Claimant(s):

Our records indicate that your claim(s) listed above, is based upon either a "Statutory Claim" or "Beneficial Use" of the water. For water rights of this type, the claimed "Priority Date" must be substantiated with supporting evidence. We previously requested this supporting evidence be submitted by November 1, 1990, and to date we have not received the requested documentation.

Before the Department can make a recommendation to the Court to decree the claim(s), some evidence of the priority date must be submitted. Again we are enclosing a brochure outlining the types of evidence you may submit, and a printout of your claim(s) for reference. We request that you submit your evidence of priority as soon as possible. **If we do not receive the requested documentation, your claim(s) will be recommended for disallowal due to lack of evidence supporting any priority date.**

Please submit the required evidence supporting the priority date(s) by April 23, 1991. Please reference the claim number on your correspondence. If you have questions or need other assistance please contact this office.

Sincerely,

for. Anna Baumhoff

Sorry it took a bit to get to this –I should have given you a heads up I was involved in something else.... Anyway here is my view.

The priority date was recommended from the evidence he submitted from the ASCS office saying the extra acres were farmed since 1980. That said, 10547 is subordinated to 1994 since it is an enlargement. Even if he appeals to the court to change the date it STILL would be subordinated to 1994. A difference without a distinction. Administration/curtailment would still be based on 1994. If the cutoff date for curtailment is, between 1984 and 1994, then 10547 would be cut but 36-8200 (1983 priority) would still be good. In the end I “think” he could relinquish 10547 and be in a stable position with 8200 – but clearer minds might need to confirm that conclusion. By cc I have alerted Cindy Yenter, perhaps she can weigh in.

Thanks,

Doug

Subject: 36-10547, William Kearley

Doug,

I met with Mr. Kearley yesterday regarding 36-10547. The quick story is he owns property that has a base 1956 groundwater irrigation right (36-2295) for 140 acres in the north ½ of the SW ¼ and the south ½ of the NW ¼ Section 14 T8S R14E. I guess historically an additional 17 acres were put into production in the SWNW in the early 70's. Resulting of these additional 17 acres, enlargement claim 36-10547 was filed and was decreed (also a new permit was filed, 36-8200 for these same 17 acres, and it was licensed).

Ultimately we have the base right for 2.8 cfs and 140 acres within 154, the enlargement right for 17 acres, 36-8200 for the same 17 acres, all limited to 2.8 cfs and 154 acres together.

Apparently 36-10547 was decreed with a 1980 priority. Mr. Kearley believes this is in error. He explained he submitted information to support the early 70's priority when the claim was filed. The only thing relative I could find on the water right end of it was in the 36-8200 backfile, a memorandum from Tim Luke (attached) that appears to give some validity to the early priority. Do you guys have anything in the claim file over there to further support the earlier priority?

Mr. Kearley asked about the possibility of the court taking a look at the decree – I gave NO promises but told him I would pose the question.

Right A36-02295: I am submitting a letter from Ben Neff of Farmore Irrigation in Jerome stating that a Valley Corner System watering 155 acres requires a water flow of 2.8 CFS. Pump data shows a 30 HP lift pump with water at 65 ft. and a 60 HP booster pump produces 1250 GPM. The calculations cutting my water right done by Jim Stanton of IDWR were figured on a standard pivot irrigating 119 acres, not a corner system such as mine irrigating 155 acres. I am protesting his calculations since my system uses more water than he figured and I have a license for 2.8 CFS dated 1956. ← Before Sprinklers

In my original right from 1956 the SWNW only had 20 acres licensed out of the 40. Your records show I am farming 39 acres of the 40, therefore, the acres on right 36-10547 should be the 19 acres not originally licensed. If 2.8 CFS is divided by 154 acres you get .018 CFS per acre. The 19 acres would then have a right of .345 CFS rather than the .2 CFS in your records.

Thanks for your consideration. I would be happy to explain any of the above information.

Dear Bill,

With regard to our conversation about water applications and pivots- I thought it best to confirm to you my thoughts and experience in this letter.

Most generally you will file a water application to divert ground water for crop irrigation at a rate of one miners inch per acre. One miners inch is 9 gallons per minute.

In your case, on 160 acres that would be 160 inches or 1440 gallons per minute or equal to 3.2 cubic feet per second/c.f.s.

In most cases I have never found a water right of one inch per acre necessary to irrigate crops in southern Idaho. The rates that are necessary will normally range from 7 gallons per acre to 8 gallons per acre. The higher rate being used on sandy soils, which yours is.

Your swing arm pivot covers approximately 155 acres of your deeded 160 acres. With an application rate of 8 gallons per acre on 155 acres you will be required to pump 1240 gallons per minute or 2.8 c.f.s. to satisfy the system and crop requirement.

Hopefully this will be of help to you.

Sincerely yours,

Ben Neff

Notice of Error - A36-02295, A36-10547, A36-10549

Dear Mr. Kearley:

We are in receipt of the Notices of Error on the above referenced claims. We have removed the parcel number from the recommendation on A36-10549; we are not making any changes to the other recommendations at this time.

The rate of diversion of 2.22 cfs is based on information and calculations in our records. You may provide information to support a higher system capacity of 2.8 cfs. This information may be pump curves, measurements, or other evidence. If no further evidence is provided or the evidence is not supportive, this claim will remain as proposed in the Director's Report.

The rate of diversion recommended on A36-10547 is based on the proportional per acre rate. The 14 acres are an expansion of the above referenced license. The total 154 irrigated acres, divided by the diversion rate of 2.22 cfs equals 0.0144 cfs per acre. If supportive evidence described above is submitted, this diversion rate will also be reviewed. The 14 acres were determined to be the actual acres irrigated; you may provide evidence that additional acres are irrigated and we will review the recommendation.

Any evidence submitted must be received by October 20, 1992, to enable IDWR to review the evidence prior to finalizing the Director's Report.

If you still do not agree with the proposed IDWR recommendation to the court, you may file an objection with the

TEAR AT PERFORATIONS AND COMPLETE FORM ON OTHER SIDE

(Instead of filling in items 3 and 4 below you may include a copy of your proposed recommendation with the changes marked on the copy.)

3. Describe the portion of proposed recommendation with which you disagree:

total quantity
acres irrigated

4. Describe the changes you wish to have made in the proposed recommendation:

Change 0.20 CFS to 0.40 CFS
Change 14 acres to 20 acres.

5. Describe why you disagree with the proposed recommendation:

I originally declared 0.4 CFS. I drew out
it to 0.20 CFS. There was 20 acres left out
of 160. I applied to use license 36-02295 of 2.8 CFS
water which is irrigated by one circular pivot
