From: Alex Dagleish

Re: Claim 87-11718 Priority

---

### Priority Date:

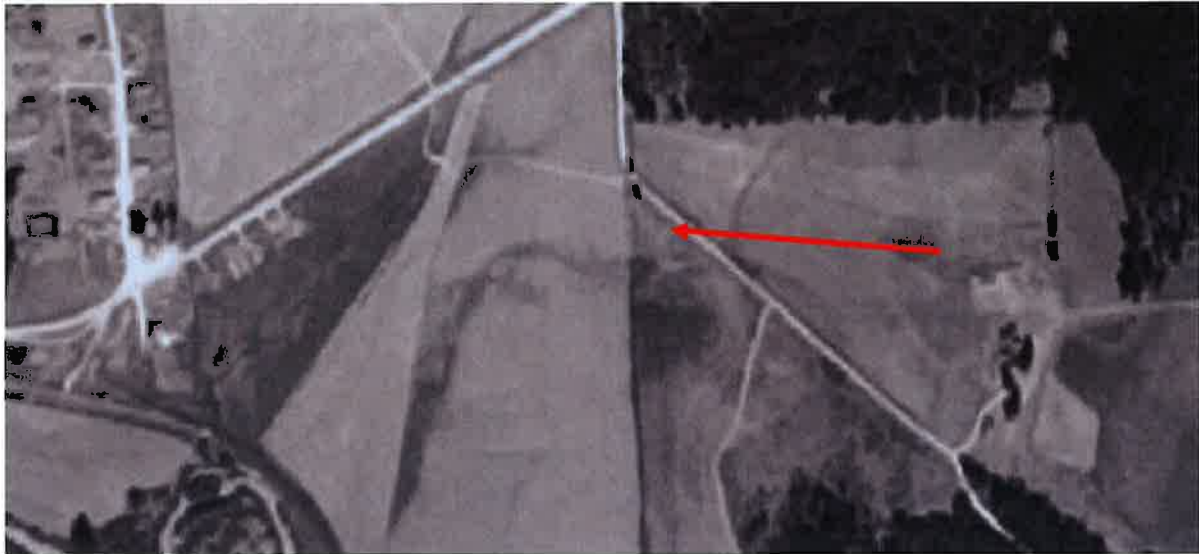

Claim 87-11718 was filed by Robert Morgan for domestic use from groundwater SE of Harvard, ID. The claimed priority date is 1/1/1969 and there was no supporting documentation included or statements on the claim to help affirm the priority.

Furthermore, Department records do not contain any well driller's reports for the property and Latah county parcel data sources do not list a build or construction date for the parcel. Below is a series of historical aerial images to help support the claimed priority date in 1975, which will be recommended.

For reference, the image below is an aerial image from 2004 derived from Google Earth. This image clearly shows domestic structure(s) at the claimed place of use.

The image below is a historic aerial image from 1954 derived from Earth Explorer. This image does not seem to show domestic structure(s) at the claimed place of use.

The next image below is from 1975 and was derived from Earth Explorer. 1975 was the next available year for historical aerial imagery after 1954. While the image from 1975 doesn't clearly show structures, it does tend to show some sort of probably development that has occurred at the claimed place of use. The photo is zoomed in over 600% from its original version onto the claimed place of use and as a result, depicting structures has its limitations. I believe the property shows development and therefore, will recommend the priority of 1/1/1969.
