

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO,
IN AND FOR THE COUNTY OF TWIN FALLS

IN RE THE GENERAL ADJUDICATION
OF RIGHTS TO THE USE OF WATER FROM
THE SNAKE RIVER BASIN WATER SYSTEM.

CIVIL CASE NUMBER: 39576

Ident. Number: A36-11124
Date Received: 3/03/1989
Receipt No: 5006452
Received By: AD

NOTICE OF CLAIM TO A WATER RIGHT
ACQUIRED UNDER STATE LAW

1. Name: PAUL ROBERTSON 208-532-4172
Address: RT. 2 BOX 2572
PAUL, ID 83347

2. Date of Priority: MAY 01, 1972

3. Source: GROUNDWATER Trib. to:

4. Point of Diversion:

Township	Range	Section	1/4 of	1/4 of	1/4 of	Lot	County
06S	21E	29	SW	SW	NW		LINCOLN
			SE	SE	SW		LINCOLN
		30	SE	SW	SW	11	LINCOLN

5. Description of diverting works:
THREE WELLS & PUMPS DELIVERING TO COMMON MAINLINE SYSTEM

6. Water is used for the following purposes:

Purpose	From	To	C.F.S.	(or)	A.F.A.
IRRIGATION	03/15	11/15	0.720		

7. Total Quantity Appropriated is:
0.720 C.F.S. (and/or) A.F.A.

8. Total consumptive use is 108.0 Acre Feet Per Annum.

9. Non-irrigation uses:
NONE

10. Place of Use:

Township	Range	Section	1/4 of	1/4 of	Lot	Use	Acres
06S	21E	29	NW	SW		IRR	3.0

Dear Claimant(s):

In the past you submitted the claim(s) identified with the number(s) shown above your name and address at the top of this letter. You indicated on the claim(s) that the basis for establishing the water right(s) was Beneficial Use, meaning the water right was not previously confirmed by a decree, water right license or permit before you filed the claim(s).

The purpose of this letter is to request evidence supporting the priority date(s) you have claimed. The enclosed pamphlet describes what this means. While I encourage you to read all of the pamphlet, I direct your attention to the right-hand half of the pamphlet after you open it. There you will find two sections: What Kind of Evidence is Required, and Some Examples of Documents which May Be Evidence of the Priority Date. These sections tell you what must be submitted. The other sections tell you why the evidence is necessary and what the consequences of not submitting the evidence could be.

Please submit the requested evidence by November 1, 1990. When returning to the Department please reference all documents with the claim(s) identification number(s) listed above.

If you have questions not addressed by the pamphlet or need other technical assistance, please feel free to contact this office. For advice on your water right(s), please contact your attorney.

Sincerely,

Allen Merritt, P.E.
Water Rights Supervisor

RE: Evidence of Priority - Snake River Basin Adjudication
Claim #A36-11124

Dear Claimant(s):

Our records indicate that your claim(s) listed above, is based upon either a "Statutory Claim" or "Beneficial Use" of the water. For water rights of this type, the claimed "Priority Date" must be substantiated with supporting evidence. We previously requested this supporting evidence be submitted by November 1, 1990, and to date we have not received the requested documentation.

Before the Department can make a recommendation to the Court to decree the claim(s), some evidence of the priority date must be submitted. Again we are enclosing a brochure outlining the types of evidence you may submit, and a printout of your claim(s) for reference. We request that you submit your evidence of priority as soon as possible. **If we do not receive the requested documentation, your claim(s) will be recommended for disallowal due to lack of evidence supporting any priority date.**

Please submit the required evidence supporting the priority date(s) by April 23, 1991. Please reference the claim number on your correspondence. If you have questions or need other assistance please contact this office.

Sincerely,

Anna Baumhert
for Allen Merritt, P.E.
Adjudication Section Supv.

Re: Water Right No. 36-11124

Gentlemen:

Paul Robertson has requested that I forward to you the enclosed Affidavit from W. H. Shillington concerning the expansion of certain water rights while they owned the farm prior to September 15, 1973. If you need any further documentation on this matter, please let me know.

Very truly yours,

GOODMAN & DUFF

AFFIDAVIT IN SUPPORT OF Department of Water Resources
WATER RIGHT NO. A 36-11124 Southern Region Office

STATE OF IDAHO)

County of Minidoka)

) ss.
)

W. H. SHILLINGTON, being first duly sworn on oath,
deposes and says:

1. That Morgan & Shillington Farm Company was the owner of the farm, subject of the majority of the above Water Right until September 15, 1973, when it was sold to L. A. Gillette and Virgil Neilson. A copy of the Deed conveying said property is attached hereto as Exhibit "A".

2. That I was familiar with the irrigation of the above property and irrigation system that existed prior to September 15, 1973. That this property and other property owned by Morgan & Shillington Farm Company was acquired over several years prior to 1972. As we acquired the land it was our policy to clean up the land and to make use of as much of the land as possible thus increasing the number of farmable acres.

3. According to my records and recollection this property had been developed by various owners including Clarence Hiddleston, Phillip Bare and R. Tom Church and Walt Asson. The well in Section 29 was developed prior to 1965. The last well developed for Section 30 was drilled by R. J. Strasser Drilling Company in 1965. We expanded the number of acres irrigated by these wells prior to the farming year of 1972.

4. To the best of my knowledge all of the land, subject of the expanded use was in use in 1972 and 1973, except for the land in Lots 9 and 11 in Section 30. I cannot state what the use was in 1972 nor how it compares to current use because it was not owned by Morgan & Shillington Farm Company. I have no knowledge of the acres farmed nor how the water was applied in 1972 or prior thereto.

W. H. Shillington

Total number of acres irrigated: ****								1140

CONDITIONS OF APPROVAL AND REMARKS

1. The right holder shall measure and annually report diversions of water and/or other pertinent hydrologic and system information as required by Section 42-701, Idaho Code.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
3. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
4. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
5. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
6. Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
7. The total instantaneous diversion of water from all points of diversion under Transfer 4312 shall not exceed 19.10 cfs, nor a total combined annual volume of 4560.0 af.
- **** 8. Right 36-04058A is limited to the irrigation of 62.0 acres in the place of use described above in a single irrigation season.
- **** 9. Right 36-07690A is limited to the irrigation of 112.0 acres in the place of use described above in a single irrigation season.
- **** 10. Right 36-07056 is limited to the irrigation of 435.0 acres in the place of use described above in a single irrigation season.

TRANSFER NO. 4312
WATER RIGHT NO(S). 36-04058A/36-07690A/36-07056
36-11124/36-15363

CONDITIONS OF APPROVAL AND REMARKS

- **** 11. Right 36-11124 is limited to the irrigation of 979.0 acres in the place of use described above in a single irrigation season.
- **** 12. Right 36-15363 is limited to the irrigation of 518.0 acres in the place of use described above in a single irrigation season.
- * 13. Rights 36-07056, 36-11124 and 36-15363 when combined shall not exceed a total diversion rate of 16.57 cfs, a total annual diversion volume of 3916.0 af at the field headgate and the irrigation of 979.0 acres.
- ****
- *** 14. Rights 36-04058A, 36-07056, 36-07690A, 36-11124 and 36-15363 when combined shall not exceed a total diversion rate of 19.10 cfs, a total annual diversion volume of 4560.0 af at the field headgate and the irrigation of 1140.0 acres.
- ****
- **** 15. The right holder shall cease irrigation of 13.0 acres previously authorized under these rights, and consolidate use of water on the remaining 1140.0 acres.
- ** 16. The portion of Right 36-07690A in the amount of 0.41 cfs shall be considered abandoned through approval of Transfer 4312.
17. Right 36-11124 is subordinate to all water rights with a priority date earlier than April 12, 1994, that are not decreed as enlargements pursuant to Section 42-1426, Idaho Code. As between water rights decreed as enlargements pursuant to Section 42-1426, Idaho Code, the earlier priority right is the superior right.
18. Right 36-11124 is based upon an enlargement of Rights 36-07056 and 36-15363 pursuant to Section 42-1426, Idaho Code.

Dated this 13th day of November, 1998.

Chief, Water Allocation Bureau

MEMORANDUM

TO: FILES 36-04058A, 36-07056, 36-07690A, 36-11124 &
36-15363 (Combined Rts.36-02406/2407 & Part 2423)

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER 4312

DATE: January 29, 1998

Transfer 4312 adds points of diversion and combines/changes the place of use under Rights 36-04058A, 36-07056, 36-07690A, 36-11124 & 36-15363 (Combined Rts.36-02406/2407 & Part 2423). The applicant is combining these rights into a single permissible place of use system using three existing points of diversion.

The transfer approval was processed on the rights as currently recommended by SRBA reformatted records, while the application identified the original water rights records and numbers, resulting in different right numbers appearing on the transfer approval.

These five (5) rights include an unencumbered water right (36-04058A), three (3) combined rights (36-07056/11124/15363), and a right (36-07690A) with a point of diversion overlap with rights under a separate owner and system. In order to separate Right 36-7690A from the p/d overlap rights, a reduction of 0.41 cfs was made. The effect on the entire system is negligible with the rate per acre remaining at 0.016 cfs per acre within a piped sprinkler system.

36-07690A	Combined Rights	Percent	Capacity Limit	Transfer Portion
2.24 cfs	/ 11.99 cfs	= 0.18682	x 9.82 cfs	= 1.83 cfs

2.24 cfs - 1.83 cfs = 0.41 cfs abandoned thru transfer.

The p/d overlap condition on the non-transferred rights (36-07446/7690B/15379) should be modified to reflect the transfer, reducing the combined total to 7.99 cfs. (9.82 cfs - 1.83 cfs = 7.99 cfs)

Recommended conditions include measuring & annual reporting, irrigation overlap, multiple points of diversion/measuring devices, permissible place of use, combined limits, consolidate use on reduced acres, abandoned portion, expansion right conditions and standard transfer conditions.

to the Use of Water From the Snake River
Basin Water System.

Case No. 39576

STANDARD FORM 3

The State of Idaho, ex rel. R. Keith
Higginson in his official capacity as
Director of the Idaho Department
of Water Resources,

STANDARD FORM FOR NOTICE
OF CHANGE IN ADDRESS

OR

Petitioner,

CONSENT TO SUBSTITUTION OF
PARTY

vs.

The United States; the State of Idaho; and
all Claimants to the Use of Water From
the Snake River Basin Water System,

Respondents.

*all records modified
2-22-95. -ss*

INSTRUCTIONS FOR USE

This form must be used to provide notice of change in address or to substitute a party whose water right recommendation is in a director's report which has been filed with the court. The filing of Standard Form 3 cannot result in a contested matter. A hearing will not be scheduled.

This form has been adopted by the court in *SRBA Administrative Order 1* (amended June 21, 1993), Section 4A, which may be consulted for further information.

Standard Form 3 shall not operate to excuse compliance with the statutory requirements of I.C. § 42-1409(7) where a water right recommendation is not before the court.

As used in this form, the term "prior claimant/seller" means any person who, pursuant to I.C. § 42-1409(2), (3) and (6), filed a notice of claim asserting the right to the use of water or on whose behalf the right to the use of water was asserted. "New claimant/purchaser" means any successor in interest of a "prior claimant/seller," whether the interest is acquired by purchase, gift, inheritance or other means.

A *Consent to Substitution of Party (Substitution)* must be signed by the prior claimant/seller and the new claimant/purchaser. The *Substitution* shall be filed by the new claimant/purchaser.

Check either the *Change in Address* or *Consent to Substitution of Party* box and fill in the requested information. A party may copy or reproduce the standard form. The text of the form must be on the front and back of each page, exactly as it appears here.

Follow the instructions on the form or the court will not accept it for filing. The Verification and the Certificate of Mailing must be completed.

The standard form may be obtained from the Idaho Department of Water Resources and the court. You must provide a copy of this form to each party, or to their legal counsel, in any subcase in which you are a party.

☐ CHANGE IN ADDRESS

My name is Paul Robertson

I am the claimant of 36-07690A 36-04058A 36-07056
(Insert each water right number) 36-11124 36-15363

I have filed an objection/response to the following water right(s) _____

(Insert each water right number)

My new mailing address is Rt. 1 Box 1589
Paul Ed 83347

My phone number is: Work 678-0248-1344 Home 438-5959

Recommended Right Nos. 36-07690A, 36-07056, 36-15363,
36-11124 and 36-04058A

Dear Mr. Robertson,

You recently filed a Notice of Error with IDWR concerning the water rights referenced above. No change to our recommendation has been made at this time.

During the Notice of Error procedure, we hope to find and correct errors in our recommendations of your rights. Although you had indicated a desire to meet with our personnel, no appointment was made. We are now at the end of the Notice of Error procedure and without specific information about your concerns we can not make any changes.

Please contact this office if you have other questions or concerns.

Sincerely,

Roxanne McCarthy

REMARKS:

- Idaho Power Company Irrigation Audit Report acknowledges that the three claimed wells are interconnected.
- The claimant stated on 4-20-92 that the wells in S.29 were connected in 1980, but the well in lot 11 of S.30 was not connected until after the commencement date. Therefore, only two points of diversion can be recommended.
- The well at 6S, 21E, S29 SWNW appears on the USGS orthophoto to be on the line between the SWSWNW and SESWNW.

IRRIGATION SYSTEM ANALYSIS OBJECTIVES

THE OBJECTIVE OF THIS IRRIGATION SYSTEM ANALYSIS WAS TO DETERMINE AND EVALUATE THE POTENTIAL ENERGY SAVINGS OF THE EXISTING IRRIGATION SYSTEM AS WAS GUIDELINED BY THE IDAHO POWER STATEMENT OF WORK.

IRRIGATION SYSTEM COMPONENTS THAT WERE EVALUATED ARE AS FOLLOW:

- ⊙ MAINLINE SIZES AND FRICTION.
- ⊙ VALVE AND FITTING'S SIZES AND FRICTION.
- ⊙ SPRINKLER OPERATING PRESSURE.
- ⊙ PUMP AND MOTOR EFFICIENCIES.
- ⊙ PUMP FLOW RATE.

ONE OR ALL OF THE ABOVE MEASURES CAN BE CHANGED TO REDUCE THE TOTAL HORSEPOWER OF THE PUMP AND THUS THE ENERGY REQUIREMENT OF THE IRRIGATION SYSTEM.

IRRIGATION AUDIT REPORT

Paul Robertson
Rt. 2 Box 2572
Paul, ID 83347

DATE :October 08, 1990
AUDIT# :IP47-90

Dear Mr. Robertson:

Enclosed please find the results of the Irrigation System Analysis which was conducted during the summer of 1990. The purpose of this audit is to determine the Potential energy savings of your irrigation system, as guidelined by the Idaho Power Company. I hope you will take the time to review this report, and that it will be helpful in reducing your irrigation costs.

RESULTS OF ENERGY SAVINGS

From our detail analysis of the 500 horsepower pump it was determined that due to the existing proper sprinkler pressure, the right size mainlines and high pump and motor efficiency no further energy could economically be saved at this time.

The sprinkler pressure were measured at different locations in the fields, and are generally over 40 psi. This is an acceptable sprinkler pressure, and are doing a fairly good job of irrigating.

We have also checked all the mainlines and the fittings around the pump and found them to be properly designed. Since this system is tied to other irrigation systems, there are not much can be done to improve it any further.

PUMP EFFICIENCY TEST

The pump test was conducted using an accurate ultrasonic flow meter to measure the flow rate of the pump. Electrical readings consisting of voltage, amperage, power factor, and kilowatt (electrical horsepower) on all three legs were made using electrical measurement instrumentation.

MICROFILMED
FEB 07 1993

During our test the pump was discharging 2205 gallons per minute from a depth of 485 feet, with 52 psi of pressure and it was drawing 515.8 horsepower. It achieved an overall efficiency (combined efficiency of pump and motor) of 66.4%, which is rated as "GOOD" efficiency. All electrical readings were found to be very balanced. We believe that this pump will achieve an even better efficiency, when more is pumping a little more gallonage.

For more detailed information, please refer to the enclosed pump efficiency field sheet. For protection and prolonging the life of the motor, we recommend that you provide a simple shade. The shade should not be elaborate, and as a matter of fact, the simpler it is the more effective it will be. Also please make sure to cover all the holes in the electric panel.

COST SHARING PROGRAM

This Irrigation System Analysis, is sponsored by Idaho Power Company, and will normally pay up to 50% of the cost of the irrigation energy conservation program (i.e. pump efficiency, etc). Since this report indicates that no cost effective energy savings could be achieved for this irrigation system, no cost sharing program will be available at this time.

If you have further questions concerning this report please feel free to contact Mr. Rex Winn of Idaho Power, or myself.

Sincerely,

Fred Ziari

PUMPING PLANT EFFICIENCY

THE OVERALL PUMPING PLANT EFFICIENCY IS THE RATIO OF WATER HORSE-POWER (output) TO THE ELECTRICAL HORSEPOWER (input). IT IS THE COMBINED EFFICIENCY OF PUMP AND MOTOR.

EXAMPLE: A 100 HORSEPOWER MOTOR IS RATED AS 90% EFFICIENT AND THE PUMP IS RATED AS 80% EFFICIENT, SO THE OVERALL EFFICIENCY IS $90\% \times 80\% = 72\%$.

OVERALL EFFICIENCY RATING TABLE

MOTOR SIZE (HP)	LOW	FAIR	GOOD	EXCELLENT
7.5-10	44.9% OR LESS	45-52%	53-57.9%	58% OR ABOVE
15-30	47.9% OR LESS	48-55.9%	56-60.9%	61% OR ABOVE
40-60	52.9% OR LESS	53-59.9%	60-64.9%	65% OR ABOVE
75 TO 500	55.9% OR LESS	56-62.9%	63-68.9%	69% OR ABOVE

IRRIGATION AUDIT REPORT

Paul Robertson
Rt 2, Box 2272
Paul, ID 83347

DATE :October 08, 1990
AUDIT# :IP46-90

Dear Mr. Robertson:

Enclosed please find the results of the Irrigation System Analysis which was conducted during the summer of 1990. The purpose of this audit is to determine the Potential energy savings of your irrigation system, as guidelineed by the Idaho Power Company. I hope you will take the time to review this report, and that it will be helpful in reducing your irrigation costs.

RESULTS OF ENERGY SAVINGS

From our analysis of the 400 horsepower pump it was determined that 37,181 and 27,959 kilowatt-hours per year of energy could respectively be saved by converting your pivot to the low pressure nozzles operating at 20 psi, and by replacing the existing 1100 feet of 12 inch old steel pipe (starts from pump) with 14 inch PVC pipe. This savings represents a reduction of 8.0% of your present energy usage or a total annual savings of approximately \$2250.00, based on the past few years of electrical usage.

If these savings seem cost effective for your operation, you may then take the following actions, and need to consult your dealer.

PUMP EFFICIENCY TEST

The pump test was conducted using an accurate ultrasonic flow meter to measure the flow rate. Electrical readings consisting of voltage, amperage, power factor, and kilowatt (electrical horsepower) on all three legs were taken using an electrical measurement instrumentation.

During our test the pump was discharging 2270 gallons per minute, lifting from a depth of 397

MICROFILMED
FEB 07 1993

feet, with 70 psi of discharge pressure and it was drawing 422.5 horsepower. It achieved an overall efficiency (combined efficiency of pump and motor) of 76.5%, which is rated as "EXCELLENT" efficiency. There was a very slight sign of current imbalance. Please make sure all the connections are tightened.

For more detailed information, please refer to the enclosed pump efficiency field sheet. We have noticed evidences of mice in the panel, which might damage the motor insulation. Please make sure to cover all the holes in the electric panel.

PUMP MODIFICATION

Installation of a low pressure system or a mainline by itself will not result in any energy savings, unless pumps are modified to use less horsepower and therefore less energy. Normally pumps are modified to output less pressure at the discharge.

The method of pump modification is fairly simple and can be done by an experienced pump shop. After you have install the low pressure nozzles, and replaced the mainlines, we estimate you will have 42 feet of extra pressure available. I recommend that you pull the pump and have them by either trimming the impellers or by dropping bowls, reduce the total dynamic head-TDH, by about 42 feet. If everything stay the same, your pump should then draw approximately 30 less horsepower.

If for the past 5 years you have not done so, you should first megger the motor and if found to be low, you may then have the motor dipped and baked to restore it to the original efficiency.

I suggest that you consult your pump dealer on the details of the modification, before taking any action.

LOW PRESSURE NOZZLES

We recommend that you install low pressure nozzles on the drop tubes. There are two types of low pressure nozzles available in the market today. The first type, which is the most popular, is the "Spray Head", and is recommended for an operating pressure ranging from 10 to 20 psi. The spray heads can be installed either on the top of the pivot or preferably on a drop tube closer to the crop, so to minimize the effect of wind drift and evaporation losses. Also in the heavier soils, new spray nozzles such as Rotator or Wobbler can be used to reduce the runoff problem.

The second type is the "Diffuser" nozzle, which replaces the existing round nozzles on the impact sprinklers. It has an operating pressure ranging from 30 to 35 psi. Since the diameter of throw is wider than the spray head it is mainly recommended for use on heavier soils. Since only the nozzles need to be replaced this method might be less expensive, but you can not use the drop tubes to minimize evaporation losses.

MICROFILMED
FEB 07 1993

NOTE. The calculated savings in this report is based on the spray nozzles on drop tubes, operating at 20 psi.

PRESSURE REGULATORS

We strongly recommend the installation of the pressure regulators on all pivots with large field elevation differences or with multiple pivots operating with the same pump(s). Pressure variation causes poor water application uniformity and results in under or over irrigation of portions of your fields. The pressure regulators which are normally installed at the base of each spray head, will maintain a constant pressure throughout the length of the pivot, regardless of field slope or pump operating pressure.

END GUN

In most cases, when the pumps are modified to operate at a low pressure system, the end pressure will be too low for the end gun to operate properly. There are several solution to this problem:

- completely remove the end gun
- install a small booster pump (1 to 2 hp) at the end tower to boost the pressure for the end gun. This might be more expensive especially on the smaller pivots.
- install the new Diffuser type end gun, which will operate properly at much lower pressure.

I recommend that you consult your irrigation dealer for selection of a proper end gun. (see Appendix A)

COST SHARING PROGRAM

To receive financial incentives, you need to notify Idaho Power Company for approval, before proceeding with the recommendations in this report (i.e. low pressure nozzles ,pump efficiency improvement, etc.).

After all measures have been installed you should contact and bring all receipts to Mr. Rex Winn at Idaho Power. Idaho Power will pay up to 50% of the actual cost of modifications recommended in this report, not to exceed \$10,000 per system (see page 6 of the report). To establish the actual energy saving, we need to retest the pump after all the measures have been installed.

We encourage you to take advantage of this opportunity, and if you have further questions

PUMPING PLANT EFFICIENCY

THE OVERALL PUMPING PLANT EFFICIENCY IS THE RATIO OF WATER HORSE-POWER (output) TO THE ELECTRICAL HORSEPOWER (input). IT IS THE COMBINED EFFICIENCY OF PUMP AND MOTOR.

EXAMPLE: A 100 HORSEPOWER MOTOR IS RATED AS 90% EFFICIENT AND THE PUMP IS RATED AS 80% EFFICIENT, SO THE OVERALL EFFICIENCY IS $90\% \times 80\% = 72\%$.

OVERALL EFFICIENCY RATING TABLE

MOTOR SIZE (HP)	LOW	FAIR	GOOD	EXCELLENT
7.5-10	44.9% OR LESS	45-52%	53-57.9%	58% OR ABOVE
15-30	47.9% OR LESS	48-55.9%	56-60.9%	61% OR ABOVE
40-60	52.9% OR LESS	53-59.9%	60-64.9%	65% OR ABOVE
75 TO 500	55.9% OR LESS	56-62.9%	63-68.9%	69% OR ABOVE

CLAIMANT'S NAME: Paul RobertsonDATE: 4-14-92COUNTY: LincolnEMPLOYEE: S.W. Keen532-4172 = Home678-6248-1344 = mobile

I called Paul Robertson to discuss an opportunity to measure his well in SWSW Sec.30, T6S, R21E. He told me that a couple of years ago Rex Winn of Idaho Power measured all of his wells and did a system analysis. Mr. Robertson agreed to send me that information this week.

Mr. Robertson also indicated that he would call me back to discuss a permissible place of use recommendation.

4-20-92 I called Paul Robertson to thank him for sending the Idaho Power documents and to ask him about the interconnection of his three wells. Mr. Robertson informed me that the two in section 29 have been connected for 12 years (1980) and the third well was hooked ~~up~~ up in 1988 when the land was purchased from Mr. Blincoe. The third well purchased from Mr. Blincoe corresponds to 36-04058.

Mr. Robertson also indicated that permissible place of use recommendations are acceptable to him.
