Gentlemen:

Our records show you have filed your adjudication claim(s) in the Snake River Basin Adjudication. Our records do not, however, include a clear map of your service area. Would it be possible for us to get a map of your customer service area for your municipal water system, both to supplement the record of your claim(s) and for use as described below?

In our review and investigation phase of the Snake River Basin Adjudication, the map would be helpful for us to have this information in verifying individual claims to water rights for domestic purposes. We will be happy to discuss with you the most convenient way for you to provide this information to us. I can be reached at 327-7931 or you may contact my assistant, Anita Warntjes at 327-7986.

Your assistance in this matter is greatly appreciated.

Sincerely,

DAVID B. SHAW

Adjudication Bureau Chief

Dear Claimant(s):

In the past you submitted the claim(s) identified with the number(s) shown above your name and address at the top of this letter. You indicated on the claim(s) that the basis for establishing the water right(s) was Beneficial Use, meaning the water right was not previously confirmed by a decree, water right license or permit before you filed the claim(s).

The purpose of this letter is to request evidence supporting the priority date(s) you have claimed. The enclosed pamphlet describes what this means. While I encourage you to read all of the pamphlet, I direct your attention to the right-hand half of the pamphlet after you open it. There you will find two sections: What Kind of Evidence is Required, and Some Examples of Documents which May Be Evidence of the Priority Date. These sections tell you what must be submitted. The other sections tell you why the evidence is necessary and what the consequences of not submitting the evidence could be.

Please submit the requested evidence by November 1, 1990. When returning to the Department please reference all documents with the claim(s) identification number(s) listed above.

If you have questions not addressed by the pamphlet or need other technical assistance, please feel free to contact this office. For advice on your water right(s), please contact your attorney.

Sincerely,

Allen Merritt, P.E.
Water Rights Supervisor

REPORT OF WATER SUPPLY

Year 1978
Place City of Wendell County Gooding Census Population 1492
Ownership City of Wendell
Supply used by Residents and General Public
Population served 1492

FIELD SURVEY DATA

DESCRIPTION OF SUPPLY: Give a brief description of the source and the main features of treatment, pumping equipment, storage available, adequacy of system, distribution or direct pumping, supervision of additions and extensions from a public health viewpoint, adequacy of pressures, separation between sewers and water mains, laboratory and related controls of quality. If supply is untreated or chlorinated only, describe protection against entrance of contamination. Attach additional sheets if necessary.

The water supply and distribution system for the City of Wendell serves approximately 1492 (700 connections). The water distribution system (Exhibit I) consists of lines ranging in size from 1½-inch diameter to 10-inch diameter galvanized iron, cast iron, or asbestos cement.

Presently, three wells supply water to the system.

Well #1 has been removed from the water distribution system.

Well #2, drilled to a depth of 350 feet, was constructed during the 1920's and produces 300 gpm. The well is used primarily for supply of city irrigation water via laterals from the pump discharge. The oil-lubricated pump is powered by a 30HP electric motor. Eight-inch diameter casing extends approximately six inches above the concrete pumphouse floor.

Well #3, drilled in 1951 to a depth of nearly 300 feet, is presently one of the main sources of water supply for the municipal system. Well #3, encased with 12-inch and 16-inch diameter casing, is served by a 60HP electric motor that produces nearly 600 gpm. The pump is oil lubricated.

Well #4, constructed in 1969, is 261 feet deep and is encased with 16-inch diameter casing. The pump is water lubricated and served by a 75HP electric motor producing 1400 gpm. (cont.)

PUBLIC HEALTH DEFECTS: Describe briefly the sanitary defects such as by-passes, cross connections, emergency intakes to unsafe supplies, inadequate protection against sources of pollution, inadequacy of treatment, defective structural features, possibility of flooding, deficient operating practices, inadequate sanitary control of additions or extensions to system, lack of proper plumbing regulations and enforcement, inadequate control of water in distribution system. Attach additional sheets if necessary.

1. Undersized and/or deteriorated water distribution system.
2. Inadequate ventilation of water storage reservoir.

Engineer Basil Tupy Date of investigation May 31, 1978

REPORT OF WATER SUPPLY

Year 1951

Place Wendell County Gooding Census Population _____

Ownership Municipal Les Lawton, Mayor George Lancaster W.O.
Mrs. L. M. Comstock, Clerk

Supply used by Public

Population served 1150

FIELD SURVEY DATA

DESCRIPTION OF SUPPLY: Give a brief description of the source and the main features of treatment, pumping equipment, storage available, adequacy of system, distribution or direct pumping, supervision of additions and extensions from a public health viewpoint, adequacy of pressures, separation between sewers and water mains, laboratory and related controls of quality. If supply is untreated or chlorinated only, describe protection against entrance of contamination. Attach additional sheets if necessary.

Source of water is from two drilled wells, one being 360 feet deep with an 8 inch casing and the other 365 feet deep with a 10 inch casing. Pumps are deep well turbines of 90 and 150 g.p.m. capacity. An elevated steel tank of 75,000 gallon capacity rides on the system. Distribution system consists of steel, cast iron and cement asbestos pipe. One well is chlorinated. A new well located in the east edge of town was recently completed. The well is 303 feet in depth and cased with 12 inch casing to a depth of 160 feet. Drilled hole was 20 inches in diameter and is grouted between the casing and the hole for an unknown depth. This well is equipped with a Layne Bowler 8 inch turbine pump powered by a 60 H.P. electric motor. Pump house and pump setup is excellent.

PUBLIC HEALTH DEFECTS: Describe briefly the sanitary defects such as by-passes, cross connections, emergency intakes to unsafe supplies, inadequate protection against sources of pollution, inadequacy of treatment, defective structural features, possibility of flooding, deficient operating practices, inadequate sanitary control of additions or extensions to system, lack of proper plumbing regulations and enforcement, inadequate control of water in distribution system. Attach additional sheets if necessary.

Two old wells are located in pits.

Sewer or drain wells are used in the area.

Only one of the old wells are chlorinated.

RE: Response to Notice of Error in Snake River Basin
Adjudication for Rights: 36-11276 & 36-11277

Dear Claimants:

We have received the Notices of Error you submitted on your claims in Basin 36. This letter is in response to those notices.

The priority date for water right 36-11276 was recommended as 4/27/51. The claimed priority date, 1/1/50, was not recommended because no evidence was submitted to support that date. The earliest evidence verifying the well's existence was an Idaho Department of Public Health report, dated 4/27/51.

Water right 36-11277 was given a priority date of 12/31/29. The priority date claimed, 1/1/20, was not supported with the evidence submitted. A water supply report from the Idaho Department of Environmental and Community Services dated 5/31/78 explains that this well was "constructed during the 1920s". Since no specific date was mentioned in the report, the final day of that time period, 12/31/29, was recommended.

You may provide to IDWR evidence which supports the claimed priority dates. This evidence must be received by October 16, 1992. If no further evidence is submitted, our recommendations will remain unchanged. If you have any further questions, please contact our office.

Sincerely,

Marci Sterling
Engineering Specialist (EIT)

ARE THERE OBVIOUS REASONS TO QUESTION THE PRIORITY DATE CLAIMED? (Y/☒ NO)
IF YES EXPLAIN

REMARKS: All evidence supplied confirms a priority of sometime in the 1920s, however there is no basis for early or mid-twenties. Therefore, recommended priority date is 12/31/29 to be conservative. Discussed with Mr. Strickland and Wendell Mayor at time of field exam; they chose not to supply any additional evidence.

RECOMMENDED PRIORITY DATE:

12-31-1929

RECOMMEND TO ME STANDARDS OR OTHER?

Y(☐) N(☐) Explain in remarks, below.

REMARKS:

Based on evidence and materials provided (ID Dept. Public Health; city well inventory records) estimate of flow rate is 300 gpm.

Residents use Northside Canal water which is circulated through open ditches; however, municipal is also used by some residents. Mr. Stickland mentioned that some sprinkler systems have been installed.

WELL NO. 2

Location : Block 48, east of the elevated water tank,
Northwest part of city.

Depth : Total - 350 feet, Standing WL - 150 feet.

Diameter : 8 inch I.D.

Pump : Vertical Turbine, 30 H.P., 3 ϕ , 60 Hz, 440 v
F.L. speed 1,456 rpm, 9 stages.

Flow Rate : Rates at 300 gpm at TDH of 270 feet (See
attached pump curves)

Chlorinator: None

Age : Well drilled in conjunction with the construction of
the elevated tank, time period estimated to be 1920.
Existing 30 H.P. pump installed in 1959 by C.B.
Eaton Pump, Wendell.

Remarks : No well log or test pumping records located, pump
presently used primarily for supply of city irrigation
water via open ditches from the pump discharge.
