IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-169F

NAME AND ADDRESS: UNITED WATER IDAHO INC
8248 W VICTORY RD
PO BOX 190420
BOISE ID 83719-0420

SOURCE: BOISE RIVER

TRIBUTARY: SNAKE RIVER

QUANTITY: 0.810 CFS
199.000 AFY

This right shall receive 100 percent of its decreed quantity until the natural flow of the waters of the Boise River shall decrease so that all rights containing this condition cannot receive 100 percent of their decreed quantities, at which time this right and the other rights containing this condition shall first be cut to 75 percent of their decreed quantities, as the natural flow of the river decreases, beginning with the latest rights containing this condition and proceeding to the earliest rights containing this condition in the order of their priority dates, and after all of the rights containing this condition shall have been reduced to 75 percent of their decreed quantities, should the natural flow of the waters of the river decrease below the amount necessary to supply 75 percent of those decreed quantities, then this right and the other rights containing this condition, beginning with the latest and proceeding to the earliest, shall be reduced to 60 percent of their decreed quantities.

PRIORITY DATE: 06/01/1868

POINT OF DIVERSION:

T03N R02E S14 SENE Lot 7 Within ADA County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
MUNICIPAL	03/01 11/15	0.810 CFS 199.00 AFY

Diversion for irrigation under this water right prior to April 1 and after October 31 shall occur only as authorized by the Water District 63 Water Master and only when water is being released for flood control by the United States from the Lucky Peak Dam outlet under procedures and requirements for the Memorandum of Agreement between the U.S. Department of the Army and the U.S. Department of the Interior for Flood Control Operations of the Boise River Reservoirs, dated November 20, 1953, the Water Control Manual for Boise River Reservoirs dated April 1985 and any future amendments or revisions made thereto pursuant to state or federal procedures or law; provided that any such use of this water right prior to April 1 and after October 31 shall be subordinated to water rights for storage in Lucky Peak Reservoir, Lake Lowell, Arrowrock Reservoir, and/or Anderson Ranch Reservoir, as decreed in SRBA Case No. 39576.

PLACE OF USE:

Place of use is within the service area of United Water Idaho as provided for under Idaho law. The place of use is generally described as within the city limits of Boise and the surrounding service area.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

10/10/2006

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

This right is also designated as Right No. 36 in the Boise River Stewart Decree and Boise River Water Distribution Report.

AMENDED* TRANSFER NO. 4232 *AMENDED
WATER RIGHT NO(S). 63-00165L/63-00169F/63-00243E/63-00243H

CONDITIONS/REMARKS:

5. Prior to diversion and use of water under Transfer No. 4232, a totalizing flow measuring device and lockable controlling works acceptable to the Department shall be permanently installed and maintained as part of the diverting works. EXP
6. Construction of diversion works is subject to the application of best management practices in accordance with standards utilized in the State of Idaho Stream Protection Program. Specific requirements include the following: EXP
- a. Turbid water pumped from the construction site shall not be returned directly to the stream (Alternatives are: settling pond, sump hole, irrigation ditch, etc.). Any discharge to a natural waterway shall be in compliance with Idaho Water Quality Standards and Wastewater Treatment Requirements and EPS NPDES permit requirements.
 - b. Fuel, oil, and other hazardous materials shall be stored, and equipment refueled, away from the stream to ensure that a spill cannot enter the stream channel.
 - c. All construction activities shall be conducted in such a manner as to minimize turbidity and other water quality impacts.
 - d. Any structure(s) placed within the stream channel of the Boise River shall be constructed in such a manner as to allow float boat traffic to pass over or around the structure(s) except at very low flows. The IDWR and the Idaho Department of Fish and Game will evaluate the structure(s) as constructed.
 - e. Stream bank vegetation shall be protected to the extent practicable during construction. Care shall be taken to select locations for ingress and egress from the stream that will minimize bank and riparian vegetation damage. Disturbed and eroded areas shall be revegetated with perennial shrubs, grasses, and forbs as recommended by Idaho Department of Fish and Game and/or the local office of the Soil Conservation Service, to reduce erosion, restore bank cover and habitat and inhibit the invasion of noxious weeds.
 - f. All temporary cofferdams shall be constructed of either jersey barriers, sandbags, sheet pilings, or other materials reviewed and approved by this Department prior to construction of the cofferdams.
7. Place of use is located within the city limits of Boise and the surrounding service area. ✓ Already in
8. Four points of diversion are located within Lot 7, SENE, S14, R00 T03N, R02E.
9. Transfer No. 4232 adds a point of diversion identified as the Warm Springs Water Treatment Plant River Intake to the three existing points of diversion known as Ranney collector diversions. EXP

PART 1

NOV 29

**WATER
WESTERN**

WATER
WESTERN
Name of applicant Boise Water Corporation Phone (208) 362-1704

Post Office address P.O. Box 7488, Boise, ID 83707

A. PURPOSE OF TRANSFER

1. ☒ Change point of diversion ☐ Add diversion point(s) ☐ Change place of use
☐ Change nature of use ☐ Change period of use ☐ Other _____
2. Describe the reason for the proposed changes Applicant owns certain water rights to operate its
three existing Ranney collectors near the Boise River. Applicant wishes to add an
additional alternative point of diversion for three of these water rights to enable the
diversion of water as well as from a new river intake structure which will be operated in
conjunction with the Ranney collectors.

B. DESCRIPTION OF RIGHT(S) OR PORTION THEREOF, AFTER THE REQUESTED CHANGE

1. Right Number	Priority	Amount (cfs/ac-ft)	Nature of Use	Period of Use	
63-0169F	June 1, 1868	0.814 cfs	Municipal	Mar. 15	to Nov. 15*
63-00165L	June 1, 1866	0.68 cfs	Municipal	Mar. 15	to Nov. 15
63-00243C	May 1, 1889	3.300 cfs	Municipal	Mar. 15	to Nov. 15*
63-00243H	May 1, 1889	0.93 cfs	Municipal	Mar. 15	to Nov. 15*

2. Total amount of water being transferred 5.724 cubic feet per second and/or 1,220 acre-feet per annum.

3. Source of water Boise River tributary to Snake River

4. Point(s) of Diversion:

[illegible]

5. Lands irrigated or place of use: Current and future service area in and near the City of Boise, Idaho

[illegible]

*Adjusted per Appendix II, IDWR, Idaho Water Law Handbook

Total acres

PART 1**6. General Information:**

- a. Description of diversion system Existing system consists of three Ranney collectors. New federal water quality requirements mandate the construction of a treatment plant for this service. In connection with that treatment plant, applicant intends to construct a raw water intake structure that would divert water directly from the Boise River to 1 used in conjunction with the existing Ranney collectors.
- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? _____ Yes XX No. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:

STAGE: DECREED

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>DIVERSION RATE</u>	<u>ANNUAL VOLUME</u>
MUNICIPAL	03/15 to 11/15	0.93 CFS	172.0 AF
<u>SOURCE</u>	<u>TRIBUTARY OF</u>		
BOISE RIVER	SNAKE RIVER		

Priority: 05/01/1889

LOCATION OF POINT(S) OF DIVERSION: Lot 7(SENE), Sec. 14, Township 03N, Range 02E
ADA County

PLACE OF USE: See Remarks

CONDITIONS/REMARKS:

1. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
2. Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
3. Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
4. Use of water under this water right will be regulated by the watermaster of State Water District No. 63.
5. The amount of water transferred to the Ranney collectors is 172 afa, diverted at a rate not in excess of 0.93 cfs with a priority of 5/1/1889.
6. Place of use is within the city limits of Boise.

ATTACHMENT A

**Boise Water Corporation
Application for Transfer of Water Rights
Filed: September 20, 1993**

On September 8, 1993, Boise Water Corporation (the "Applicant") filed with the Department of Water Resources (the "Department") two separate applications: (1) an application for transfer of three water rights and (2) an application for permit to appropriate. Based on subsequent conversations with David R. Tuthill of the Department, the Applicant is withdrawing its September 8, 1993 water right transfer application, and substituting the attached application for the transfer of four water rights. No changes (other than notations made by the Department) are being made to the Applicant's September 8, 1993 permit application which seeks a 1993 water right to allow the Applicant to utilize surface flows when water is available in the river in excess of demand by senior diverters.

The Applicant has operated a system of three Ranney collector infiltration systems ("Ranney collectors") at the Marden Street site along the north side of the Boise River since their installation in the 1950s. The Marden Street Ranney collectors operate under a License and Certificate of Water Right for groundwater issued on June 17, 1957 for 15.00 cfs with a priority date of February 7, 1952 (water right number 63-2892, originally number G-22594).

On October 30, 1981, BWC filed a transfer application, No. 2605, seeking to add an additional point of diversion known as the Veterans Ranney collector. The purpose of the transfer was "to increase distribution system efficiency due to changing daily and seasonal demand of customers." On January 5, 1982, the Department granted the application. The transfer added the Veterans facility as an additional point of diversion, but did not change the diversion rate allowed under the Applicant's water right, which remained at 15.00 cfs, total, from all four Ranney collectors. The maximum diversion rate allowed on the Veterans Ranney collector was set at 5.00 cfs.

RECEIVED
FEB 23 1994

Recently adopted federal water quality requirements will soon require the installation of a water treatment plant for water taken from the Marden Street site. The Applicant intends to construct a new treatment plant to be known as the Warm Springs water treatment plant which will use the existing three Marden Street Ranney collectors as well as a new direct river intake ("river intake"). The river intake will be constructed into the north bank of the Boise River at the site of the Marden Street Ranney collectors. It will have a trash rack and slide gate. Applicant has applied to the U.S. Army Corps of Engineers for a Section 404 Permit, and to the Department of Water Resources for a Stream Channel Alteration Permit, in connection with the river intake.

Each of the existing three Marden Street Ranney collectors is equipped with a flow meter. Likewise, the new Warm Springs water treatment plant will be equipped with a flow meter measuring inflows to the plant. By subtracting the quantity of flow measured at each Ranney collector from the quantity of flow measured at the Warm Springs Treatment Plant, it will be possible to determine the quantity of water, if any, being diverted through the river intake.

The 1982 Veterans transfer described above was made subject to certain conditions set out in the Director's Memorandum Decision and Order of January 5, 1982. Among them was a requirement that the Applicant conduct a study of the interconnection between its Ranney collectors and the Boise River. Such a study was conducted and submitted to the Department. At the Department's invitation, the Applicant voluntarily participated in discussions regarding the management of the Ranney collectors. After study and discussion, the Applicant and the Department entered into a formal agreement ("the 1985 agreement") whereby a portion of the water pumped from the Ranney collectors is attributed to surface flow. As a consequence of the 1985 agreement, the Applicant was required to obtain and make available water rights to provide augmentation or mitigation water to offset depletions from the Ranney collectors according to a formula set out in the 1985 agreement. Water to meet this requirement was secured by the Applicant by a October 16, 1986 contract with the U.S. Bureau of Reclamation for the purchase of 1,000 acre-feet of storage space in Anderson Ranch. Water stored under this right is released annually during the irrigation season in an amount determined by the formula specified in the 1985 agreement. The Applicant continues to operate under this arrangement. No change in this 1952 water right, the 1982 transfer, or the 1985 agreement is sought by the transfer application filed today or the September 8, 1993 permit application.

RECEIVED
FEB 23 1994

In addition to the 1952 water right and associated Anderson Ranch storage rights described above, the Applicant has purchased and transferred the following four additional water rights to the Ranney collectors.

First, the Applicant purchased 46½ shares of stock in the Thurman Mill Ditch Company, Ltd. reflecting a partial interest in water right number 63-0169D, which holds a June 1, 1868 priority date. The Applicant transferred the nature of use, place of use, and point of diversion for its interest in this surface water right to the Applicant's Ranney collectors for municipal use in Boise, Idaho. This transfer (No. 3373), creating water right number 63-0169F, was approved by the Department on February 25, 1988, for a maximum flow of 0.814 c.f.s. and a maximum volume of 199 acre-feet per year.

Second, the Applicant purchased 135 shares of stock in the Boise City Canal Company reflecting a partial interest in water right number 63-00165, which holds a June 1, 1866 priority date. The Applicant, through the Boise City Canal Company, transferred the nature of use, place of use, and point of diversion for its interest in this surface water right to the Applicant's Ranney collectors for municipal use in Boise, Idaho. This transfer (No. 3559), creating water right number 63-00165L,¹ was approved by the Department on June 2, 1989, for a maximum flow of 0.68 c.f.s. and a maximum volume of 167 acre-feet per year.

Third, the Applicant purchased 128 shares of stock in the South Boise Mutual Irrigation Company, Ltd. reflecting a partial interest in water right number 63-00243, which holds a May 1, 1889 priority date. The Applicant transferred the nature of use, place of use, and point of diversion for its interest in this surface water right to the Applicant's Ranney collectors for municipal use in Boise, Idaho. This transfer (No. 3756), creating water right number 63-00243C, was approved by the Department on October 15, 1990, for a maximum flow of 3.30 c.f.s. and a maximum volume of 682 acre-feet per year.

Fourth, the Applicant obtained an additional interest in the water rights of the South Boise Mutual Irrigation Company, Ltd. reflecting a partial interest in 63-00243A, which holds a May 1, 1989 priority date. The Applicant, through the South Boise Mutual Irrigation Company, Ltd., transferred the nature of use, place of use, and point of diversion for its interest in this surface water right to the Applicant's Ranney collectors for municipal use in Boise, Idaho. This transfer (No.

¹The application refers to water right number 63-00165L, however the Order Approving Transfer with Conditions refers to original water right number 63-00165J.

RECEIVED
FEB 23 1994

4048), creating water right number 63-00243H, was approved by the Department on February 16, 1993, for a maximum flow of 0.93 c.f.s. and a maximum volume of 172 acre-feet per year.

The purpose of this transfer application is to allow the four above described surface water rights now associated with the Ranney collectors to be diverted, as necessary, from the river intake, to the extent that the Marden Street Ranney collectors are partly or completely unavailable for any physical, regulatory or economic reason. This transfer application does not contemplate or request any expansion, enlargement or other change in the four water rights, except to add the river intake as an alternate point of diversion.
