IDAHO DEPARTMENT OF WATER RESOURCES
RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-2892

NAME AND ADDRESS: UNITED WATER IDAHO INC
8248 W VICTORY RD
PO BOX 190420
BOISE ID 83719-0420

SOURCE: GROUND WATER

TRIBUTARY:

QUANTITY: 15.00 6.18 CFS

The maximum rate of diversion at the point of diversion in T03N, R02E, S05 under this right is limited to 5.00 cfs.

The maximum rate of diversion for ground water from all points of diversion under this right is limited to 15.00 cfs.

PRIORITY DATE: 02/07/1952

POINT OF
DIVERSION:

T03N R02E S5 SENE Within ADA County
T03N R02E S14 SENE Within ADA County

~~The point of diversion for this right and Right Nos. 63 169F, 63 243E, 63 243H, 63 2500, 63 2506, 63 2576, 63 2595, 63 2605, 63 2668, 63 2703, 63 2808, 63 2874, 63 2892, 63 2915, 63 2954, 63 2956, 63 2989, 63 3064, 63 3073, 63 3105, 63 3112, 63 3128, 63 3164, 63 3172, 63 3202, 63 3239, 63 3291, 63 3292, 63 3293, 63 3295, 63 3411, 63 3448, 63 3494, 63 3562, 63 4015, 63 4414, 63 4424, 63 4752, 63 7066, 63 7067, 63 7204, 63 7282, 63 7348, 63 7479, 63 7577, 63 7589, 63 7658, 63 8059, 63 8236, 63 8432, 63 8990, 63 9147, 63 9204, 63 9205, 63 9219, 63 9223, 63 9671, 63 9855, 63 10386, 63 10405, 63 10533, 63 19456, 63 31797, 63 31798, 63 31856, 63 31857, and 63 31879 are also diverted through the forty three (43) points of diversion described in Right No. 10386.~~

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
MUNICIPAL	01/01 12/31	15.00 <u>6.18</u> CFS

PLACE OF USE:

Place of use is within the service area of United Water Idaho as provided for under Idaho law. The place of use is generally described as within the city limits of Boise and the surrounding service area.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

~~To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right at the Marden Collectors Well located in T3N, R2E, Sec. 14, SENE.~~

~~To the extent necessary for administration between points of diversion for ground water, and between points of diversion for ground water and hydraulically connected surface sources, ground water was first diverted under this right at the Veteran Collectors Well located in T3N, R2E, Sec. 5, SENE.~~

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF PROTEST AGAINST APPROVAL OF	)	
APPLICATION FOR TRANSFER NO. 2605 OF LICENSE NO.	)	MEMORANDUM DECISION
63-2892 IN THE NAME OF BOISE WATER CORPORATION	)	AND ORDER
	)	

On October 30, 1981, Boise Water Corporation applied to the Department of Water Resources to add a point of diversion within the SE1/4NE1/4, Sec. 5, Twp. 3N, Rge. 2E B.M., Ada County for water license No. 63-2892.

Notice of this application was published in the Idaho Statesman newspaper, Boise, Idaho on November 5 and 12, 1981. A protest against approval of the application for transfer was received from Harry A. Vogt, secretary of Farmers Union Ditch Co., Ltd. on November 20, 1981.

On December 21, 1981, a conference was held in Boise, Idaho. The applicant was represented by Robert P. Walker and the protestant was represented by Harry A. Vogt, secretary and by Bill M. Flack, boardmember. The issue raised by the protestant which can be considered by the Director is whether the transfer, if approved, would affect the protestant's water right. The issues of expansion of the applicant's water right and local public interest were also discussed at the conference.

Based on the information collected at the conference, the official files and records of the Department of Water Resources and the Director's understanding of the law, the Director of the Department of Water Resources makes the following Findings of Fact, Conclusions of Law, Analysis and Order:

FINDINGS OF FACT

1) The applicant is the owner of license No. 63-2892 for the diversion of 15.00 cubic feet per second of water through Ranney Collector Wells located adjacent to and under the Boise River within the SE1/4NE1/4, Sec. 14, Twp. 3N, Rge. 2E B.M., Ada County.

2) The applicant is seeking to add a point of diversion, also using

MICROFILMED

Ranney Collector Wells adjacent to and under the Boise River, within the SE1/4NE1/4, Sec. 5, Twp. 3N, Rge. 2E B.M., Ada County.

3) The existing point of diversion is upstream from the protestant's point of diversion and the proposed point of diversion is downstream from the protestant's point of diversion.

4) The description of the proposed diverting works and construction procedure given by the applicant does not support the likelihood of physical damage to the protestant's diversion works.

5) The applicant stated it is always physically able to divert the full entitlement at the upper point of diversion.

6) The applicant has proposed to add the requested point of diversion to provide better water service to northwest Boise, an area in which large producing cold water wells have not been successful.

7) The applicant seeks to divert up to 5.00 cubic feet per second from the proposed point of diversion.

CONCLUSIONS OF LAW

1) The addition of the proposed point of diversion by the applicant will not cause injury to other existing water rights.

2) The addition of the proposed point of diversion will not expand or enlarge the applicant's water right.

3) It is in the local public interest to provide northwest Boise with adequate water service for which the applicant seeks the proposed additional point of diversion.

4) The applicant is entitled to add a point of diversion with certain conditions and limitations.

ANALYSIS

The applicant's license shows the source of water as groundwater; however, there is a concern by the protestant and other Boise River water users that the source of water is actually Boise River water. The applicant's existing and proposed diversion works consists of Ranney Collection Wells which, depending on installation, take water from 30 to 60 feet below surface and include horizontal collectors of perforated pipe or screens that project radially from the vertical well. Several of these horizontal members project under the bed of the Boise River.

With the diversion arrangement it is probable the applicant's water diversion will affect the flow of the Boise River; however, it is also probable the total effect on the surface flow of the Boise River will be less than the total diversion by the applicant. At present there are no measurement data or analytical analysis to quantify the extent of interconnection, if one exists, between the Ranney Collector Wells and the Boise River.

While the issue of interconnection of the applicant's diversion works to the Boise River must be resolved, it is not an issue that directly affects the consideration of the application for transfer presently before the Director. Since the applicant is proposing the same method of diversion at the proposed point of diversion as is presently used at the existing points of diversion, the net effect on the Boise River will not change. In particular, the existing diversion is upstream from the protestant's point of diversion and the proposed diversion is downstream; therefore, any effect on the Boise River will result in more water being available in the river at the protestant's point of diversion.

The proposed diversion works and methods of construction described by the applicant should not harm the protestant's diversion works. The applicant will install a vertical caisson on the river bank downstream from the protestant's diversion works. The radial collectors will then be installed from within the caisson by boring horizontally outward and pushing the perforated pipe and/or screens into place. No construction will take place in the bed of the river or on the protestant's diversion works.

The protestant also expressed concern about the applicant's use of their right-of-way and/or easement and a crossing of their canal. While these are valid concerns of the protestant and may represent issues to be resolved between the protestant and applicant, they are not proper issues to be considered by the Director in his examination of the application for transfer presently before him.

The issue of expansion of the applicant's water right was raised at the conference. Expansion will not occur, however, so long as the total diversion rate from all points of diversion does not exceed 15.00 cubic feet per second. The applicant stated it is presently possible to divert 15.00 cubic feet per second from the existing points of diversion at any time of the year. From a water supply standpoint, therefore, there is no advantage to add a downstream point of diversion as this application for transfer requests.

The applicant raised the issue of public interest only to state they felt it was in the local public interest to provide an adequate water supply for northwest Boise. The applicant explained their need for the proposed point of diversion as it relates to their overall distribution system and to northwest Boise in particular.

ORDER

IT IS, THEREFORE, HEREBY ORDERED that the protest be set aside and the Application for Transfer No. 2605 of License No. 63-2892 be APPROVED subject to the following conditions:

1) The maximum rate of diversion of water within the SE1/4NE1/4, Sec. 5, Twp. 2E, B.M. under this water right shall be limited to 5.00 cubic feet per second.

2) The maximum rate of diversion from all points of diversion shall be limited to 15.00 cubic feet per second under this water right.

3) The approval of this transfer in no way grants any right-of-way or easement across the land of another.

4) Until further notice, Boise Water Corporation shall furnish to the Department of Water Resources simultaneous flow measurement records from all points of diversion under this water right. Such measurements to include one set of measurements recorded during the maximum peak demand period for each week during the months of June, July, August and September, and such other measurement records as may reasonably be requested from time to time by the department. All measurement records sought by the department shall be delivered within 15 days of the end of the measurement period (week) or within 15 days of any request by the department.

5) Boise Water Corporation shall commence a study by May 1, 1982 to determine the hydraulic interconnection of their Ranney Collector Wells and the surface flows of the Boise River at the various flow levels of the Boise River. This study shall be developed in cooperation with the department with the results available no later than June 15, 1983. Should Boise Water Corporation choose not to conduct this study, the diversion of water under this water right shall be placed under the control of the watermaster of Water District 63 as a Boise River diversion.

63-2892
63-31797
63-31798

6) The Director of the Department of Water Resources retains jurisdiction over this right for the purpose of determining if the diversion will affect the flow of the Boise River.

Dated this 5th day of January, 1982.

A. KENNETH DUNN

Director

Gary S —

MEMORANDUM

To: Norman C. Young
From: L. Glen Saxton *LS*
RE: MEETING WITH UNITED WATER IDAHO
Date: August 18, 2000

RECEIVED

AUG 21 2000

WATER RESOURCES
WESTERN REGION

On this date, at the request of Karl, I attended a meeting scheduled with Dan Brown and Scott Rhead of United Water Idaho ("UWID"), Karl and Gary Spackman.

The discussion centered on the Ranney Collectors used by UWID at their Marden treatment plant and the relationship of groundwater intercepted by the collectors to water of the Boise River. Until the actual meeting, neither Gary, Karl or I knew of the intended subject matter for the meeting. Hence, no one had previously reviewed the associated water right file.

Rhead described that there was an agreement, which described that 30% of water diverted at the Marden plant would be considered surface water and 70%, would be considered groundwater. Shortly after the meeting started, it became apparent that Rhead was seeking assurance from the department that the obligation of UWID would not be increased beyond the 30% mitigation to the Boise River. The basis for Rhead's concern apparently stemmed from a past discussion with Dave Tuthill who allegedly suggested that UWID perhaps should keep a low profile on use of the Ranney collectors. Reasons for a low profile include potential priority calls for water by earlier rights and that the collectors might be intercepting more than 30% of water attributable to the Boise River. Karl advised that the department would review the water right file and would informally respond to them with a phone call but not a letter.

After the meeting, I reviewed the water right file and determined the following:

- License No. 63-02892 issued in June 1957 authorized the diversion of 15 cfs from three Ranney Collectors. The priority of use is 1952.
- In October 1981, UWID filed Application for Transfer 2605 to add a fourth collector near Veteran's State Park. The application was protested, but on January 5, 1982, the department issued a decision approving the transfer with certain conditions. Condition no. 5 required UWID to conduct a study to determine interconnection of the collectors with the Boise River.

- In lieu of conducting a long study, UWID proposed mitigation to offset any interference with the Boise River. Tagged letters in the file dated May 31, 1985 and August 13, 1985 describe the proposed mitigation and general agreement of UWID and IDWR relative to mitigation. The general plan was to acquire 1000 AF of storage from the USBR and to release the water from storage when storage water is being used by other irrigation water users.
- I did not find any formal agreement in the file or reference in the file to a 30% - 70% split of intercepted water.
- I did note, however, in IDWR's letter dated August 13, 1985 to UWID which generally approves UWID's mitigation plan, language which states "The department does reserve the option to review and recommend changes to the plan after several years of experience has been gained."
- In our meeting with UWID, we also advised that any claim filed by UWID in the SRBA including right 63-02892 could be challenged by any water user.

I do not think the department can or should give any assurances to UWID concerning future mitigation, which might be required to authorize operation of their Ranney collectors.

RE: Ownership of United Water Idaho ("UWID") water rights and
adjudication claims
Our File No. 30-71

Dear Steve and Jan:

I have spoken to both of you recently regarding ownership issues for UWID. As you both know, many water rights and adjudication claims owned by UWID have not been changed to reflect UWID as the owner. I have spoken with several people at the Department seeking direction on how to finalize ownership changes for UWID but have not received any concrete answers. This letter is my attempt to solve the remaining ownership issues.

I am hoping to avoid any additional filings and have therefore included copies of two prior Notice of Change of Ownership forms which I believe provide the necessary supporting information to proceed with the ownership changes. The first form changes ownership to UWID from Boise Water Corp. and includes an attached list which apparently purports to identify all water rights originally held by Boise Water Corp. The second form changes ownership to UWID from South County Water Co. for water right 63-08248 and is an example of the change form filed for each of the fourteen other South County Water Rights.

Most of the water rights originally in the name of Boise Water Corp. have been changed on the allocations side. However, several water rights remain in the name of Boise Water Corp. I have highlighted on the list attached to the change form those water rights that my research indicates have not yet been changed. I have also noted on the list that water right 63-02702 is mistyped and should read 63-02703. Additionally, statutory claim 63-04015 was left off the list. It is certainly possible that this list contains omissions, and rather than trying to specifically identify individual right numbers, I suggest simply running a search on the database and changing all water rights in the name of Barber Water Corp. to UWID.

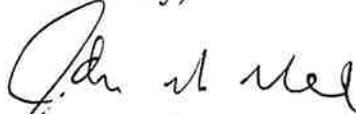

Steve Lester
Jan Shurte
February 8, 2000
Page 2

On the adjudication side, only a handful of claims, those that have been transferred subsequent to the name change, have been changed to UWID's name. I have not been able to determine if this is because the change form does not identify any adjudication claim numbers or because the change form has not yet made it to the adjudication side. In any event, all adjudication claims still in the name of Boise Water Corp. need to be changed to UWID. The documents attached to the change of ownership form showing that Boise Water Corp. simply changed its name with the Secretary of State to UWID should provide the information necessary to process the name change for the adjudication claims. If the original form is deficient for failure to include a list of all water rights with the "A" prefix, then please take this letter as an amendment of the form to include all adjudication claims filed in the name of Boise Water Corp.

The adjudication claims filed by South County Water Co. are in a similar posture. A change of ownership form was filed for each of the fifteen water rights originally owned by South County Water Co. and included a list of all the water rights originally owned by South County. The name for all of these rights has been changed on the allocations side, but the adjudication claims for all of these rights remains in the name of South County. Again, I am not sure if the adjudication claims have not been changed due to the omission of the "A" prefix or for some other reason. The documentation attached to the change form for water right 63-08248 should provide the supporting information to change the name on the adjudication claims. UWID purchased all the stock of South County Water Co. and thereby acquired all the assets of South County including the adjudication claims. Again, if the change of ownership is deficient for failure to include the "A" prefix water right number, please take this letter as an amendment of the form and change all the adjudication claims in the name South County Water Co. to UWID.

Thank you both for your attention to this matter. If you cannot personally make the requested changes, please forward this letter and the attachments on to the appropriate people or let me know if there is any other information you need me to provide.

Sincerely,

John M. Marshall

NOV 18 2003

EXHIBIT A

This is a claim for a water right developed by application of water to a beneficial use beginning in 1895 by the Boise Artesian Hot and Cold Water Co., a predecessor in interest of UWID. At that time the Boise Artesian Hot and Cold Water Co. owned and operated a series of wells and collectors near the site of UWID's existing Marden Water Treatment Plant to supply water for municipal purposes to the City of Boise. From historical documents we know the company had facilities at this site capable of supplying 1,700,000 gallons per day (2.63 cfs) as of 1895 and 2,700,000 gallons per day (4.18 cfs) in 1899.

Excerpts from relevant historical documents are attached. The first is the first ten pages from an engineering report dated October 5, 1904, titled the *Report on Valuation of Boise, Idaho Water Works System* ("Valuation Report"). This excerpt presents an overview of the system owned and operated by the Boise Artesian Hot and Cold Water Co. in 1904. The report indicates the maximum daily water demand for Boise at that time was 3,000,000 gallons per day, 90% (about 2,700,000 gallons per day) of which was produced by the well system at the current Marden site. Valuation Report at 2, 7. The other 10% was supplied from artesian wells in Hulls Gulch. The report goes on to describe the facilities at the Marden site as two wells with pumping engines each capable of producing 1,000,000 gallons per day and two boilers of 85 horse power each. Valuation Report at 3. The wells were connected by an "underground gallery," which apparently produced the additional 700,000 gallons per day. Valuation Report at 6-7.

The second excerpt is selected pages from the *Composition of Unit Field Costs, Boise Artesian Water Company, Historical Valuation of Property as of May 31, 1921*. This excerpt demonstrates one of the pumps and its associated steam boiler were purchased and delivered in 1895. The other set was purchased and delivered in 1899. The report also makes reference to a "rock gallery" at the site of the steam plant, which we assume is the "underground gallery" referenced above. There is no date associated with the rock gallery.

This claim is for 1,700,000 gallons per day, which equates to 2.63 cfs, with a priority date of June 1, 1895. This claim is based on 1,000,000 gallons per day (1.55 cfs) associated with the first pump and steam plant delivered in 1895 and the 700,000 gallons per day (1.08 cfs) associated with the rock gallery, which we assume was in place and producing water prior the installation of the well and pumping plant in 1895. This is a reasonable assumption given the description of demand and water production facilities in the Valuation Report indicating only 300,000 gallons of production came from the Hulls Gulch artesian wells. The additional water had to have been produced at the Marden site.¹ Because the documents do not give a specific date in 1895 when the pump was installed, we selected the midway point in the year, June 1, for the priority date. We have filed a second beneficial use claim, 63-31798 to cover the additional 1,000,000 gallons per day (1.55 cfs) installed in 1899.

Over time UWID replaced these facilities at the Marden site with newer, higher capacity collector wells and obtained an associated licensed water right to recognize the diversion for these improved facilities. This right, number 63-2892, includes a diversion rate of 15.0 cfs and carries a February 7, 1952 priority.² UWID

¹ The Valuation report states that per capita water demand in Boise in 1904 was 375 gallon per day. Valuation Report at 5. The report estimates population in 1890 as 2,311 and 5,957 in 1900. Splitting the difference, population in 1895 was approximately 4000. At per capita demand of 375 gallons per day, system demand in 1895 would have been 1.5 million gallons per day. With only 300,000 coming from the Hulls Gulch facilities, substantial water had to have been produced at the Marden site at this time.

² Right 63-2892 also includes alternate points of diversion at a site downstream on the Boise River known as the "Veterans Collectors." The Veterans Collectors are not related to this claim.

NOV 10 2023

obtained this license for the full capacity of the diversion works even though existing beneficial use rights already covered a portion of the diversions from this site. In this way, United Water obtained a junior license that overlaps with the existing senior beneficial use rights. Accordingly, the recommended diversion rate for right 63-2892 should be reduced by the quantity recommended for claims 63-31797 and 63-31798.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

IN THE MATTER OF PROTEST AGAINST APPROVAL OF)
APPLICATION FOR TRANSFER NO. 2605 OF LICENSE NO.) MEMORANDUM DECISION
63-2892 IN THE NAME OF BOISE WATER CORPORATION)
AND ORDER
_____)

On October 30, 1981, Boise Water Corporation applied to the Department of Water Resources to add a point of diversion within the SE1/4NE1/4, Sec. 5, Twp. 3N, Rge. 2E B.M., Ada County for water license No. 63-2892.

Notice of this application was published in the Idaho Statesman newspaper, Boise, Idaho on November 5 and 12, 1981. A protest against approval of the application for transfer was received from Harry A. Vogt, secretary of Farmers Union Ditch Co., Ltd. on November 20, 1981.

On December 21, 1981, a conference was held in Boise, Idaho. The applicant was represented by Robert P. Walker and the protestant was represented by Harry A. Vogt, secretary and by Bill M. Flack, boardmember. The issue raised by the protestant which can be considered by the Director is whether the transfer, if approved, would affect the protestant's water right. The issues of expansion of the applicant's water right and local public interest were also discussed at the conference.

Based on the information collected at the conference, the official files and records of the Department of Water Resources and the Director's understanding of the law, the Director of the Department of Water Resources makes the following Findings of Fact, Conclusions of Law, Analysis and Order:

FINDINGS OF FACT

1) The applicant is the owner of license No. 63-2892 for the diversion of 15.00 cubic feet per second of water through Ranney Collector Wells located adjacent to and under the Boise River within the SE1/4NE1/4, Sec. 14, Twp. 3N, Rge. 2E B.M., Ada County.

2) The applicant is seeking to add a point of diversion, also using

MICROFILMED

Ranney Collector Wells adjacent to and under the Boise River, within the SE1/4NE1/4, Sec. 5, Twp. 3N, Rge. 2E B.M., Ada County.

3) The existing point of diversion is upstream from the protestant's point of diversion and the proposed point of diversion is downstream from the protestant's point of diversion.

4) The description of the proposed diverting works and construction procedure given by the applicant does not support the likelihood of physical damage to the protestant's diversion works.

5) The applicant stated it is always physically able to divert the full entitlement at the upper point of diversion.

6) The applicant has proposed to add the requested point of diversion to provide better water service to northwest Boise, an area in which large producing cold water wells have not been successful.

7) The applicant seeks to divert up to 5.00 cubic feet per second from the proposed point of diversion.

CONCLUSIONS OF LAW

1) The addition of the proposed point of diversion by the applicant will not cause injury to other existing water rights.

2) The addition of the proposed point of diversion will not expand or enlarge the applicant's water right.

3) It is in the local public interest to provide northwest Boise with adequate water service for which the applicant seeks the proposed additional point of diversion.

4) The applicant is entitled to add a point of diversion with certain conditions and limitations.

ANALYSIS

The applicant's license shows the source of water as groundwater; however, there is a concern by the protestant and other Boise River water users that the source of water is actually Boise River water. The applicant's existing and proposed diversion works consists of Ranney Collection Wells which, depending on installation, take water from 30 to 60 feet below surface and include horizontal collectors of perforated pipe or screens that project radially from the vertical well. Several of these horizontal members project under the bed of the Boise River.

MICROFILMED

With the diversion arrangement it is probable the applicant's water diversion will affect the flow of the Boise River; however, it is also probable the total effect on the surface flow of the Boise River will be less than the total diversion by the applicant. At present there are no measurement data or analytical analysis to quantify the extent of interconnection, if one exists, between the Ranney Collector Wells and the Boise River.

While the issue of interconnection of the applicant's diversion works to the Boise River must be resolved, it is not an issue that directly affects the consideration of the application for transfer presently before the Director. Since the applicant is proposing the same method of diversion at the proposed point of diversion as is presently used at the existing points of diversion, the net effect on the Boise River will not change. In particular, the existing diversion is upstream from the protestant's point of diversion and the proposed diversion is downstream; therefore, any effect on the Boise River will result in more water being available in the river at the protestant's point of diversion.

The proposed diversion works and methods of construction described by the applicant should not harm the protestant's diversion works. The applicant will install a vertical caisson on the river bank downstream from the protestant's diversion works. The radial collectors will then be installed from within the caisson by boring horizontally outward and pushing the perforated pipe and/or screens into place. No construction will take place in the bed of the river or on the protestant's diversion works.

The protestant also expressed concern about the applicant's use of their right-of-way and/or easement and a crossing of their canal. While these are valid concerns of the protestant and may represent issues to be resolved between the protestant and applicant, they are not proper issues to be considered by the Director in his examination of the application for transfer presently before him.

The issue of expansion of the applicant's water right was raised at the conference. Expansion will not occur, however, so long as the total diversion rate from all points of diversion does not exceed 15.00 cubic feet per second. The applicant stated it is presently possible to divert 15.00 cubic feet per second from the existing points of diversion at any time of the year. From a water supply standpoint, therefore, there is no advantage to add a downstream point of diversion as this application for transfer requests.

MICROFILMED

The applicant raised the issue of public interest only to state they felt it was in the local public interest to provide an adequate water supply for northwest Boise. The applicant explained their need for the proposed point of diversion as it relates to their overall distribution system and to northwest Boise in particular.

ORDER

IT IS, THEREFORE, HEREBY ORDERED that the protest be set aside and the Application for Transfer No. 2605 of License No. 63-2892 be APPROVED subject to the following conditions:

- 1) The maximum rate of diversion of water within the SE1/4NE1/4, Sec. 5, Twp. 2E, B.M. under this water right shall be limited to 5.00 cubic feet per second.
- 2) The maximum rate of diversion from all points of diversion shall be limited to 15.00 cubic feet per second under this water right.
- 3) The approval of this transfer in no way grants any right-of-way or easement across the land of another.
- 4) Until further notice, Boise Water Corporation shall furnish to the Department of Water Resources simultaneous flow measurement records from all points of diversion under this water right. Such measurements to include one set of measurements recorded during the maximum peak demand period for each week during the months of June, July, August and September, and such other measurement records as may reasonably be requested from time to time by the department. All measurement records sought by the department shall be delivered within 15 days of the end of the measurement period (week) or within 15 days of any request by the department.

- 5) Boise Water Corporation shall commence a study by May 1, 1982 to determine the hydraulic interconnection of their Ranney Collector Wells and the surface flows of the Boise River at the various flow levels of the Boise River. This study shall be developed in cooperation with the department with the results available no later than June 15, 1983. Should Boise Water Corporation choose not to conduct this study, the diversion of water under this water right shall be placed under the control of the watermaster of Water District 63 as a Boise River diversion.

MICROFILMED

6) The Director of the Department of Water Resources retains jurisdiction over this right for the purpose of determining if the diversion will affect the flow of the Boise River.

Dated this 5th day of January, 1982.

A. KENNETH DUNN

Director

SECRETARY OF STATE

ARTICLES OF AMENDMENT OF ARTICLES OF INCORPORATION
OF
BOISE WATER CORPORATION

Pursuant to the provisions of Section 30-1-61, Idaho Code, the undersigned corporation submits the following Articles of Amendment of Articles of Incorporation:

FIRST: The name of the corporation (hereinafter called the "Corporation") is Boise Water Corporation.

SECOND: The Articles of Incorporation of the Corporation are hereby amended by striking out Article 1 thereof and by substituting in lieu of said Article the following new Article as adopted:

"1. The name of the corporation shall be United Water Idaho Inc."

THIRD: The shareholders of the Corporation entitled to vote adopted the aforesaid amendment on February 24, 1995.

FOURTH: The number of shares of the Corporation which were outstanding at the time of the adoption of the aforesaid amendment is 23,157, of which 15,000 are common stock and 8,157 are preferred stock. The number of said shares which were entitled to vote thereon is 15,000. No shares of preferred stock are entitled to vote.

FIFTH: The number of the aforesaid shares of common stock which were voted for and against the amendment is as follows:

FOR

15,000

AGAINST

0

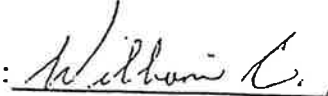

SIXTH: The effective time of the amendment herein certified shall be March 20, 1995.

Dated: March 10, 1995.

ATTEST:

BOISE WATER CORPORATION

ALLAN D. SHAKLEY, Secretary

By: 
WILLIAM C. LINAM, Vice President

IDAHO SECRETARY OF STATE

AUG 18 1992

State of Idaho License and Certificate of Water Right

Water License No. G-22594

Amount 15.0 c.f.s.

Water District No.

Priority February 7, 1952

THIS IS TO CERTIFY that

BOISE WATER CORPORATION

of Boise, Idaho

, made application for a permit to appropriate the

public waters of the State of Idaho, dated February 7, 1952; that Permit No. G-22594

was issued under said application; that Certificate of Completion or works, with a carrying capacity of

15.0 second feet, was issued thereunder on June 17, 1957, showing that said works

were completed on the 15th day of February, 1957; and that on the 12th

day of February, 1957, O. P. Norman, Water Utility Operator

of Boise

, State of Idaho

, made proof to the satisfaction of the

State Reclamation Engineer

of Idaho, of the right to use the waters of wells

located at Boise, Idaho, for the purpose of Municipal Water Supply

(see list of points)

, under the Permit No. G-22594

of the Department of Reclamation

and that said right to the use of said waters has been perfected in accordance with the laws of Idaho,

and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume

10 of Licenses at page 6015 on the 17th day of June, 1957;

The right hereby confirmed dates from February 7, 1952;

The Point of Diversion is located

in the NE 1/4, NE 1/4, Sec. 14, Tp. 3 N., R. 2 E., B. M. Ada County

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 15.0 cubic feet per second.

Description and location of use:

Twp.	Range	Sec.	Forty-acre Tract	No. Acres Described in Permit	No. Acres Actually Irrigated
			MUNICIPAL WATER SUPPLY		

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place of use herein described, as provided by the laws of Idaho.
