RE: Snake River Basin Adjudication (SRBA)
Co-counsel for J. R. Simplot Company

Dear Ms. Pepe:

Our records were modified May 19, 1994, to reflect Terry Uhling and Gray Young as co-counsel for J. R. Simplot Company. Bruce Belzer was removed from the water right claim records on which he appeared as counsel.

Thank you for your assistance. If you have any questions, please contact me.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Sally Sherman'.

RE: Snake River Basin Adjudication
Case No. 39576 and Subcase Nos. 36-13320 & 57-02203A

Dear Mr. Shaff:

In response to your letter of March 24, 1994, please modify your records to reflect that Terry T. Uhling and Gray Young are co-counsel of record in the above referenced matter. Mr. Uhling and Mr. Young are in-house counsel for J. R. Simplot Company, and, therefore, would be apprised of all matters relating to the claims of Simplot and its related company subsidiaries and affiliates as a matter of course. The attached Exhibit A does represent all water rights we are aware of at this time to which the Notice applies.

For your information, I have also enclosed a copy of a letter and attached Notice of Withdrawal from Diana Delaney, Chief Deputy Clerk of the Snake River Basin Adjudication Clerk's Office, which indicates that Bruce Belzer never was recorded as being counsel for J. R. Simplot Company.

If you have any questions, feel free to call me at 389-7201.

Sincerely,

Holly Pepe

RE: Appearance of J. R. Simplot in Subcase Nos. 36-13320 and 57-02203A

Dear Mr. Young and Mr. Uhling:

Enclosed I am returning your *Notice of Withdrawal of Counsel* which was received by the court on April 5, 1994, and which stated that Bruce L. Belzer was withdrawing as counsel for J. R. Simplot Company in the above-referenced subcases.

After a search of the files for the above subcase, I am unable to locate any appearance by Bruce L. Belzer. However, on January 28, 1994, a *Notice and Entry of Appearance* was filed on behalf of J. R. Simplot in these subcases. That notice listed Gray Young and Terry Uhling as counsel for J. R. Simplot.

Sincerely,

A handwritten signature in cursive script that reads "Diana R. Delaney".

Jeff —

I receipted two checks for
Vic Conrad —\$50 for the 2 Bar U, Inc. ^{attached}\$4957⁰⁰ for 19 claims (attached)
1 app/permit ^(sent to) _(screening)He said he would bring the maps
next week.

Also, he did not bring the
list with fees for each
claim. Therefore, the receipt ~~is~~
does not break out the
claims. When he brings
the list back, receipt needs
to be corrected & have all
claims listed w/ fees.

If you'll recall during our March 2, 1995, on-site meeting to examine the stock watering system at our former cattle feeding operation at Norland, I showed you two large holding pens that remain from the original feedlot. We still used these pens in connection with the existing grazing operation. At the time we met it was my understanding that only one of the two pens is used at any one time to contain up to 1,000 head of cattle. Since the water supply for the cattle contained in these pens is from the well identified under 36-13320, I believed this to be an upper limit on the number of head that use water from this well.

After our meeting I was informed by our Ranch Manager, Milton Oman, who is directly responsible for managing the Norland grazing operation, that both pens are used while we are sorting, shipping, weaning, and mothering-up cattle. We contain up to 1,000 head in each of the two pens, therefore the upper limit on the number of head that utilize water from this system is actually 2,000 head.

I think you will agree that the two pens combined have the capacity to contain 2,000 head of beef cattle. As confirmed by our Ranch Foreman, we use both pens in this manner and have for a number of years. I hope my misunderstanding of our use of these pens doesn't delay settlement of this matter. I have been informed by Vic Conrad, Simplot's representative who spoke with you recently about the different number, that you accept 2,000 as the number of beef cattle that use water from this system.

As you recommended to Vic, we will contact the Deputy Attorney General handling this matter, Nicholas B. Spencer, directly. If you have any concerns about the contents of this

I mentioned the area analysis that I completed for the two larger holding pens and then submitted to Nick.

He called back to identify the diversion rate that I recommended. I explained that my recommendation was based upon the phone conversation with Ron Roberstson where he supplied the pump information for my use. I reminded him that I still wanted the documentation from the pump company to support the information supplied by Ron.

NOTES: The system is two buried 2" mainlines tied into 13 stock tanks. The original system had a 30 HP turbine pump and was designed to supply water to the entire feed lot which covered the W 1/2 NE 1/4 and the majority of the NW 1/4 of sec 14. The cattle were being confined on the efam day and ~~as such~~ therefore the majority of the current system was shut off. Water was being supplied to one tank east of the well location for a horse. I was unable to verify, by flow, which tanks were still tied into the system. The buried line ~~path~~ was visible running to the tank in the SE SW of sec 11. I accepted Ron's word for the current system layout.

Stock use is continuous grazing of the ground in Sec 11 by an average of 400 hd (with calves). Additional stock ~~can~~ utilize the system in the pens around the P/D in sec 14 primarily during shipping in the fall but not limited to just fall. Ron indicated that at times the max use would be between 800 & 1000 head.

The claimed rate is considerably greater than the system capacity or the legal limit for the maximum number of stock watered (see below) as the system capacity is the limiting factor that becomes the recommendation.

Stock water use is within the De Minimis definition and therefore no volume limits are recommended.

'UNCLAIMED SYSTEM WITH A P/D IN 06S; 23E; SEC-32 SWSE'

represent photos of an independent stockwatering system consisting of a well with a 20 gpm system design (per Ron Robertson during a phone conversation on 3-3-95) tied into two 30 foot diameter tanks and one 6 foot tank. Ron stated that peak use on this system is approximately 4000 head of range cattle. This is an independent system not tied into any other uses.

RE:

Resp to NOE.NAME OF PARTY: Vic Conrad (Rep for Simplot)

I found stockwater use for this claim during a field exam. The use was not for the feedlot however, the use was in conjunction with an intensive grazing system. The orig well supplies water to a series of stock tanks around the fields where the cattle graze. Numbers not determined during exam.

Claimed priority date not correct. P/A & system was for irr only at that time per a 1958 licensing exam for 36-02208.

As of this date recommendation is disallowed.

II. STATEMENT OF THE RESPONSE

12. ☒ Water Right Recommendation: I respond to the objection concerning:

12b. ☒ This water right not being recommended.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of Objection items 12 and 12b., and all allegations of the objection regarding these items, IDWR responds as follows: IDWR recommended the claim for disallowal because the use of the water described in the claim ceased in 1981. The objection asserts that after 1981 a change occurred in the use of a least a portion of the water claimed for this right. However, a new claim was not filed nor was the original claim amended to describe the use of this water after 1981. IDWR further responds that by identifying in the objection a use of the water that is different from the use described in the notice of claim, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim after a director's report is filed, just as a party must obtain leave of the court to file a late claim after the

director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

CHANGES TO THE DIRECTOR'S REPORT

The director proposes no changes to the description of this claim in the Director's Report.

INSTRUCTIONS

This form must be used to file an objection to any water right recommended in the Director's Report. You may object to one water right per objection form. The water right number you are objecting to must be indicated above in the blank space following "Case No." To object to more than one water right, you must file a separate objection form for each. Forms may be obtained from the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form, as long as it is identical to the court's form. You must file your objection by the deadline shown in the notice that IDWR mailed to you. The objection must be received by the court on or before the deadline specified. Instructions for mailing this objection are found at Page 6, and must be strictly followed.

Any party physically filing 25 (twenty-five) or more objections must make an appointment with the Clerk of the Adjudication Court and arrange for an appointment to file multiple objections.

Attachment 1
Objection to Case No. 36-13320
Reason for Checking Box Number 12

The J. R. Simplot Company objects to the Director's recommendation that the Notice of Claim filed with the Idaho Department of Water Resources in connection with the Snake River Basin Adjudication, with reference no. A36-13320, be disallowed on the basis of "No Beneficial Use Found."

The well developed under the above claim was originally constructed to provide stock water for a feedlot designed to support approximately 25,000 beef cattle. Although documentation to support the date of well construction has not yet been obtained, the feedlot was operational no later than September 8, 1962, evidenced by the attached copy of an aerial photograph obtained from the United States Department of Agriculture (USDA), Agricultural Stabilization and Conservation Service (ASCS), aerial photography division located in Salt Lake City, Utah (See Attachment 2). The well was used continuously to provide stock water for approximately 25,000 beef cattle until 1981.

In 1981, the number of cattle on feed declined. A portion of the original feedlot was opened up to allow cattle to graze on adjoining irrigated pasture. The well was connected, through underground pipelines, to approximately 30 stock watering troughs located on the irrigated pasture. The troughs were constructed out of concrete, steel, and galvanized metal. The troughs are located in the following subdivisions:

Twp. 7S Rng. 23 E.B.M Section 10:
SE $\frac{1}{4}$ SE $\frac{1}{4}$

Twp. 7S Rng. 23 E.B.M Section 11:
SW $\frac{1}{4}$ SE $\frac{1}{4}$, SW $\frac{1}{4}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$

Twp. 7S Rng. 23 E.B.M Section 14:
NW $\frac{1}{4}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NW $\frac{1}{4}$

Twp. 7S Rng. 23 E.B.M Section 15:
NE $\frac{1}{4}$ NE $\frac{1}{4}$

After modifying the feedlot in 1981 to allow cattle to utilize the adjoining irrigated pasture, the number of beef cattle using water from the well declined to approximately 4,000 head. Since 1981, water from the well has been used continuously to provide stock water for 4,000 beef cattle.

MICROFILMED

Attachment 1
Objection to Case No. 36-13320
Reason for Checking Box Number 12

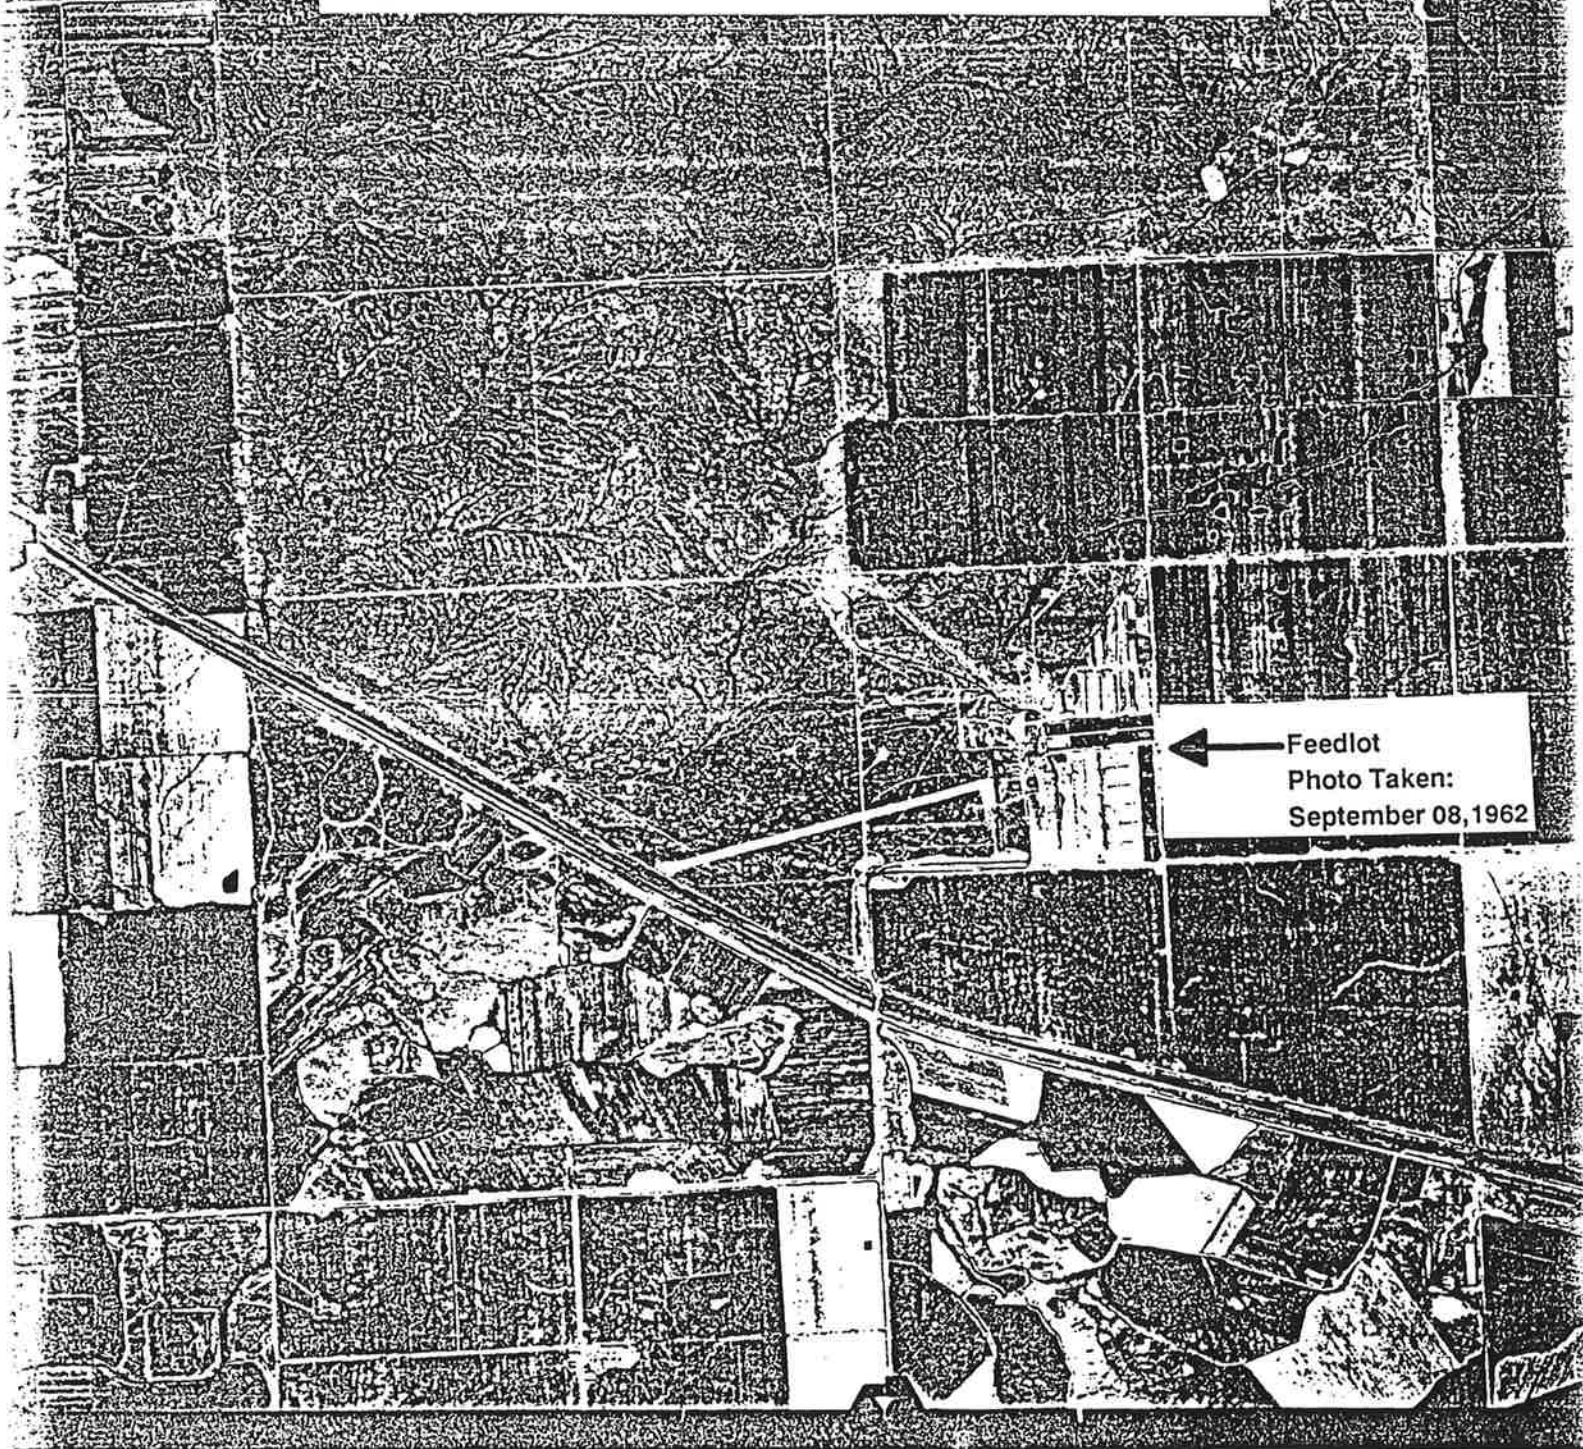

The Director's disallowance of claim No. A36-13320 based on the reason that "No Beneficial Use Found," is unfounded and incorrect. In fact, water right 36-13320 has been continually put to beneficial use since construction of the feedlot. Because there has been continuous beneficial use of the water since 1962 in accordance with Idaho Law, the claim should be allowed, and the Director's recommendation should be changed to allow the water right to be decreed consistent with the beneficial use as described herein.

Re: SRBA Claim No. 36-13320

Dear Roxanne:

In response to your letter dated October 19, 1992, I am clarifying my telephone conversation with your field representative on or about July 12, 1991.

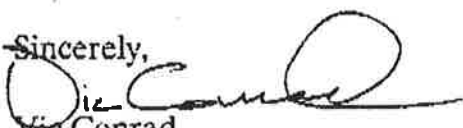

In your letter you mention it is your understanding that the well referenced by the above claim has not been used for watering stock since 1981. In our telephone conversation I informed your field representative that the well referenced by the above claim was originally installed to supply stock water for a feedlot designed to support approximately 25,000 head of cattle. In 1981, the feedlot operation discontinued. Shortly after closing the feedlot operation, a portion of the former feedlot was used in combination with adjoining irrigated pasture.

I went on to explain to your field representative that following the closure and subsequent use of a portion of the original feedlot, the well that was originally installed to supply stock water to 25,000 head of cattle was used to supply stock water to 4,000 hd cattle. We continue to use the well to supply stock water for 4,000 hd of cattle on a portion of the original feedlot that is used in combination with adjoining irrigated pasture.

I hope it is now clear that the well has been used since 1981 and continues to provide stock water for 4,000 head of cattle. As a result of closing the feedlot operation, the number of stock receiving water from the well was reduced from 25,000 hd to 4,000 hd. I hope that by clarifying my telephone conversation with your field representative you will change your recommendation for disallowal.

If you have any questions, or would like to discuss the above claim please call me at (208) 389-7359.

Sincerely,

Vic Conrad

1. RE: P/D in the NW¹/₄ of Sec 14 (irrigation well originally licensed under 36-2208. (^{P/D} NOT CLAIMED IN ADS FILING))

ANSW: This well is not being used at this time. The future plans include irrigation of 10 to 15 acres south of this P/D. an application for permit will be filed at that time. This P/D does not irrigate acres in the SW¹/₄ of Sec 11.

RE: P/D in the NW¹/₄ of Sec 14 (domestic/stock claim) claimed through adjudication right NO. A36-13319.

ANSW: This is a different well than the one discussed above. The diversion works is a submersible pump supplying water to one home and to stockpens surrounding the home and shop. The system is tied in to a pressure tank. Livestock watering is year round with 1500 head watered continuously throughout the winter months.

RE: Claim A36-13320, stockwater for the feedlot From the same well claimed through A36-2208.

ANSW: The feed lot has not been operating since 1981 therefore the stock water claim is recommended for disallowal.

RE: Irrigated acres in the SE¹/₄ of Sec 2. - to be excluded in adjudication.
