

Christensen, Kelly

Subject: late claim A36-07009 and
Entry Type: Meeting

Start: Fri 10/8/99 12:00 AM
End: Fri 10/8/99 12:00 AM
Duration: 0 hours

Jake and his son came in to correct errors in their water rights. Burke Schuller (IDWR) found out that Jake did not have an adjudication claim for his irrigation right 36-07009.

In reviewing their water rights, we determined that they have one valid right that has been decreed, 36-13912 for domestic and stockwater use.

They also have decreed right for domestic use during the irrigation season, 36-13925. They determined that that right represents the irrigation well but that there is no domestic use tied into this system. After discussing the options, they elected to motion the court to set-a-side the partial decree and then withdraw or have the claim disallowed.

We then discussed 36-07009. In reviewing the place of use through arcview, they indicated that the 3 acres in the NWSW is now covered by corrals. They also indicated that another 3 acres in the SWNW are part of the corral system. They elected to file for 28 irrigated acres under this system. I created a claim and Jake reviewed the claim and then signed it. I notarized his signature. I gave them forms for motioning the court for a late claim and to set-a-side a partial decree. I suggested that they let the court know that the two motions should be processed together to reduce court appearances.
