Subject: Re: Water right claim 87-10998

Good morning Sandra,

Thank you so much for your time alleviating my concerns. I greatly appreciate the attached documents and changes made as well as the alignment of the position on the map to accurately reflect the parcel of property we own.

I was not able to find that I made a payment for this request. I would like to put the check in the mail today. Where should I mail the check to? The address in your email?

Again, thank you for your time and for clarifying things.

Have a good weekend.

Sincerely,
Lorrie

Hello, I double checked our receipts and we have not received payment for 87-10998. If you find that your account was debited the \$25 please let me know. Otherwise you will need to mail a check.

I have attached a second map. There is a lot of information so I'll start with the larger main map first. I identified your parcel in the upper right of the map. It is within T41N R5W Section 34 SENE. The point of diversion on the claim is in the T41N R5W Section 34 SWNE. That is why I asked if the well was on your property. Sometimes wells are on neighboring parcels. I found a well log for Richard Bright (see attached). The log identifies the well as being in T41N R5W Section 34 SENE.

The claimed place of use falls with T41N R5W Section 34 NESW. I highlighted that quarter quarter on the map. I also labeled the owners of the parcels within the quarter quarter. I was suggesting an amendment because I did not see that you owned property in either the NESW or the SWNE.

I understand your concern about having a place of use that goes right through your shop. In the upper left corner of the map I have changed the place of use to align with the quarter quarter boundary so that it includes all of your property. When I make the recommendation, that is the boundary I will use instead of the parcel. There will be a condition on the recommendation that identifies parcel RP41N05W341960.

Thank you Sandra for talking to me Friday, August 21, 2020, to discuss my concerns with this request. During our conversation, you realized that there were numerous others who showed non-payment and the possibility that there might be some issues with your report or whatever information you had, either downloaded or received, was incorrect or had errors. Concerns are directly related to the coordinates on the attached document crossed off and changed and the map also shows the line of the property with the changed coordinates running right through the middle of our shop. You also asked if the well was on my property. I was even more concerned with your comment that it didn't really matter with the coordinates or the line noted on the map going through our shop but that it was the right property and area on the map. When I filled out the online form, a gentleman in your office helped me fill it out. As I said on the phone that I would not be signing something that wasn't the original document I submitted from the Latah County office here in Moscow, Idaho. I also signed when I submitted the online form as was, why would I sign something outside of the online form with changes that do not reflect court records?

You said that you would be looking into my situation and getting back to me. I want to make sure that everything has been cleared up and addressed by the deadline you noted in your email, 30 days from August 21, 2020. If we are not able to meet the deadline due to things out of my control, I hope the deadline will be extended until we can resolve this situation.

I look forward to hearing from you and hopefully soon!

Sincerely,

Lorrie

Hello,

The Idaho Department of Water Resources recently received the Notice of Claim to a Water Right you filed. The correct and full filing fees must be submitted with the Notice of Claim in order to include your water right in the report to the court. We will hold your claim until the filing fees in the amount of \$25 are received. If we do not receive the filing fees within 30 days, we will assume you are no longer interested in filing and the claim will be rejected.

I was unable to find your property at the place of use you identified on you claim. I did find property in your name in T41N R5w Section 35 SENE (see attached map). I have attached an amended notice of claim showing the changes. If you agree with the changes please sign the claim where highlighted and return it to me with the fee. I noticed the quarter quarter for the place of use and point of diversion on your claim are different. Is the well on your property?

Please do not hesitate to contact me if you have any questions or concerns.
