DEPARTMENT OF
WATER RESOURCES

My name is James F. Hagenbarth and I am representing Hagenbarth Livestock as the person filing these stock water claims. I have managed livestock on this allotment my entire life. The livestock using this allotment are owned by Hagenbarth Livestock and the permit is held by Hagenbarth Livestock which is an entity owned and managed by my son, John Hagenbarth. See particulars in remarks and attachments. My contact information is: hagenbarthj@msn.com, 406 490-2121, PO Box 1128, Dillon, MT 59725. The beneficial use stock water claims lie in two water Districts in Idaho, 21 and 31.

There are 20 stock water claims in District 21 (21-13289-13308) and 13 stock water claims in District 31 (31-12507-12519) for a total of 33 claims. The first claim in the claim packet is 21-12507. In this claim's attachments are all the documentation substantiating the necessary information called for in the instructions given to file beneficial stock water use on Forest lands in the State of Idaho. In the other 32 claims I have referenced this documentation in 31-12507 to limit paperwork and cost on my part and on that of the examiners and the system. Once electronically copied this information can easily be incorporated into the other 32 filings. The other 32 claims give the particulars of the beneficial use of stock water by the current permittee's livestock. I am the contact for any inquiries. Thanks
