REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s), by number, for each box checked. You may use additional pages if necessary.

11. Remarks:

The United States claims that the Remarks section should contain the substance of the following Section 6.2 from the Settlement Agreement:

6.2 The United States agrees that License Nos. 34-2381 [old no. 28964] and 34-2254 [old no. 16711] will be superseded by the water rights herein, only upon completion of all judicial proceedings, including appeals if any, together with entry of a final decree containing the water rights set forth in this Agreement.

The United States failed to file a notice of claim for License Nos. 34-2381 and 34-2254. Consequently, these state acquired water rights were not listed in the director's report, and a reference to them would be improper in the absence of a notice of claim for them.

14. Other (General Provisions)

(i) General Provision ¶ 1b, p. 9: The United States objects to this general provision "to the extent that the director seeks authority beyond the scope of the waiver of sovereign immunity contained in the McCarran Amendment." Objection at 8. IDWR denies the allegations of this section of the objection.

(ii) General Provision ¶ 4, p. 10: The United States objects to this provision because the phrase "pumping levels" could mean either a water table elevation or a rate of pumping. The United States argues that a limitation on rate of pumping would violate Section 5.14 of the Settlement Agreement. The reference in General Provision 4 to pumping levels is derived from Idaho Code § 42-237a. The meaning of the phrase is to the elevation of ground water and not to a rate of pumping. Consequently, General Provision 4 does not violate Section 5.14 of the Settlement Agreement.

(iii) General Provision ¶ 5, p. 10: The United States claims that General Provision 5 is inconsistent with Section 5.13 of the Settlement Agreement regarding separate administration of the Monument. The following addition to the Remarks section is proposed to address the separate administration for the Monument:

The surface water within the boundaries of the Monument and perched ground water underlying the Monument shall be treated as a self-contained water system.

(iv) General Provision ¶ 7, p. 11: The United States objects "to administration of federal water rights by the director inconsistent with the McCarran Amendment" and asserts that the director may not prescribe measuring devices for federal diversions. IDWR denies the allegations of this section of the objection.

(v) General Provision ¶ 8, p. 11-12: The United States objects to the failure of the director's report to reprint verbatim Section 5.10 of the Settlement Agreement. In response to this objection, the IDWR assures the United States that no substantive differences were intended in the language of the director's report and the language in the Settlement Agreement.

In fact, the IDWR believes that the director's report uses language that is an improvement over the language of the Settlement Agreement. However, the IDWR proposes to add the following to the Remarks section to address this objection:

The following provision shall apply to this water right:

The use of water for fire suppression benefits the public. Water diverted for fire suppression may be taken randomly, without a definition of the specific elements of a recordable

water right, and if so diverted for fire suppression, existing water rights shall not be diminished.

(vi) Water Right Nos.: The Settlement Agreement assigned the number of 36-15344 to this water right with both ground water and surface water shown as a source. The Director's Report has followed this numbering system. IDWR denies the allegations of this section of the objection.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The IDWR proposes the additions to the Remarks section described above. Attachment I is a description of this water right with these additions.

Please note that you should attach copies of documents which support your response. Note on each document the "box number" it supports.

☒ Check here if you are submitting documents. Please list each document by the title and number of pages. You may use additional pages if necessary.
