RE: RESPONSE TO NOTICE OF ERROR FOR CLAIMS 36-07855,
36-07836, 36-02056, 36-07234, 36-02158, AND 36-00049A.

Dear Mr Turnipseed

RE: RESPONSE TO CLAIMS 36-07855, 36-07836, AND 36-02056.

These claims have been recommended as licensed and the department cannot add additional uses to a licensed right. No changes were made to these claims.

RE: RESPONSE TO CLAIM 36-07234.

Although you state that you can document the irrigation of the additional acreage, the department cannot change a recommendation without that information. The recommendation was based upon a field examination of the system and the acres in question did not appear to be irrigated from the system described by the claim. No change was made to this claim.

RE: RESPONSE TO CLAIM 36-02158.

After reviewing your NOE and the information contained within the file, the recommended diversion rate for fish propagation was increased to 8.62 CFS. This was the maximum measured diversion rate submitted by your agency. I could not find a measurement that showed 9.33 CFS. No other changes were made.

RE: RESPONSE TO CLAIM 36-00049A

No change was made to this recommendation. The claimed use is not based upon diversion of the claimed water and

therefore an element of a water right is missing and cannot be recognized.

If you still do not agree with the IDWR recommendations to the court, you may file an objection with the court after you receive the final recommendation of your water right. The objection process will be explained when you receive your final recommendation of your water right.
