Dan,

As with your water right claim 87-11733, it looks as if we will need to amend claim 87-11730 as well, to change the source from the Palouse River to Groundwater. Just a couple more question for you before I send out the paperwork. First, did you receive the amendment to 87-11733 that I sent out on September 24th and if so, did everything look correct? Second, it sounds like you also have an instream stockwater use from Cow Creek, where your stock drinks directly from the stream. If you want to secure that use as well, it would need to be filed as a separate water right because the source is (Cow Creek as oppose to Groundwater from the wells). This use from Cow Creek would be considered "de minmus and deferrable" at this time, so you are not required to file it if you do not want to. Would you like to file claim on that stockwater use? If so, I help you complete the form and include it when I send out the claim amendment for 87-11730.

Thanks again,

Scott

Hello again Dan,

I have just taken a look at another claim you filed, 87-11730, for the property in Sec. 18, just south of the property associated with claim 87-11733 and it appears we have the same situation. The source on the claim was stated as the Palouse River but again the property is not near the river nor do I see a river or stream nearby. Is this claim also actually sourced from a well and therefore groundwater?

Thanks again,

Scott

Sounds good Dan. I will try and get the amendment off to you today. All that will be changed is the source will be changed to Groundwater. No "Tributary To" information will be needed on a groundwater source. Once you receive it, look it over to make everything looks right, sign it, and return it to our office here in Boise.

Hello Dan,

I am reviewing your water right claim No. 87-11733 for Department recommendation and I have a question about the source. On the online claim form you submitted you listed the source as the Palouse River. In examining your property with aerial imagery and maps, I see that the property is not located on or near the Palouse river. Additionally, I do not see any other streams or surface water sources on or near the property. Is your water sourced from a stream, or is it fact from a well? Either way, if it is not sourced from the Palouse River, we are going to need to amend your claim. To do so, just let me know what the actual source is, and I will print off an amendment to send to you. You can then just sign the amendment and send it back and we will be set.

Feel free to email or call me at the number below if you have any further questions.

Scott
