MEMORANDUM

TO: Files 36-07342 & 36-07462

FROM: Pam Skaggs^{PS}/State Office

SUBJECT: Transfer 5156

DATE: September 30, 1998

o/c 

Transfer 5156 changes the point of diversion under Right 36-07462, and changes the rates of diversion under both Rights 36-07342 and 36-07462 to separate the systems and remove the point of diversion overlap combined limits.

These rights were developed from the same well ✓ and are both currently owned by the applicant. The second right developed, 36-07462, was given a combined right diversion rate limit of the capacity of the well, 3.12 cfs. Each right was given an inch per acre diversion rate that when combined exceeds the capacity limit. The applicant is now proposing to drill a new well for the second right and have two separate systems under these rights.

In order to eliminate any expansion in use, both rights are being modified to reflect more accurately the individual uses and limits of these rights. The applicant has been advised of this proposal and agrees with the following recommendations. The full circle pivot system under Right 36-07342 requires 1000 gpm or 2.23 cfs to run according to the applicant and will be retained under this right. He will adjust the system from the proposed well to divert the remaining balance of the combined rights, 399 gpm or 0.89 cfs, under Right 36-07462 to serve the half pivot. Each right still provides the full irrigation volume requirement following this adjustment.

Recommended conditions include drilling permit requirements & supplemental groundwater conditions under Right 36-07462, and measuring & annual reporting requirements, irrigation overlap, & standard conditions under both rights.
