TRANSFER NO: 4889

Dear Water Right Holder:

Enclosed is a copy of your approved Transfer of Water Right for the above referenced water rights. Please be sure to thoroughly read the Conditions and Remarks listed on the transfer.

The accompanying **transfer approval** should be considered and treated as a **preliminary order** of the department issued pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the department unless a party petitions for reconsideration within fourteen (14) days after issuance as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within twenty-one (21) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding. Otherwise, this preliminary order will become a final order of the agency.

If any party appeals or takes exceptions to this preliminary order, opposing parties shall have twenty-one (21) days to respond to any party's appeal. Written briefs in support of or taking exceptions to the preliminary order shall be filed with the Director. The Director retains the right to review the preliminary order on his own motion.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties, if any, to the proceedings in accordance with Rules of Procedure 302 and 303.

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

If you have any questions, please feel free to contact me.

Sincerely,

JIM JOHNSON, Manager

MEMORANDUM

TO: FILE NOS. 36-07562A & 36-07622
FROM: PAM SKAGGS/STATE OFFICE
SUBJECT: TRANSFER NO. 4889
DATE: January 30, 1997

=====

Transfer No. 4889 was filed to accomplish a couple of things; (1) to change a portion of each right from irrigation use to stockwater and commercial use to serve an existing dairy, and (2) to change the point of diversion under the remaining irrigation portions of these rights. No physical change will be made to the dairy or the irrigated acres, only the new irrigation well will be added.

Right No. 36-07562A is split into parts E and F, and Right No. 36-07622 is split into parts A and B. The irrigation use is described under Right Nos. 36-07562E and 36-07622A, while the dairy use is described under Right Nos. 36-07562F and 36-07622B.

The irrigated acres and dairy are all located within NESE, S26, T08S, R15E. The licenses originally identified irrigation of the entire 40 acres. The license exams were conducted in 1981 and 1982. The SRBA exam occurred in 1990 and noted that there was some dairy use, but didn't pursue the matter. The applicant also filed a SRBA beneficial claim No. 36-10038 for domestic and stockwater uses identifying 300 dairy cows and barn use, with a priority date of 01-15-1981.

Review of available photos reflect a reduction of irrigation as the dairy was developed. Region review found 6.3 acres removed from irrigation for the dairy site and additional acres not irrigated in the corners around the pivot. A total of 30 acres were recommended as irrigated and 10 acres no longer irrigated that are available for transfer for the dairy.

It was also noted that when the irrigation beyond the dairy site ceased is unclear, but no confirming evidence could be provided. While the nature of use appears to have been changed, it would appear that these rights continued to be used for the dairy and the remaining irrigation uninterrupted.

The reduction of 10 acres irrigation provided the full dairy requirement under these earlier priority licenses superseding the stockwater use identified under 36-10038. The portion of Right No. 36-10038 for stock and the dairy barn duplicate the use described by the transfer approval and will consequently be considered abandoned through this approval.

- b. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? N/A Yes _____ No _____. If yes, provide a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes.
- c. Describe the affect on the land now irrigated if the place of use is changed pursuant to this transfer:
This dairy has been in development since 1981 up to the present. The 320 milking animals & 100 dry stock are all that county regulation will allow. As the dairy expanded, land was removed from irrigation and converted to corrals, etc. The land has always been used for one purpose or the other.
- d. Remarks: Claim 36-10038 covers this dairy. However, the daily usage may exceed 13,000 gallons. So we want to show a proper water right for our dairy.

TO: Transfer File No. 4889

In the Name of: John & Cecelia Wright

SUBJECT: Review and Recommendation

This transfer deals with two licenses which record a total use of 40 acres of irrigation. The transfer proposes to change the nature of use from irrigation of 6.3 of these acres to that of dairy use. Additionally the remaining irrigation use is proposed to be diverted from a new well since presently the water comes from a well located on the neighbor's property which is shared with the neighbor.

Both of these licenses are recommended in the SRBA. The licensing field exams were conducted in 1981 & 1982 and at that time no dairy use existed. In 1990 when the SRBA claims were examined a dairy existed on a portion of these acres. However, the change in use to dairy was not fully investigated. A review of the landsat information finds that around 1986 there were 33 acres being irrigated. The 1987 NAPP supports this. The SRBA recommendations, as they stand, do not raise the issue of forfeiture of the rights since no clear and convincing evidence of more than 5 years non-use was documented. In retrospect this issue may have been pursued a little more but it wasn't. In Corey Skinner's review (See memo dated 8/7/96 & 8/9/96) the issue is revisited.

In looking at this from the prospect of what has been partially forfeited in light of the recent SRBA decision about "partial forfeiture" then the application should be approved as submitted. But if you look at it in the sense of limiting it to the past beneficial use it appears that some adjustments should be made.

The adjustments that appear to be warranted are as follows:

-In both the 1987 NAPP and the 1993 aerial photo it appears consistent that 2 acres in each of the corners of the NW $\frac{1}{4}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$, SW $\frac{1}{4}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 26, Twp.08S, Rge.15E, B.M. outside the pivot are dry. It is also obvious that land under the dairy is also dry. In 1987 it is estimated that 10 acres are dry leaving irrigation of 30 acres while in 1993 it is estimated that 14 acres are irrigated leaving 14 acres dry. Giving the benefit to the applicant and taking out the 6.3 from what has already been dried up and again giving the benefit to the applicant and taking it out of the 1987 figures I propose that the acknowledged remaining irrigation right be limited to 30 acres.

I recommend that the transfer be approved in part, subject to the following conditions:

36-07562E

Irrigation 0.15 cfs 4/1 to 10/31 for irrigation of 7.5 acres; limited to 30 afa.

36-07622A

Irrigation 0.45 cfs 4/1 to 10/31 for irrigation of 22.5 acres; limited to 90 afa.

-The above two rights when combined shall be limited to irrigation of 30 acres within the NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 26, Twp.8S, Rge.15E, B.M. from a new well to be drilled within the SE $\frac{1}{4}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 26, Twp.8S, Rge.15E, B.M.

-The new well must comply with drilling permit requirements.

-A measuring device with totalizing meter must be maintained on the irrigation well and use reported annually.

-The above rights are subject to SRBA.

-The above rights may be subject to forfeiture, based on non use since 1993.

36-07562F

Stockwater	0.02 cfs 1/1 to 12/31; limited to 3.7 afa.
Commercial	0.01 cfs 1/1 to 12/31; limited to 3.1 afa.
Total	0.03 cfs 6.8 afa.

36-07622B

Stockwater	0.05 cfs 1/1 to 12/31; limited to 11.0 afa.
Commercial	0.05 cfs 1/1 to 12/31; limited to 9.0 afa.
Total	0.10 cfs 20.0 afa

-The above commercial and stockwater rights shall be diverted from two existing wells in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 26, Twp.8S, Rge.15E, B.M.

-When the commercial and stockwater rights are combined with 36-10038 the total use shall not exceed use of 1 house and commercial and stockwater dairy needs for 320 milking and 100 dry cattle. This total use is estimated to be:

1 house with yard	1.2 afa
Dairy	30.2 afa
Total	31.2 afa

-The above rights are subject to SRBA.

-The above rights are subject to other federal, state & county permits that may be required.

MEMORANDUM

TO: Wright Transfer File (Rights 36-07562A & 36-07622)

FROM: Corey Skinner *CS*

DATE: August 9, 1996

SUBJECT: John Wright Visit

This day, John Wright stopped by the office to talk about his transfer application and the filing of the Extension of Time to Avoid Forfeiture applications in response to my 08/06/96 letter (copy in transfer file).

We rediscussed the items that are mentioned in my 08/07/96 staff review memorandum in the transfer file. I gathered the following information from Mr. Wright during our discussion:

The approval of the enclosed transfer application is the most important thing to him when it comes to his water right situation.

He was going to wait and see how the transfer would be approved, if it were approved, with regards to the irrigation portions of the water rights (exact amounts of water, acres, etc.) before filing any additional applications.

He thought that as long as the transfer application was approved, he would be satisfied, regardless of how the irrigation portions were handled. If the transfer was approved as described on the application, for the irrigation of 33.3 acres, he would probably file the Extensions of Time to Avoid Forfeiture to protect his water rights in case he decided to try and transfer portions of the water to other property. If the irrigation portions were reduced, but the transfer application was still approved, he would still be able to drill his own well and would have obtained a valid water right for his dairy operation.

He said that he was comfortable with leaving the decision on how to handle the irrigation portions of the rights up to the department, and that "he trusted his state government".

MEMORANDUM

TO: Wright Transfer File (Rights 36-07562A & 36-07622)

FROM: Corey Skinner *CS*

DATE: August 7, 1996

SUBJECT: Staff Review

The enclosed transfer, filed by John W. &/or Cecelia Wright, seeks to change the point of diversion and record how a portion of rights 36-07562A and 36-07622 have been used in a dairy operation.

The Wrights own the NESE $\frac{1}{4}$ of Section 26, Township 08 South, Range 15 East. The Wrights have a dairy operation and a house located in portions of the north half of the NESE $\frac{1}{4}$ with a pivot sprinkler and handlines irrigating the remaining land in this particular quarter quarter. Irrigation water is diverted out of a well located in the NESESE $\frac{1}{4}$ of Section 26, just south of the Wright's property line. Currently, the following recommended SRBA claims are appurtenant to the Wright's property (NESE $\frac{1}{4}$):

36-07562A recommended for 0.20 cfs for irrigation of 10 acres

36-07622 recommended for 0.60 cfs for irrigation of 30 acres

* C.V.R.'s in 36-07562A and 36-07622 state that the 10 and 30 acres are separate, so the Wright's have recommended irrigation claims for 40 total acres in the NESE $\frac{1}{4}$.

36-10038 recommended for 0.07 cfs for domestic (one house) and stockwater for "300 head dairy & barn"

The enclosed transfer application proposes to take the irrigation rights (36-07562A & 36-07622) and modify them in the following ways:

*Drill a new well on the Wright's property, SENESE $\frac{1}{4}$ of Section 26, to serve as the source of irrigation water for the Wright's. This will enable the Wright's to divert their irrigation water out of their own well on their own property (the present well is located in the NESESE $\frac{1}{4}$ of Section 26).

*Convert a portion of the irrigation rights (based on a PPU analysis) to stockwater and commercial use for the Wright's dairy operation. The stockwater and commercial use portion(s) are to be diverted out of two existing dairy wells in the NENESE $\frac{1}{4}$ of Section 26.

The changes discussed on the previous page will result in a change and addition of point(s) of diversion, a change in nature and season of use (the dairy conversion), and a splitting of the water rights (irrigation system and dairy system).

The addition of the new well and the existing dairy wells probably should not cause a problem. The dairy conversion looks to be pretty straightforward also (copies of the dairy worksheet and the PPU analysis detail the dairy conversion and are attached to the transfer application). However, recommended claim 36-10038 for domestic and stockwater would overlap with the dairy operation. The dairy use required that 6.7 acres worth of irrigation be converted to stockwater and commercial use. The transfer application is based on the idea that as the dairy was built and expanded, irrigation land, and portions of the irrigation rights, were converted to dairy use. Therefore the transfer application is a recording of an unrecorded transfer that took place over the years.

However, problems arise because it appears that the irrigated acres in the NESE $\frac{1}{4}$ were over recommended for rights 36-07562A & 36-07622. The irrigation rights totaled 40 acres and subtracting off the 6.7 acres for the dairy conversion leaves 33.3 acres of irrigation covered by the irrigation rights. The NAPP photo (416-198, 06-22-87, BB21 NE) indicates that there is nowhere near 40 total acres of irrigation in the NESE $\frac{1}{4}$, as can be seen on Attachment A enclosed with this memo. In addition, a site visit and examination of ASCS aerial photo slides (see Attachment B enclosed with this memo) revealed that there presently is not 33.3 acres of irrigated ground in the NESE $\frac{1}{4}$ of Section 26. This is due to the fact that most of the land in the north half of the NESE $\frac{1}{4}$ is covered by the dairy facility (barn, corrals, lagoon, etc.) and the Wright's house.

On my July 2nd site visit, I spoke with John Wright and made him aware of the problem with the irrigated acres and the possible forfeiture of these acres, and a portion of his water rights, since they no longer exist. He seemed to agree that there was a discrepancy, since we were standing in the middle of the dairy facility area that was supposedly irrigated farm ground. He wanted to know if there was anything he could do to try and save those portions of his water rights and the irrigated acres.

I explained to him that interpretations of the forfeiture issue were currently kind of up in the air due to a recent court ruling and may take a while to get clarified. I told him that he could file two extension of time to avoid forfeiture applications (one for each irrigation water right) to try and protect his rights from forfeiture. These could be filed based on the idea that the

SRBA recommendations were valid when filed with the court (November of 1992) or somewhere around that time. Since the dairy development and expansion were done over a period of several years, it would be difficult to pin down exactly when specific acres were taken out of production.

I had a copy of the Extension of Time to Avoid Forfeiture application along with the instructions and gave them to Mr. Wright. I explained the application process (review, public notice advertising subject to protest, etc.) and told Mr. Wright an application may or may not be approved. He talked like he wanted to file the applications, but he would be in California for a couple of weeks, and would not be able to get around to filing them until he got back. I told him if he had any questions, or if he needed any assistance in completing the applications, to give me a call. He said he had one of my business cards, I had stopped by his house while traveling through the area on a previous day, and he would be giving me a call.

I had planned on delaying the processing of this transfer application until Mr. Wright filed the additional extension of time applications, but I have not heard from Mr. Wright as of this date. On July 23rd, I called the Wright residence and left a message with Cecelia Wright, to have Mr. Wright contact me and she said he would. This week, I sent a letter to Mr. Wright (dated 08/06/96, copy enclosed in this file) notifying him that I was going to process his transfer application and that his water rights may be subject to forfeiture.

In summary, the addition and changing of the point(s) of diversion and the conversion of a portion of the irrigation rights to dairy use are pretty straightforward. Due to an overlapping domestic and stockwater recommended claim, 36-10038, appropriate limitations and approval conditions would have to be implemented for the dairy portions of the rights if the transfer application were to be approved.

However, if the transfer is approved as proposed on the application, problems will arise with the remaining irrigation rights. The transfer application proposes to create rights 36-07562E and 36-07622A for the irrigation of a combined 33.3 acres within the NESE $\frac{1}{4}$ of Section 26. All of this 33.3 acres does not presently exist in the field, and may or may not have existed within the past five years.

Needless to say, a decision needs to be made as to how to handle the irrigation portions (36-07562E and 36-07622A) that would be created if this transfer were to be approved.

SKETCH BASED ON AERIAL PHOTO PROJECTION

This sketch was made by projecting an ASCS aerial photo slide (1993 flight) onto this piece of paper at the ASCS office in Gooding on 06/18/96. The fencelines (property boundaries) were visible on the projected slide so the sketched boundary locations of the NESE $\frac{1}{4}$ of Section 26 should be fairly accurate. In addition, relative locations of the dairy facility and lagoon within the NESE $\frac{1}{4}$ are accurate and represent what was on the ASCS aerial photo slide (1993 flight).

RE: SRBA Claim(s) 36-07562A and 36-07622

Dear Claimant:

Please find the enclosed copy of the Notice of Administrative Proceeding which the department has filed with the SRBA Court regarding the above referenced claims. You have received this notice pursuant to SRBA Court Administrative Order 11 requiring IDWR to report to the court and interested parties any pending changes to adjudication claims in basins for which a Director's Report has been filed with the court.

After IDWR completes the indicated administrative process, and has modified the SRBA claims, you will be forwarded a Notice of Completed Administrative Proceeding. Please contact this office if you have any questions about the notice or the administrative process.

Sincerely,

Trish Fawcett

Remarks This right and right # 36-7622 are both served by the same
well and pump. Mr. John Wright now owns the NE of the SE 1/4 and
Keck owns the SE 1/4. Originally Mr. Keck planned to sell 50% of the
land north of the Canal. Thus the 2 quarters are with 50 acres and
one with 30. When the land was sold it was divided
into 40 acre tracts. Hence this license will overlap on Mr. Wright's
land.
