Claims review notes and narrative

Date: 3-19-2002

File: 36-2460 and 36-7614 diamond

Prepared by Kelly K Christensen

Conversation with Dean Diamond
Re: 36-2460 and 36-7614

John Freitag requested that I visit with him concerning the recommendations of these rights. I called him today and discussed the claims, the recommendations, procedures and transfer issues.

His questions in part covered the following;

1. Why was the place of use recommended with 4 acres outside the claimed place of use?
 - a. I reviewed Steve Clelland's recommendation and found that he observed the ground as part of the system based upon aerial photography (and possibly a field examination). In discussing this with Dean, he indicated that the original owner owned all of the ground (the licensed place of use and the 40 acre tract where the 4 acres exist.) I understood him to indicate that the 4 acres were probably part of the system at that time but I did not pursue this issue.
2. Why was the diversion rate limited to 4.72 cfs and what happened to the claimed volume?
 - a. I explained the system capacity limitation that set the combined rate to 4.72 cfs. I noted that the claim was filed for 999 af in item 8 for consumptive use for each right. I then explained that the claim represents an individual's understanding of his use and does not necessarily reflect department standards. I explained that the department standard is 4 af per acre and that the recommendation reflects that amount. I did not discuss the difference between consumptive use and diversion volume.
3. Why wasn't anybody notified what the recommendation was for?
 - a. I read a portion of Steve's 11/17/92 memo regarding the recommendation of the two rights. Steve indicated that the meeting was with Randall Waters and Max Aucker. I explained that this memo was generated because the claimant had been informed of the recommendation and it raised questions, therefore they had to have seen the recommendation.
4. Does a transfer open up the water rights to complete review?
 - a. I explained that the transfer process was, in part, an effort to get existing rights to reflect current reality. If there was an issue of partial forfeiture then it would possibly be recognized through the transfer process. I used the example of changing irrigation systems to where some ground is no longer practical to irrigate. If the owner did nothing legal to protect the acres taken out of production, then those acres have the potential to be recognized as forfeited.

We discussed a number of related issues primarily focusing on historical events. I eventually suggested that discussing history is fine but the practical solution would be for him to proceed with a transfer to recognize that the 4 acres are back on his property. We discussed unrecorded transfers and quit claim deeds as it related to his system. I suggested that he could contact an attorney to get legal advice as to the best method to get the legal right to transfer the 4 acres to his side.

Dear Water Right Claimant(s):

The reverse side of this letter contains a copy of an ***Order Amending Irrigation Period of Use Element in Partial Decree and Incorporating into Partial Decree An Express Statment Regarding General Provisions, Nunc Pro Tunc*** (hereinafter "***Order***") for water right number 36-07614. According to Idaho Department of Water Resources (IDWR) records, you are the current owner of this water right. If you are not the current owner, please contact IDWR immediately at:

Idaho Department of Water Resources
1301 North Orchard
Boise, ID 83706
800-451-4129

The Purpose of the ***Order*** is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the ***Order***, this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This ***Order*** also incorporates into the ***Partial Decree*** an express statement that the ***Partial Decree*** is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necessary to comply with the requirements of Idaho Code section 42-1412(6). This ***Order*** in combination with the ***Partial Decree*** that was issued for this water right on February 24, 1998, sets forth all of the elements of your water right. The Snake River Basin Adjudication (SRBA) Court suggests that you keep this document in a safe location together with a copy of the ***Partial Decree*** to show evidence of the water right. The original of this ***Order*** and the original of the ***Partial Decree*** for this water right are on file with SRBA Court. If you do not have a copy of the original ***Partial Decree***, one can be obtained by contacting the SRBA Court at (208) 736-3011. Please note that the ***Order*** is entered ***Nunc Pro Tunc***, meaning that the ***Order*** will be treated as if it were issued the same date that the ***Partial Decree*** was originally issued.

Sincerely,

Diana Delaney

Water Right 36-07614

ORDER AMENDING IRRIGATION PERIOD OF USE ELEMENT
IN PARTIAL DECREE AND INCORPORATING INTO PARTIAL
DECREE AN EXPRESS STATEMENT REGARDING GENERAL
PROVISIONS, *NUNC PRO TUNC*

A *Partial Decree* was entered for the above-captioned irrigation water right on February 24, 1998. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for this water right. No objections were filed to this recommendation and the time period for filing objections has now expired.

THEREFORE, IT IS ORDERED that the period of use for the irrigation element of the above-captioned water right is hereby amended and decreed as:

MEMORANDUM

TO: SRBA Files 36-07614 and 36-02460

FROM: Corey Skinner *CS*

DATE: January 16, 1997

SUBJECT: Pertinent Information

This day, Chris Reninger of Jerome Farm Service Agency (324-4325) called wanting to know how much water was "licensed under water right 36-07614". After conducting the research, I called Ms. Reninger back. I explained to her that according to the SRBA recommendations: "that water right 36-07614 is diverted out of the same well as an additional water right, 36-02460." I then quoted her the various amounts of total diversion rate, acres irrigated, etc. for the combined rights and also told her the limitations of right 36-07614 as listed in the remarks section of the proof report (AJ) for water right 36-07614.

2. SUBJECT OF INQUIRY:

They came in to discuss the recommendation of two previous license water rights. They were concerned that our failure to acknowledge their irrigation of the waste ground (about 14 acres) was short changing them from what they had been doing.

3. RESPONSE TO INQUIRY:

I did not look up the feds or old licenses but used his figures and the recommendations he held. I explained we were instructed to identify the acres beneficially irrigated and take out large waste areas. That could explain the lowered acreage. However, upon calculating the rate per acre, based on the remarks which limited the diversion rate, no additional water is available under these licenses. I told him he can object to the recommendation but the most he can gain is another 14 acres and no more water.

We discussed the Swan Falls agreement and the development of the Trust water to show Idaho power does not "reap the extra water we identify."

which would be redundant paper rights.
