RE: Field examination of a water right claimed
in the Snake River Basin Adjudication

Dear Counselor,

The field staff of this agency may need to conduct water right field examinations of your client's water right claim(s) during the coming season. The field examiner may be visiting your client's property to obtain information necessary to verify the water use.

If a field exam is necessary your client will be contacted directly about the examination unless you contact us otherwise. If you wish to accompany your client at the time of any field examination, or if you have any questions regarding the field examination, you may contact this office.

Sincerely,

Allen Merritt, P.E.
Water Rights Supervisor

3. **Narrative:** Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

Concrete diversion structure with control gates, concrete head ditch to commercial trout-raising facility. Same diversion system also provides water for power production under Permit 26-08089 (licensing exam also conducted to 99). Water for fish production is measured thru a 16' broad-crested weir at the upstream end of the facility. Water going directly to the power plant goes thru a 12' weir. Two sets of 16 concrete raceways exist (32 total), but only 25 raceways are now in use due to damage from land movement & due to reduced water flows in Billingsley Creek.

2. Volume Calculations for Other Uses:

H. **REMARKS AND OVERLAP REVIEW ANALYSIS**

This is not to be confused with other fish facilities located in the same 40 but at a lower elevation & on the north side of Billingsley Creek.
 Not to exceed 120.2 cfs when combined with 36-08089.
 The FERC requires a ~~low~~ bypass flow of 70 cfs in Billingsley Creek from 10-1 to 11-15, and 25 cfs the rest of the year. The Brockway measurements were made during the lower bypass requirement.
 Mr. Earl Hardy (property owner) said that all of these raceways have been used within the last 5 years, and that he plans to use all but one of the raceways in the future. So I am recommending the facility volume for 31 raceways.

I. **RECOMMENDATIONS**

Subject: Fisheries Development Water Measurement Devices

Dear Jim:

Enclosed are the rating tables for the 16 and 12 foot wide broad crested weirs at the Fisheries Development facility near Hagerman. These weirs were computer calibrated based on as-built dimensions from a survey of the facility on October 28, 1990.

On September 27, 1991, I visited the site to review performance of the weirs and obtain staff gage measurements. Both weirs were working satisfactorily with adequate water level drop.

The tail water elevation is near maximum before submergence begins to affect the rating.

Discharge based on the current rating curve is accurate.

The following measurements were obtained:

16 foot broad crested weir gage reading= 1.57 ft

Discharge= 99.2 cfs

12 foot broad-crested weir gage reading= 0.71 ft

Discharge= 21.0 cfs

Please call if you have additional questions.

Sincerely,

C.E. Brockway P.E.

II. STATEMENT OF THE RESPONSE

11. ☒ Remarks: I respond to the objection concerning the
"remarks" listed with the water right.

14. ☒ Other: I respond to the objection concerning:

GENERAL PROVISIONS 5 & 7

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection item 11, and all allegations of the objection regarding this item, IDWR responds as follows:

This right is based on a permit issued by IDWR. IDWR has included the contested remark in all recommendations of rights based upon a permit. The contested remark appropriately conditions the right consistent with Idaho Code section 42-1421(3).

In response to Statement of the Objection item 14 and all allegations of the objection regarding this item, IDWR responds as follows:

IDWR denies the objection.

CHANGES TO THE DIRECTOR'S REPORT

The director proposes no changes to the description of this claim in the Director's Report.

OBJECTION

36-07725 -0001/
93-04-0352

INSTRUCTIONS

This form must be used to file an objection to any water
right recommended in the Director's Report. You may object to
one water right per objection form. The water right number you

MICROFILMED

OCT 19 1994

are objecting to must be indicated above in the blank space following "Case No." To object to more than one water right, you must file a separate objection form for each. Forms may be obtained from the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form, as long as it is identical to the court's form. You must file your objection to the deadline shown in the notice that IDWR mailed to you. The objection must be received by the court on or before the deadline specified. Instructions for mailing this objection are found at Page 6, and must be strictly followed.

Any party physically filing 25 (twenty-five) or more objections must make an appointment with the Clerk of the Adjudication Court and arrange for an appointment to file multiple objections.

By filing an objection form, you are certifying that the objection is well-grounded in fact; is warranted by existing law or a good-faith argument for the extension, modification or reversal of existing law; and that it is not filed for any improper purpose, such as to harass, cause unnecessary delay or needless increase in the cost of litigation.

I. GENERAL INFORMATION

Please fill in the following information:

1. Person objecting:

Name: CLEAR LAKES TROUT CO., INC.
Address: 1301 Vista Avenue
Boise, ID 83705

Briefly describe your interest in this water right:
OWNER

2. Owner of the water right:

Name: CLEAR LAKES TROUT CO., INC.
Address: 1301 Vista Avenue
Boise, ID 83705

3. If this objection is filed by an attorney:

Attorney name: William F. Ringert
Attorney Address: P. O. Box 2773
Boise, ID 83701
Attorney Phone No.: (208) 342-4591

RECEIVED

If filed by an attorney, notice of pending court proceedings will be sent to the attorney only.

II. STATEMENT OF THE OBJECTION

Please check each "box" which states your objection to the recommendation in the Director's Report.

1. ☐ Name and address: I object to the name and/or address of the owner of the water right.
2. ☐ Source: I object to the source of water.
3. ☐ Quantity: I object to:
 - a. ☐ the total quantity of water used in cubic feet per second
 - b. ☐ the total quantity of water stored in acre-feet per year; or
 - c. ☐ the total quantity of water reserved for each and every purpose, including all present and future uses.
4. ☐ Priority Date: I object to the priority date.
5. ☐ Points of Diversion: I object to the legal description of the point(s) of diversion.
6. ☐ Instream Flow: I object to the legal description of the beginning and ending points of the instream flow.
7. ☐ Purpose(s) of Use: I object to the purpose(s) of use.
8. ☐ Period of Year: I object to the period of year when water is used or is necessary for the purpose stated.
9. ☐ Place of Use: I object to:
 - a. ☐ the legal description of the place of use; or
 - b. ☐ number of irrigated acres within each forty (40) acre subdivision.
10. ☐ Consumptive Use: I object to the annual volume of consumptive use.

11. X Remarks: I object to the "remarks" listed with the water right.
12. ☒ Water Right Recommendation: I object to:
- a. ☒ this water right being recommended at all; or
 - b. ☒ this water right not being recommended.
13. ☒ Description of Reservation: I object to the legal description of the reservation.
14. X Other: I object to: General Provision No. 5; General Provision No. 7.

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

11. 1. The language in the remarks, "and will be subject to all conditions set forth in the license issued by IDWR upon completion of the statutory appropriation process", is not the same as the applicable language in Idaho Code § 42-1421(3).
14. 1. Idaho Code § 42-1410 requires the Director to continue his examination of the water system covered by the Snake River Basin Adjudication "for such a period of time as is necessary to evaluate the extent and nature of each water right for which a notice of claim has been filed. The director may conduct any fact-finding hearing necessary for a full and adequate disclosure of the fact." General Provision No. 5 violates this statutory requirement and claimants whose water rights are in springs fed by the Snake Plain aquifer should not be required to file objections against any ground water rights recommended in Basin 36 until such time as the Director has determined the hydraulic connection between the ground water within the Snake Plain aquifer and the springs that are fed by the Snake Plain aquifer.
2. The Director has no authority under the adjudication statutes to require installation of measuring devices and control works with respect to vested water rights or to include General Provision No. 7 in his report. Any authority the Director has in

those areas is contained in Idaho Code § 42-701, and there is neither need nor authority for incorporating the provisions of that statute into the adjudication process or into the decree.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

1. Change remarks pertaining to the conditions set forth in the license to read: "The decreed right shall be subject to the terms of the license to appropriate water that is ultimately issued."
2. Delete General Provision 5. The Director's Report should be held in abeyance until such time as the necessary investigations have been completed; and the report then should be supplemented or amended, and an additional period of time should be allowed for filing objections to ground water claims in Basin 36.
3. Delete General Provision 7.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports. The description of the water system in Basin 36, which the Director is required to include in his report (Idaho Code § 42-1411(1), is not adequate or sufficient to enable this claimant to determine whether there is sufficient connection between ground water rights in Basin 36 and this claimant's water rights in the springs fed by the Snake River aquifer, to warrant investigations to determine whether grounds exist for objections to any of such ground water rights on the basis of abandonment, forfeiture, unauthorized expansion, or any other facts or legal theories upon which any ground water right recommended by the Director in Basin 36 could be challenged.

RE: Snake River Basin Adjudication (SRBA)
Notices of Error

Hardy - A36-07510
Clear Lakes Trout Co., Inc - A36-07800, A36-07731,
A36-07725, A36-07080, A36-07004, A36-02659,
Rim View Trout Co. - A36-07167, A36-02680, A36-10819,
A36-04032A, A36-04032B, A36-04032C

Dear Mr. Ringert:

We are in receipt of the Notices of Error on the above referenced claims. Each Notice of Error will be addressed below.

Hardy - A36-07510

No changes have been made to the recommendation. The recommendation is based on a field examination of the place of use which identified the actual acres under irrigation and other IDWR information. The diversion rates and volumes and consumptive use volume are based in IDWR standards for beneficial use and crop requirements.

Clear Lakes Trout Co., Inc. - A36-07800, A36-07731, A36-07725

As to the completion of licensing process remarks, these remarks shown in the recommendations on the above referenced claims are based on Idaho Code 42-1421(3). No change will be made to the recommendation.

Clear Lakes Trout Co., Inc. - A36-07080

Regarding the measuring device condition, this remark is based on Idaho Code 42-701 and conditions set forth in the license. Regarding the effluent standards remark, this remark is carried over to the recommendation as a condition is set forth in the license. As to facility volume, this remark is based on Idaho Code 42-1411(2)(j) which provides that Director's Report

MICROFILMED

FEB 04 1993

of water right appropriated under state law shall include such other matters necessary to define the right; facility volume is necessary to prevent future expansion in use of the right. No changes will be made to the recommendation.

Clear Lakes Trout Co., Inc. - A36-02659, A36-07004

Regarding facility volume remarks, see discussion in paragraph immediately above. Regarding the other rights diverted at the recommended points of diversion, the points of diversion recommended for both rights included the same three 10-acre tracts. As you stated in your Amended Notice of Error, a portion of A36-02659 is diverted through the same diversion structure as this right. Both claims referenced above described the same facility system with co-mingled water. Therefore, with the same points of diversion and facility, it is appropriate to include the remarks on both recommendations. Also, the remarks describing rights owned by Clear Springs Trout Co. specifically identify only two of the 10-acre tracts, thereby clearly showing that only a portion of the points of diversion are shared. No changes will be made to the recommendations.

Rim View Trout Co. - A36-02680

See paragraph under A36-07080 for discussion on facility volumes. The total volume is calculated based on the diversion rate over 365-day period. The diversion rate recommended is based on IDWR records and documents relating to this and associated rights. No changes will be made to the recommendation.

Rim View Trout Co. - A36-04032A, A36-04032B

The recommendations are based on measurement data available for the diversion rates corresponding to the dates of priority recommended. See A36-07080 above for facility volume discussion. No changes will be made to the recommendations.

Rim View Trout Co. - A36-04032C

The recommendation is based on measurements and records reflecting the balance of diversion rate put to beneficial use was diverted under development described in 36-02680. No changes will be made to the recommendation.

Rim View Trout Co. - A36-10819

The remarks have been changed to identify recommendation for 36-02680 as the right under which this water use is described.

MICROFILMED
FEB 04 1993

This recommendation is based on measurements and records supporting the development of the water use at the priority date recommended. No other changes will be made to the recommendation.

Rim View Trout Co. - A36-07167

See paragraph under A36-07080 for discussion of measuring devices, effluent standards and facility volumes. For clarification the total diversion volume of the system based on the season of use and diversion rate. The facility volume described in the remarks is a description of the facility dimensions. No changes will be made to the recommendation.

If you still do not agree with the proposed IDWR recommendation to the court, you may file an objection with the court after you receive the final recommendation of your water right. The objection process will be explained when you receive your final recommendation of your water right.

Sincerely,

Helen Harrington-Thornton
