phone call (.) walk-in (X)

On 1/9/97 Mr & Mrs Remsberg came in to talk about the disallowal decree on 11927 and some questions on the measurement program. I reviewed the claim file with them and showed them that since a license was issued on the good drought well we recommended disallowal on the abandoned, buried well represented under 11927. They were also curious whether they had to "use or lose" the drought well (-7730). IDWR records do not indicate that the well is strictly a drought well, it identifies MID water as the other right and conditions 7730 with in combination limits. They wondered if we could change data to specify it as a drought well, I said that we couldn't but I'd put a memo with the file.

I walked thru the measurement forms with them and asked them to forward them to the SO with fee.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Well was drilled in 1977 for drought relief, and was last used in 1977 according to Mr. Remsberg. It is not economically feasible to use the well as long as surface water (MID shares) is available.

By having the well available if needed, Mr. Remsberg has fulfilled his original intention. He grows potatoes, etc., & would suffer serious economic losses if his canal water was cut off. Having the well available for emergency use protects him against such losses. Recommend this development be licensed. Claim 26-4063 was for a different drought-relief well on this farm. That well has not been used for a great many years, & is now only a hole in the ground. Well was not claimed in SRBA.
