SUBJECT: Notice of Error Reply for Notice of Claim to a Water Right Number 87-10867 and Addition to Claim Number 87-10866

Dear Mr. and Ms. Graham:

The Idaho Department of Water Resources has reviewed the Notice of Error Reply for the above referenced water right claim.

In response to your Notice of Error reply, and resulting from our field exam of May 10, 2021; please find a copy of the updated preliminary director's report for water right 87-10867. Note that the recommendation has been changed to include the following:

1. Source of water is Surface Runoff tributary to the South Fork of the Palouse River.
2. Purpose and period of use have been changed to domestic from storage, domestic storage and recreation storage. The period of use has been changed to reflect a year round usage for the recreational storage and March 15 through October 31 for the domestic irrigation of the lawn, garden and orchard (our standard irrigation season for this area).
3. The recommended quantity is 0.6 AFY to cover the domestic irrigation based on a ½ acre total and a storage amount of 5.1 AFY for a total quantity of 5.7 AFY (Acre Feet/Year).

Note that there are two explanatory conditions on this recommendation; one to allow for multiple refills up to the total diversion volume of 5.7 AFY and the second which limits the quantity of water when the well water (87-10866) and the surface water are used together for lawn irrigation, so as not to exceed 13,000 gallons per day. This condition has also been added to right number **87-10866**, for which I have enclosed a copy.

Please feel free to contact me if you have any questions or comments. I can be reached at (208) 762-2802. If you do need to make a change, please advise me by June 11, 2021.

Sincerely,

Linda A. Werner
Water Resource Agent, Sr.

Enclosures: Preliminary Recommendation for 87-10866 and 87-10867
