RE: Water right number: 87-10460

Dear People:

Enclosed, please find our Notice of Error Reply. Although we have checked the place where we agree with the proposed recommendation and that no changes need to be made, we would like to provide additional information regarding the age of our well.

We have called your hot line and followed the recommendation to contact the assessor's office in Moscow. They are unable to provide information on the age of our well and referred us to the Planning and Zoning Department who were also unable to provide use with information related to the age of our well or to establish that there was a homestead dwelling on the property previous to the construction of the current house. Both departments stated that their records do not go prior to 1973 and 1993 respectively.

Our concern is that we have an anecdotal note in our records that the well was already in place when the current house was built in 1974. The previous owner, Robert Borgan, told us that there was a hand pump on the well and that the electric pump was installed when the current house was built. We found evidence of a previous dwelling on the property as we explored the fields. We have questioned at each level of our inquiry whether or not using the 1973 date for the well will create any difficulty for future determinations about this water right. We have been assured at each level that using the 1973 date will not pose any problem. However, we want to provide this documentation as a "footnote" to our claim in case at some point in the future, the estimated age of the well would be helpful.

Thank you for attention to this information. If you require any action from us, please let us know.

Sincerely yours,

Da Jin and Charlotte Sun
