RE: ADJUDICATION CLAIM NO. A36-07948 - CHANGE OF OWNERSHIP - PERKINS

Dear Claimant(s):

Pursuant to notification that you presently own the property in which the above-referenced Adjudication Claim(s) is appurtenant, the Department has changed the record on the above-referenced Adjudicated Claim. Earlier you had changed Adjudicated Claims No. 36-07060 and 36-14431. In doing a legal search, we found that another Claim A36-07948 was in Mr. Perkins' name also and the place of use was the same as A36-07060.

Please find enclosed a copy(s) of the computer record of our recommendation to the court noting the change in claimant.

Please review the record(s) and if you have any questions, please contact this office.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Judy Givens'.

Judy Givens
Adjudication Secretary

RE: ADJUDICATION CLAIMS 36-07060 AND 36-07948

Dear Mr Baxter

The only method currently available for you to change the department's recommendation to the Snake River Basin District Court is to file an objection with the Court on forms available through the department. On November 2, 1992 the department filed our recommendations with the court and we can no longer change those recommendations. The deadline for filing an objection with the District Court is May 1, 1992.

Based upon the information you provided in your November 13, 1992 letter describing the system as being a common mainline linking the canal shares diversion with the well diversion, it appears that a permissible place of use (P-P/U) recommendation may be applicable. A P-P/U would allow the use of water previously licensed to a specific portion of ground to be shifted to acres not previously licensed as long as those acres are within the P-P/U. If, in the future, you wished to transfer a portion of the P-P/U you would have to transfer a proportionate share of each right included within the P-P/U.

You may wish to obtain legal advice from your attorney as to how you should proceed as the department cannot advise you of the merits of your options. If you have additional questions concerning the department's recommendations please contact this office and I will assist you.

Sincerely

Kelly K. Christensen
Sr. Water Resource Agent

Ref. Claims 36-07060 and 36-07948

Mr. Kelly K. Christensen

Your letter of 9 Nov. 1992 referred to the arrangement of the irrigation system.

The canal and well water feed into a common line running the full length of the 240 acres.

The well is isolated from the line with a valve at the well. Is this an acceptable arrangement?

What would be required to establish permissible place of use to include all 240 acres.

How would this effect these rights?

Sincerely
DuBaxter

RE: BASIS FOR RECOMMENDATION FOR CLAIMS 36-07060 AND 36-07948

Dear Mr Baxter

Jim Stanton gave me your letter dated 11-4-1992 as your questions were primarily Snake River Basin Adjudication (SRBA) questions.

The two claims were originally licensed and then claimed for the ground listed on those rights. They are currently recommended to the SRBA District Court in the same manner. As the second right (36-07948) was to add additional water to the same ground as 36-07060 they cannot be transferred to new acres independent of each other.

To obtain the right to apply water from the well to the additional eighty acres depends upon several different factors. If the water delivery systems for the canal water and well water are tied together, then a possible solution would be to establish your rights within a Permissible Place of Use (P-P/U) which would include all 240 acres. If they are irrigated with independent systems, then the eighty acres should have been claimed as a new right and claimed within a P-P/U with the two ground water rights. This is assuming that the use falls within all the guidelines established under Idaho Code 42-1416(2).

Because the director's recommendation which included your rights was filed with the SRBA District Court on November 2, 1992, the only method to obtain one of the above described solutions is for you to file an objection to the recommendations of those rights.

An alternate solution would be to file an application for permit from the well for the additional eighty acres. This however is subject to guidelines established for new applications as affected by the current moratorium on new developments.

MICROFILMED

OCT 20 1994

BAXTER
PAGE 2
09-Nov-1992

In summary, you have three possible solutions. First, if your use falls within the guidelines for an expansion of a water right as established under Idaho Code 42-1416(2), then the only currently available method of changing the recommendations in the SRBA District Court is to file an objection. I am unable to advise you as to the possible success of this solution. You may wish to discuss your options with your attorney. The second option is the application for permit. As this is subject to the moratorium for new developments (in your case a previously non-licensed use) I again cannot advise you as to the actual outcome. The third choice is to do nothing. You currently have the legal right to irrigate the 160 acres from the well and the 80 acres from the canal. This, however, may not accurately describe your use as it exists.

If you have any further questions please contact this office and I will discuss them with you.

Sincerely

Kelly K. Christensen
Sr. Water Resource Agent

Southern Region Office
Twin Falls

David W Baxter
195E 1600 N. OREM UT 8405
Nov. 4, 1992

Idaho Dept. of Water Resources,

Southern Region Twin Falls Id.

at Jim Stanton.

In Jan. 1991 we purchased 240 acres at T9, R17E, S12, NW $\frac{1}{4}$, NW $\frac{1}{2}$ SW $\frac{1}{4}$ from Perkins. On transferring ownership of water adjudication claims R36-07060 from 1969 for 1.34 cfs & R36-07948 from 1980 for .87 cfs for a total of 2.21 cfs found both rights are from the same well & are assigned to the same 160 acres.

I asked Perkins why there was 2 rights & why assigned to the same 160 acres. Said he originally filed for 1000 gpm & only got 600 gpm, so he later filed for difference. Don't know why it was all assigned to the same 160 acres -

It was not clear to me what R36-07948 was, so I called Shelly Keen at Boise office, this right was still in Perkins name, so he had it changed to new owner -

I understand that this water can only be applied to the designated ground. If this is correct, then maybe the water should be reassigned.

Possible solutions may be -

1. combine rights & assign to full 240 acres -
2. assign both rights to the 240 acres -
3. assign 2nd right to additional 80 acres.
4. Leave as is -

would change result in a newer right, that would not be as good?

Have 160 shares of North Side Canal. Neither canal right or the well rights are adequate to irrigate the full 240 acres -

Please advise

Sincerely

RATE/VOLUME CALCULATIONS: (IRRIGATION)

1a. IRRIGATION RATE

ACRES 156 x 0.02 CFS/ACRE = 3.12 CFS
(Taken from p/u review)

1b. CALCULATIONS

DOES AMOUNT CLAIMED EXCEED 0.02 CFS/ACRE? Y() N(☒)

*** IF YES ADDITIONAL WATER USE FORM FILED AND ATTACHED? Y() N() ***

2. IRRIGATION CONSUMPTIVE USE

CLAIMED CONSUMPTIVE USE = 468.0 AF/A

ACRES 156 x CONSUMPTIVE VOL. AF/A FOR AREA 3 =
TOTAL CONSUMPTIVE USE 468 AF/A

3. IRRIGATION DIVERSION VOLUME

CLAIMED DIVERSION VOLUME = AF/A

ACRES 156 x DIVERSION VOL. AF/A FOR AREA 4 =
TOTAL DIVERSION VOLUME 624 AF/A

4. CALCULATIONS FOR USES OTHER THAN IRRIGATION:

SEE ATTACHED SHEET? Y() N()

REMARKS: (Include limitations on CONSUMPTIVE USE for combined rights.)

limited to 1" / acre and 4 AFA / acre when
combined with A36-07060

rec. AFA as licensed + claimed - see enclosed
analysis sheet

Limit of Diversion volume
is not needed since the
WR 36-7060 now has a expanded season
that would allow 640 AF Diversion

(500

MICROFILMED
FEB 05 1993

Overlap Analysis - Rt. 36-7948

Water used on entire system:

$$156 \text{ acres} - 2.21 \text{ cfs} = 0.0141667 \text{ cfs/acre}$$

Rt. 36-7060 - both pld & p/u overlap.

$$160 \text{ acres} - 1.34 \text{ cfs} = 0.008375 \text{ cfs/acre. Old rate per acre is less than current rate, Use all identified lands on Lic. of 36-7948.}$$

Capacity of well limits amount of water to be licensed.

$$\begin{aligned} \text{Capacity} &= 3.21 \text{ cfs} \\ \text{Lic. 36-7060} &= 1.34 \text{ cfs} \\ &0.87 \text{ cfs available for licensing under 36-7948.} \end{aligned}$$

Recommend R38 be applied to this license.

Volume:

$$156 \text{ ac.} \times 4.0 \text{ AFA} = 624.0$$

$$0.87 \text{ cfs} \times 1.9835 \times 245 = 422.8$$

License 36-7666 allows 611.0 AFA
(230 days $\times$ 1.9835 $\times$ 1.34 cfs) on 160 acres -
