Found: one system with 4 claims and ditch Co. water
CLAIMS A36-2316 - GWSOURCE A36-7963 wastewater source
A36-7123 - GWSOURCE A36-8050 GWSOURCE
NORTH SIDE CANAL Co. WATER.

Analysis:

1. Gov. Lot problems.

Claims A36-2316 and A36-7123 were licensed for 40 acres within Gov lots that only contained approx. 33 acres each. The recommended acres in excess of the 33 acres are recognised as existing but are to be shifted to the NE NW of Sec 7. This Quarter was not claimed by the canal Co. as the owner had indicated.

I recommend shifting the licensed acres to reflect what the department recognised as irrigated. I do not feel that the shifting of those acres reflect an expansion in the then existing P/U. These Gov. lots are, lots 6 & 7 in Sec 6, and lots 1 & 2 in Sec 7.

The original survey for gov. lots along the Snake River was readjusted with the initial lots being further divided eg lot 3 & 8 of Sec 7 was originally just lot 3). As far as acre determination per lot is concerned, the arbitrary boundary between those lots make accurate per lot recommendations difficult. eg (the lots 3 & 8 of Sec 7 together contain 13 acres (fairly accurate) but the recommended 10 & 3 split may not be accurate)

General Overview continued:

3. P/U per right analysis:

GROUNDWATER RIGHTS; A36-2316, A36-7123, AND A36-7963

The only P/U overlap found was in the S¹/₂ SE¹/₄, sec 6 between A36-7123 and A36-8050. (see attached land list)
 A36-7123 has a 0.011 CFS/Acre diversion rate and A36-8050 has a 0.0162 CFS/Acre diversion rate (see System Analysis Pg 3)
 Therefore both rights should include those acres in the acres per right (KØ6 remark) recommendation.

4. Diversion Rate Analysis:

The groundwater diversions were measured in 1987 and found to be 10.81 CFS (combined)
 the legal limit for foundations is ~~14.3~~ CFS $6.99\% \cdot 0.2 = 13.98$ CFS
 total of licensed GW rights is 10.36 cfs

Therefore the limiting factor for diversion rate (used in Remark EØ4) is 10.36 CFS.

5. Waste water right A36-7963

I am recognizing all 329 claimed acres as existing within the permissible P/U. I accept the 329 acres as being irrigated when the licensing field exam was conducted but recommend some different acre totals in the existing Q/Qs and Gov. Lots.

This right when combined with the GW rights is capable of supplying 13.99 cfs the legal limit for foundations ^{13.98} ~~14.3~~ CFS is therefore the limiting factor to be used in Remark EØ5.

MEMORANDUM

TO: FILE 36-8050
FROM: JOHN MCLEOD
RE: OVERLAP REVIEW AND CHANGES TO RECOMMENDATIONS
DATE: 14-APR-1989

An an overlap review for the above right was performed which resulted in changes of the examiner's recommendations for rate of diversion for irrigation use.

Two rights overlap this right. Right #36-7963 allocates 3.63 cfs, or .011 cfs per acre, for 329 acres, including 161 acres belonging to this new right.

Right # 36-7123 allocates 3.90 cfs, or .012 cfs per acre, for 320 acres, including 76 acres belonging to this new right.

There are 13 new acres belonging to this new right that has not previously been licensed. The diversion capacity of this new right is 10.81 cfs.

Therefore, 1.026 cfs is needed to bring the old lands allocated under right # 36-7963 up to the allowable limit of .02 cfs per acre; .608 cfs is needed to bring the old lands under right # 36-7123 up to .02 cfs per acre; and .26 cfs is needed for the thirteen new acres, for a total allocation of 1.84 cfs for 250 irrigated acres.

Since the combination of this right and the others does not exceed the diversion capacity of the system, condition R-17 is not required. Condition R-26 should be imposed to limit volume.
