RE: TRANSFER #3478 (36-02075 & 36-08068)

DATE: MARCH 26, 1992

I HAVE BEEN REVIEWING THESE WATER RIGHT FILES IN PREPARATION FOR THE ADJUDICATION REPORT FOR BASIN 36. I WOULD LIKE TO BRING TWO ITEMS UP FOR RECONSIDERATION AND POSSIBLE CORRECTION.

1. IN PART 2, PAGE 4 OF 8, SECTION B.3. DESCRIPTION OF PORTION OF RIGHT BEING TRANSFERRED; THE PLACE OF USE IS CORRECT IN IDENTIFYING NO ACRES IN THE SWNE AND 6 ACRES IN THE SENE. HOWEVER, THE NEXT SECTION, C.3. DESCRIPTION OF UNCHANGED PORTION OF RIGHT; THE CORRESPONDING PLACES OF USE ARE REVERSED AND INCORRECT. IT SHOULD READ: SWNE 40 & SENE 33. THE TOTAL ACRES LISTED HERE ARE CORRECT AT 556 ACRES.

2. THE TRANSFER AS GIVEN APPEARS TO CREATE AN EXPANSION IN THE PLACE OF USE ACRES. I WILL TRY TO EXPLAIN HERE AND SEND YOU A COPY OF THE TRANSFER WITH MY NOTES ALSO.

THE LICENSE 36-02075 WAS FOR 490 ACRES IN 1953. IN 1982, A FIELD EXAM WAS COMPLETED AND FOUND THE PLACE OF USE TO BE LIMITED TO A TOTAL OF 620 ACRES. THIS INCLUDED A COMPLETE OVERLAP WITH 36-02075. THIS IS CONFIRMED BY THE FACT THAT THE 36-08068 PERMIT INCLUDED A REQUEST FOR 637 TOTAL ACRES. THE LICENSE EVEN LIMITS THE DIVERSION TO A VOLUME RATE FOR 620 ACRES.

THE TRANSFER SHOWS THE UNCHANGED PORTION OF 36-08068 TO BE 556 ACRES AND THE AMOUNT OF TRANSFERRED ACRES AVAILABLE AS 75 ACRES. $556 + 75 = 631$ ACRES NOW IRRIGATED. THE LICENSE EXAM IN 1982 CONFIRMS THE COMPLETE OVERLAP OF THE ORIGINAL LICENSED ACRES. WHEN THE SECOND RIGHT WAS DEVELOPED THE APPLICANT HAD TO HAVE MOVED THIS EXTRA 11 ACRES BACK INTO THE PLACE OF USE WITHIN THE 620 ACRES; IF THAT CAN BE SHOWN IN THIS TRANSFER - IF NOT, THE CHANGE DID OCCUR BY UN-RECORDED TRANSFER ANYWAY.

I DID NOT ADDRESS THE EFFECT THIS HAS ON THE DIVERSION RATES INVOLVED. THAT SHOULD BE A MATTER OF CALCULATIONS IF NEEDED.

I DO NOT KNOW WHAT CAN BE DONE AT THIS POINT BUT I AM LETTING YOU KNOW BEFORE THE RECORDS ARE CHANGED ON THE DATA BASE TO SHOW THIS TRANSFER.

MEMORANDUM

TO: Glen Saxton
FROM: Gary Spackman *Gary*
DATE: March 22, 1989
RE: Application for permit in the name of Young & Young,
Partnership: Steve Young

In approximately the middle of February, 1989, Steve Young contacted me about two applications for pending transfer before the Department of Water Resources. Mr. Young had been helped by Southern Region in August, 1988, and had filed the transfers in September, 1989. Apparently because of the backlog of adjudication claims and other filings in Southern Region, the applications for transfer were not processed until December of 1988. The applications for transfer were forwarded to the state office approximately February 1, 1989.

One of the transfers proposes to move water from 40 acre tracts that were fully covered by water rights, and were later developed into circular systems. The transfer proposes moving the water from the corners that are no longer irrigated. A new circle will be constructed, partially covered by water transferred from the old circle corners. Approximately one-half the circle has never been irrigated. The other half of the circle has been irrigated as shown in aerial photographs. Approximately 7 acres of land per 40 acre tract is available for transfer.

As I reviewed the transfer, I discovered that the approximate one-half of the proposed circle which was previously irrigated was not listed as a place of use for any water right. I informed Mr. Young of this problem in the middle of February. Mr. Young was somewhat upset because the problem was not identified in Southern Region in August 1988. Mr. Young has already planted a crop, and needs to be able to irrigate the property.

DEC 15 1989

Mr. Young visited the State Office, and we discussed several alternatives. I first asked him to explore whether the land was irrigated by groundwater prior to 1963. Mr. Young found a 1962 aerial photo, and discovered that the lands had not been irrigated prior to 1963. As a result, he is not able to file an adjudication claim to validate use of water on the lands. We discussed the possibility of transferring water, but he does not own water rights elsewhere that could be transferred without some difficult restructuring. In our discussion, I suggested that he file an application for permit, and state on the application that

MICROFILMED
FEB 09 1993

it represents development that occurred prior to October 1, 1984. I also asked that he provide evidence of the development. He submitted an aerial photograph for the summer of 1984 which shows the lands as being irrigated, and submitted a statement from ASCS confirming that it was irrigated in 1984 from a groundwater source.

After consulting the policy and implementation plan, we determined that the application could be advertised and processed out of sequence. The application has been sent to Southern Region for publication. In addition, we issued a drilling permit to Young & Young, Partnership to drill a new well in connection with the transfer and the application for permit. The drilling permit is conditioned that diversion of water is not authorized until the application and transfer are both approved.

The Swan Falls water right policy and implementation plan discusses the status of developments that occurred prior to October 1, 1984, but for which an application was not filed with the Department of Water Resources until after July 1, 1985. The first reference to these applications is found on page 8, paragraph 4:

Applications filed after July 1, 1985 to validate water use in the trust water area for projects which were developed prior to October 1, 1984 will also not be processed in sequence with other filings for trust water. The depletion caused by such projects is assumed to have already occurred and need not be counted against the 20,000 acres/year limitation for the year in which the processing occurred, but all other public interest requirements of 42-203C, Idaho Code, must be evaluated.

Applications of this status are again referred to on page 11 in the first full paragraph:

. . . Applications filed after July 1, 1985 for development completed prior to October 8, 1984 will not be included in the 20,000 acres/year limitation. These projects meet the physical requirements to have IPCo's hydropower rights subordinated to them, and the depletion in the flow to the hydropower rights began to occur in the previous years. This policy allows unauthorized developments in place at the time of the signing of the Swan Falls Agreement to be reviewed outside of the sequential process and based upon priority date.

DEC 15 1989

The Young & Young application is being processed out of the order of sequence. A question has been raised about the extent and nature of review under all the public interest requirements of 42-203C, Idaho Code. The order of review is set forth beginning in Rule 5,2. of the Water Appropriation Rules and Regulations. Rule 5,2,1. states that "An application for permit or permit being reprocessed will be presumed to not cause a

MICROFILMED
FEB 09 1993

significant reduction if the Director determines that it complies with both the individual and cumulative test for evaluating significant reduction. . . ." Rules 5,2,1,1. and 5,2,1,2. set forth the individual and cumulative tests for evaluating significant reduction. The cumulative test for evaluating significant reduction is dependent upon the staged development of 20,000 acres per year. The policy and implementation plan has already stated that the class of application filed by Young & Young will not be considered in the 20,000 acre/year total. As a result, the cumulative test has no bearing on the application.

The test for determining the significant reduction under the individual test is important to this application:

An irrigation project of two-hundred (200) acres or less located anywhere in the Snake River Basin above Murphy Gage proposing to use trust waters presumed to not reduce the flow at Murphy Gage two (2) acre-feet per day. The presumption of this section is not applicable to applications or permits to be reprocessed which the Director determines to be part of the larger development.

The application filed by Young & Young Partnership proposes development of less than 200 acres. In consulting the name index, however, I find that there are at least eight water rights owned by Roy and Steve Young, who are the partners in Young & Young Partnership. Application 36-8251 also proposes development in the trust water area. This development has not yet taken place. In addition, Steve Young has represented to me that he and his brother farm approximately 4000 to 5000 acres. The issue presented is: What should be our interpretation of a "larger development" as stated in Rule 5,2,1,1?

I propose the following interpretations of the rule:

1. That the word development in the phrase "larger development" only refer to total development proposed in the trust water area.

2. That all developments completed prior to October 1, 1984 not be included in the evaluation of total development.

In other words, I propose that "development" be construed to mean any development that has occurred after the exemption deadlines, or proposed development that is not yet complete.

I espouse the above interpretations because:

1. The overriding philosophy behind the policy and implementation plan is to approve as many applications or permits as possible without lengthy review. I have heard it said that we intended to move as many filings as possible from right to left

MICROFILMED
FEB 09 1993

in the columnar categories attached to the policy and implementation plan.

2. While the applicant failed to legally satisfy the requirement of filing prior to July 1, 1985, his failure is a procedural flaw, and I believe he should not be unduly penalized for the mere oversight of failing to file.

3. I believe that we can simplify our procedures by setting an administrative boundary in reviewing the "larger development" beginning at the dates of exemption; July 1, 1985 for permits, October 1, 1984 for applications, and in rare cases, November, 1982 for applications where there has been a substantial expenditure. I do not believe that a development of less than 200 acres, developed prior to 1984, should be included in the "larger development" accumulation.

The last reasoning raises another question about how we will police our own "larger development" and "family farming tradition" review criteria. Will we start voiding applications when family developments are swallowed up by larger conglomerates? Will we void the approvals, and return the water back to the public domain similar to BLM's DLE and Carey Act repossessions? In this case, I could probably obtain information from Steve Young which shows that the development, at the time it occurred, was not part of a 4000 acre development.

I believe that we should grandfather, if possible, all of those developments which occurred before the exemption dates. I also believe that if someone misses a filing date, we should qualify the application as a de facto exemption. I think we should concentrate our efforts on developments that occurred after the exemption cutoff dates.

Will you provide some direction?
