Dear Claimant(s):

In the past you submitted the claim(s) identified with the number(s) shown above your name and address at the top of this letter. You indicated on the claim(s) that the basis for establishing the water right(s) was Beneficial Use, meaning the water right was not previously confirmed by a decree, water right license or permit before you filed the claim(s).

The purpose of this letter is to request evidence supporting the priority date(s) you have claimed. The enclosed pamphlet describes what this means. While I encourage you to read all of the pamphlet, I direct your attention to the right-hand half of the pamphlet after you open it. There you will find two sections: What Kind of Evidence is Required, and Some Examples of Documents which May Be Evidence of the Priority Date. These sections tell you what must be submitted. The other sections tell you why the evidence is necessary and what the consequences of not submitting the evidence could be.

Please submit the requested evidence by November 1, 1990. When returning to the Department please reference all documents with the claim(s) identification number(s) listed above.

If you have questions not addressed by the pamphlet or need other technical assistance, please feel free to contact this office. For advice on your water right(s), please contact your attorney.

Sincerely,

Allen Merritt, P.E.

Dave, of the eight X-prefix records from Temp, this is the only one where I had a question. Record X36-10038 does reflect the water right following the transfer. I am sure this water right is in the decreed table. One of two things could happen. The record could be deleted from decreed. Second and preferable is to modify the record in wrPhysical Right after the record is there to reflect the approved transfer and the X-record. If you have another solution to capture what is in the X-record, I would gladly listen.

Good morning!

Here's what I have found. Transfer 4889 was approved on 1/31/97. It involved rights 36-07562 and 36-07622. The transfer split off portions of these irrigation rights to create a dairy. One of the approval conditions states:

That portion of Right No. 36-10038 described as 0.07 cfs for stockwater use is superceded by this approval and shall be considered abandoned.

So, the decreed right did not capture the approved transfer, as it still shows .07 for stockwater use.

Hope this is what you were looking for. If can do anything else to assist you, just let me know.

Subject: A36-10038

Good morning Trish,

I'm dealing with Temp records and putting data in SQL. Of the X-prefix records, only A36-10038 remains. My solution for an answer rests with the claim file apparently still at your office. The water right was decreed in '98. My question is did the recommendation/decreed capture the approved transfer? I'm not sure of the timing of the transfer approval.

FYI details; an X-prefix record in ADABAS is in the Temp File. I could not determine from the blank prefix record whether the transfer was incorporated or not. A Basin 43 and two other Basin 36 records in the same boat were incorporated according to the blank prefix comments.

Thanks for your help,

Don
