Dear Claimant(s):

In the past you submitted the claim(s) identified with the number(s) shown above your name and address at the top of this letter. You indicated on the claim(s) that the basis for establishing the water right(s) was Beneficial Use, meaning the water right was not previously confirmed by a decree, water right license or permit before you filed the claim(s).

The purpose of this letter is to request evidence supporting the priority date(s) you have claimed. The enclosed pamphlet describes what this means. While I encourage you to read all of the pamphlet, I direct your attention to the right-hand half of the pamphlet after you open it. There you will find two sections: What Kind of Evidence is Required, and Some Examples of Documents which May Be Evidence of the Priority Date. These sections tell you what must be submitted. The other sections tell you why the evidence is necessary and what the consequences of not submitting the evidence could be.

Please submit the requested evidence by November 1, 1990. When returning to the Department please reference all documents with the claim(s) identification number(s) listed above.

If you have questions not addressed by the pamphlet or need other technical assistance, please feel free to contact this office. For advice on your water right(s), please contact your attorney.

Sincerely,

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is Tom Church; residence, Burley, Idaho; occupation, wholesale business
and farmer; postoffice address, 1535 Oakley Ave., Burley, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Individual.

Ans. Permit #G23953; date of permit, 4/2/53; date of priority, 3/30/53.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. The source of water is a drilled well in the SE 1/4 SW 1/4, Sec. 28, T6S-R22E.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. Well is drilled to a depth of 240' and water is lifted from 190'. This is a 20" hole, cased approximately 20'. Irrigation distribution is all by a gravity system. There is no sprinkler. The distribution is by a private ditch and the ditch is capable of carrying 200" each. There is a Butane pump on this works. I have never had the well measured but from my experience in seeing wells tested, I think it ought to be pumping 250". If I put on more motor, it will pump 300" or almost an unlimited amount through this big a hole.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Irrigation only.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. The amount being used is the minimum I can get along with for proper irrigation.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. This was assigned to me from Colleen Kerbs.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Work started immediately after the desert entry was allowed and carried right through continuously.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

REPLY TO ROGER LING'S LETTER DATED OCTOBER 10, 1997

re: paragraph 1

The transfer of the 8 acres from BLM property to other ground owned by Mr Woodland, would not reduce the number of acres recognized under the expansion claim 36-15179 as this transfer is 'moving' those acres to another location, not just drying up 8 acres.

The BLM has filed an objection to those 8 acres and the resolution of that objection is the transfer. The 'new' place of use will eventually become the decreed place of use assuming that the transfer is approved by the department's state office allocations section. The transfer is currently being processed in the southern region office by Corey Skinner and myself and is nearly completed as of this date. I do not believe that an objection by the claimant concerning the same transfer is necessary.

re: paragraph 2

The second issue raised in the letter indicates that the existing licensed rights are sufficient to cover the 491 recommended acres.

Right 36-02674 was originally licensed for additional water for the same, or nearly the same place of use as 36-02567 (see Attachment A land listing). Also by comparing the adjudication recommendation to the previously licensed acres, as shown on Attachment A, you can note that accomplished transfers were recognized.

Attachment B is the APPLICATION FOR PERMIT which states on page 2 item 13 that other appurtenant rights to the lands irrigated is G-31043 (renumbered to 36-02567).

Also, attachment C which is the REPORT OF EXAMINER for permit 33135 (renumbered to 36-02674), indicates on the second page that this right is supplemental to G-31048 (renumbered to 36-02567). It also indicates that additional ground was being irrigated at that time. The 122 acre limit was based upon the permitted acres.

As the acres recommended for 36-02674 did not exactly match the licensed acres for 36-02567 and there was no notation or explanation for the difference, I compared the licensed place of use against the 'found' place of use determined from my 6-24-91 field examination. Minor discrepancies were found in all overlapping quarter/quarters. The additional 'found' acres beyond the licensed acres for 36-02567 were recognized as non-overlapping acres for 36-02674. I identified 20 acres as non-overlapping acres during my original recommendation.

COPY

This review identifies 22 acres using the same criteria. The net result of the 2 acre difference, if changed, would be that the expansion claim would be reduced to 59 acres from the original 61 acres, and the combined right remarks for both rights would be changed from 222 acres to 224 acres.

I understand that the Idaho Dept. of Water Resources (I.D.W.R.) cannot complete such a transfer of water under a water right without the notarized consent of the landowner where the water right describes land not owned by the transfer applicant.

On behalf of the United States and the U.S.D.I., BLM, my notarized signature below provides the necessary consent to facilitate the transfer.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection items 3, 3a., 9, 9a., and 10 and all allegations of the objection regarding these items, IDWR responds as follows:

IDWR lacks sufficient information to form a belief as to whether any or all of the lands upon which water is used pursuant to this right are owned by the United States. IDWR further lacks sufficient information to form a belief as to whether the claimant's use of any lands owned by the United States is the

subject of an agreement between the United States and the claimant. IDWR admits that if the place of use is reduced by the court, the quantity of water allocated to this water right should likewise be reduced. IDWR denies the objection and all allegations of the objection not expressly admitted herein.

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

Box 9 and Box 9a were checked because the Place of Use includes federal land. The claimant has no valid authorization for this claimed use of the federal property. Boxes 3, 3a, and Box 10 were checked because the quantity of water is overstated to the extent the water would be improperly used on federally owned land.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The Directors report should be changed to recommend disallowance of this claim in part. The Place(s) of Use, described as, T06S R22E S29 (NE SW) 40.0, S30 (SE NE) 4.0, should be deleted.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

RE: PLACE OF USE DISCREPANCY DISCUSSION BY PHONE ON 10-2-92

Dear Mr Woodland

Enclosed is the ASCS photo that I used to establish your recommended place of use. What is needed is to establish any acres that were farmed prior to 1987 and not included within the outlined boundary. Another possible difference may be in the number of acres I have recommended within a specific forty acre tract. Please review the recommendation with that in mind also.

As I stated during our phone conversation, if all goes well with my Mother, I should be back to Twin Falls by the end of next week.

Sincerely

CLAIMS - A36-2207

A36-2567

A36-2674

EXP. CLAIMS - A36-10197

A36-15179

The system ^{was} originally irrigated from ^{the} P/D in Sec 28. When the well in Sec 19 was licensed, it overlapped some of the acres covered by A36-2567 and added new acres within some Q/Qs to have the licenses reflect the actual irrigated acres in Sec 19, Sec 30 and the W $\frac{1}{2}$ of Sec 29.

As the property is now under one owner, he has elected to claim this as a permissible place of use system.

The expansion claims are for lands irrigated since the licensing field examination for 36-2207 on 8-11-59. A hand sketch of the system shows gravity irrigation and conregation directions for both Q/Qs.

A36-10197

this claim was for ground in NE/SW, Sec 28 with a claimed priority date of 6-1-58. Based upon the above field exam date the recommended priority date is 8-11-59 for the entire 36 claimed acres.

A36-15179

The claimed priority date was Mar 15, 1975. As the mentioned field exam indicated that ^{the ground} was irrigated as early as 1958, I recommend accepting the claimed priority date for the claimed acres.

The total found acres were ~~489~~⁴⁹¹. The total claimed acres (counting overlap acres once) is 506 the difference of 17 acres is 3.5%. This is within the Departmental guidelines therefore all claims are recommended as claimed with the P/A being defined upon the Q/Q land list and the Aerial photo.

Calculations For the expansion Acres

Both expansion rights are based upon license 36-02207 which was licensed at the system capacity of 3.44 CFS for 172 Acres. Both claims fall within the rate-per-acre guidelines established for by the Dept. for sprinkler system irrigation which was a part of the then existing system.

RECOMMENDED DIVERSION RATE CALCULATIONS.

For A36-10197

$$\begin{aligned} \text{ACRES} + \text{EXP. ACRES} &= \text{SYS. ACRES} \\ 172 + 36 &= \underline{208 \text{ ACRES}} \end{aligned}$$

$$\begin{aligned} \text{DIV. RATE} \div \text{ACRES} &= \text{RATE-PER-ACRE} \\ 3.44 \div 208 &= \underline{0.0165 \text{ CFS/ACRE}} \end{aligned}$$

$$\text{RATE-PER-ACRE} * \text{ACRES} = \text{DIV. RATE}$$

$$0.0165 \text{ CFS/A.} * 36 = 0.595 \text{ } \underline{\underline{0.60 \text{ CFS}}}$$

For A36-15179

$$208 + 61 = \underline{269 \text{ ACRES}}$$

$$3.44 \div 269 = \underline{0.0128 \text{ CFS/ACRE}}$$

$$0.0128 * 61 = \underline{0.78 \text{ CFS}}$$

Expansion Calculations

Both exp. Claims are based upon license 36-2207 which was licensed at system capacity of 3.44 CFS & 172A

Rate per acre calculations

1) for A36-10197

$$172 + 36 = 208 \text{ A total}$$

$$3.44 / 208 = 0.0165 \text{ CFS/A} \times 36 = 0.595 \text{ CFS} \approx 0.60 \text{ CFS}$$

2) For A36-15179

$$208 + 61 = 269 \text{ A}$$

$$3.44 / 269 = 0.0128 \text{ CFS/A} \times 61 = 0.78 \text{ CFS}$$

P/D in Sec 28 was last measured during the field exam for 36-2567 and ~~was determined~~ the system capacity was determined to be 5.24 CFS.

P/D in Sec 19 was last measured during the field exam for 36-~~2674~~ 2674 and the system capacity was determined to be 5.00 CFS

total system capacity therefore is 10.24 CFS.
