Re: Water measurement

Dear Mr. Bailey:

During our telephone conversation on June 7, 1995, you told me you pumped groundwater with a 2 horsepower pump from approximately 40 to 60 feet at approximately 60 psi pressure. Assuming your pump and motor is 100% efficient, which it could not be, you would still only be pumping approximately 40 gallons per minute. The threshold above which you must measure is 90 gallons per minute.

You are excused from measuring your water withdrawals in 1995.

Water right number 36-13645 may need to be amended to reflect a reduced diversion rate.

Sincerely,

Gary Spackman

Dear Claimant(s):

Please find enclosed your receipt and a copy of a computer generated claim based on the information from your original claim(s) which has been entered in our computer records.

Please review the computer generated claim for accuracy. In a few instances clarifications may have been added by the Department at the time of data entry. If you have any questions or objections regarding the computer record of your claim(s), please contact this office.

Yours truly,

A handwritten signature in cursive script, appearing to read 'Judy Givens'.

SRBA CLAIM
36-13645

Dear Ms. Bailey:

Pursuant to your recent request, I have researched the Department records to determine the water right(s) that are appurtenant to the dairy that you and Chad Bailey own. Examination of department records revealed that a claim, 36-13645, in the name of Chad or Susan Bailey has been recommended for partial decree in the Snake River Basin Adjudication. This particular claim is in the final stages of preparation for being decreed. You should be receiving notification and a copy of your decreed water right in the near future. Department records show claim 36-13645 for the diversion of groundwater for the following amounts and uses:

0.08 cfs for stockwater use (250 dairy cattle)
0.04 cfs for domestic use (one home)
Total diversion rate = 0.08 cfs

Department records currently list your old address (Route 2, Box 198, Rupert ID) and do not reflect your new "grid" address (428 South, 200 West, Rupert ID). I have enclosed a change of address form for your use. Completing this form and returning it to the department as soon as possible will help to insure that your proper address is recorded on your water right as quickly as possible.

As we discussed during our telephone conversation, the Snake River Basin Moratorium currently prevents the department from processing applications for the development of nearly all new water uses. Therefore, the department could not process an application for additional water use for your expanded dairy operation. However, an existing water right could be modified by transfer pursuant to §42-222, IDAHO CODE, to provide water for your expanded dairy operation. For your use and reference I have enclosed some documents relating to the transfer process.

December 4, 1996
PAGE 2

SRBA CLAIM
36-13645

As we discussed, our office has a computer program that calculates the amount of water typically needed for a dairy operation. The information needed to run the computer program includes the following:

- *number of milking cattle
- *number of nonmilking cattle
- *dimensions of waste lagoon
- *type of cow washing system
(manual, automatic, or sprinkler)

In addition, information about your well may also prove helpful. This information would include pump horsepower, depth to operating water level, and operating discharge pressure.

I have included copies of business cards that show our office's current and future address. If you have any questions, or if I can be of any other assistance, feel free to contact me at your convenience.

Sincerely,

Corey Skinner, EIT
Dam Safety Section
