Vicki & Chris,

The parties have agreed that an SF5 can be prepared for this right that adds two remarks. The first is condition #9 of approval of Transfer 5019 which I have highlighted on the attached copy. The second should read, "The impoundment of water pursuant to this water right shall not be increased in size over that existing as of the date of the approval of Transfer 5019." Al & Craig, please confirm this language is OK.

Contact me if there are any questions.

MEMORANDUM

FROM: PAM SKAGGS/STATE OFFICE

SUBJECT: TRANSFER 5019

DATE: December 11, 1997

OK 

=====

Transfer 5019 was originally filed to change a point of diversion and consolidate the use under all or Right 37-00713D and a portion of Right 37-00315A, splitting the right into parts C and D. Upon further review by region staff, the transfer application was amended to include an existing storage uses developed on the same system and parcel of land.

Region staff confirmed ownership, extent and location of irrigation use, excess flow analysis and adjustments to final recommendations. (See Allen Merritt's Memo of 11-06-97.) The change in point of diversion relocates the pump on the applicant's property. The storage uses reflect the previous development of the pond adequately compensated for by the reduction of irrigated acres and the rate of diversion. All changes have been completed and no new physical changes will occur through this approval.

Recommended conditions include watermaster control, multiple points of diversion/measuring & lockable devices, irrigation overlap, combined limits, conveyance portion, future mitigation and standard transfer conditions.

Water Right(s): 37-00713D

In the Name of: GIRTON

SUBJECT: Review and Recommendation

The purpose of this transfer is to change a point of diversion, consolidate rights remaining after a sale on to lands retained by applicant and to record the use of the water as historically used in a pond. The rights are presently delivered from the Broadford Slough which is administered as part of the Big Wood River. The change in point of diversion relates to moving from a pump located on adjacent land to a pump located at a pond on applicant's property. (The change in pumps has already occurred) The gravity diversion which historically serves a portion of the place of use will not change.

The transfer was first filed in Dec 96 to make a simple point of diversion change; the original transfer was advertised without protest. On further review it appeared that the transfer should include other elements in an effort to describe what was actually going on at the place of use (pond use, etc.) The transfer was amended in July 97; this amended application was advertised without protest.

ANALYSIS

The ownership of the rights involved match with what the watermaster delivers to Girton. The watermaster delivers the involved rights as follows:

37-00315

Girton 25"
Duininck 60"
Peck 15"

Total 100"

37-00713

Girton 25"
Duininck 25"
Gardner 150"

Total 200"

The deeds support these amounts.

Review of the Girton property finds that he presently owns approx. 22.6 acres (21.7 acres in NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 35 and 0.9 acres in NW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 36, Twp.02N, Rge.18E.)

Review of the site, the documents in the file and the NAPP has yielded a determination that no more than 19.3 acres are or have been irrigated and that a 3 acre foot pond exists.

An excess flow analysis was conducted using available information

37-00315 D, 37-00713 D, 1 #5019

and finds that for irrigation of the 19.3 acres 0.92 cfs is justified.

It appears that the observed change creating the pond most probably was taken out of irrigated land. I understand that this conversion generally is an equivalent exchange. No information was provided about lining in the pond but it appears that the water level is relatively close to the surface (Girton well log - static level 6') With the reduction of irrigation diversion rate (1.00 to 0.92 cfs) this appears adequate to offset the pond use with associated impacts.

RECOMMENDATION

It is recommended that the transfer be approved as:

For Irrigation:

37-00713D	0.42 cfs for irrigation
37-00315D	0.50 cfs for irrigation
Total	0.92 cfs for irrigation

Lands Irrigated:

18.7 acres within NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 35, Twp.02N, Rge.18E, B.M.
0.6 acres within NW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 36, Twp.02N, Rge.18E, B.M.
Total 19.3 acres

Point(s) of Diversion:

2 points within NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 35, Twp.02N, Rge.18E, B.M.

For Storage:

37-00713D	3.0 acre foot on stream pond used for Recreation, Aesthetics, and Fire Protection
-----------	---

Place of use/point of diversion:
NE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 35, Twp.02N, Rge.18E, B.M.

Additionally the transfer should be subject to the following conditions:

- Subject to SRBA.
- Under control of watermaster of District 37.
- Adequate control works and measuring devices must be maintained at both diversions.
- 0.10 cfs of rights is for conveyance loss.
- If loss through pond determined to exceed 0.08 cfs then excess may be required to be mitigated or pond lined.
