

**DIRECTOR'S REPORT OF DEFERRED
DE MINIMIS STOCK WATER USE**

Claim No. 55-13995

In Re SRBA
Twin Falls County Civil Case No. 39576

Report to the SRBA District Court

Prepared by the Idaho Department of Water Resources
Gary Spackman, Director
Craig L. Saxton, Manager, Adjudication Section

September 13th, 2021

DESCRIPTIVE SUMMARY

This is a Director's Report of Deferred *De Minimis* Stock Water Use submitted by the Director of the Idaho Department of Water Resources (IDWR).

INTRODUCTION

A Motion for Determination of Deferred *De Minimis* Stock Water Use (Motion) and Notice of Claim to Water Right for water right claim no. 55-13995 were submitted to the Court on September 28, 2020. IDWR published a notice of the pendency and purpose of the Motion. *See Affidavit of Publication*, filed simultaneously herewith. The Director has now completed his examination of the claim. The examination for the above-mentioned water right claim was conducted by Craig L. Saxton, Adjudication Section Manager, on behalf of the Director. The materials used in and results of the examination of the elements of the claim are discussed below.

DISCUSSION

Priority Date

Tim Lequerica, President of Lequerica & Sons Inc., filed claim no. 55-13995 on behalf of Lequerica & Sons Inc., for the instream stockwater use. The claimed priority date of April 17, 1924, is supported by land patent #936621¹ issued to Golda R. Cooper on April 17, 1924, which includes the claimed place of use. The priority date is recommended as claimed.

Points of Diversion

The claimed points of diversion are in Township 8S, Range 5W, Sections 4, Lot 10 (SWSW), representing the location of the spring claimed as the point of diversion. The point of diversion is recommended as claimed.

¹ Land Patents #936621 was established under the Homestead Act of 1862. To receive a patent, applicants were required to live on the property for 5 years for the purpose of settlement and cultivation. It's reasonable to assume that applicants would have stock that drank from available water sources. IDWR has regularly accepted land patents as evidence of instream or non-diverted stock water use.

Source

The recommended source of water is a spring tributary to sinks and can be verified using the USGS quadrangle maps.

Place of Use

The claimed place of use is in Township 8S, Range 5W, Sections 4, Lot 10 (SWSW), consistent the location of the spring source. The claimed place of use is entirely within Owyhee County parcel number RP08S05W046000. According to the Owyhee County property records Lequerica & Sons Inc. owns the parcel.

Quantity

The quantity claimed is for 0.02 cfs. The typical diversion rate recommended for claims for watering stock directly from a stream is 0.02 cfs. This rate is consistent with diversion rates claimed for *de minimis* instream stockwater use.

Purpose and Period of Use

The extent of the water use can be described as in-stream *de minimis* stockwater use where the stock drink directly from the spring. Water used for stockwater purposes is generally recommended for year-round use if year-round use is claimed.

CONCLUSION

There is sufficient evidence to recommend claim 55-13995 for the instream watering of livestock from a spring tributary to sinks.

Respectfully submitted this 13th day of September, 2021.

CRAIG L. SAXTON
Manager, Adjudication Section

CERTIFICATE OF SERVICE

I certify that on September 13, 2021, I caused to be served a true and correct copy of this Director's Report of Deferred *De Minimis* Domestic or Stock Water Use, to the following persons, in the manner indicated and addressed as follows:
