

**DIRECTOR'S REPORT OF DEFERRED
DE MINIMIS STOCK WATER USE**

Claim No. 55-14000

In Re SRBA

Twin Falls County Civil Case No. 39576

Report to the SRBA District Court

Prepared by the Idaho Department of Water Resources
Gary Spackman, Director
Craig L. Saxton, Manager, Adjudication Section

September 13th, 2021

DESCRIPTIVE SUMMARY

This is a Director's Report of Deferred *De Minimis* Stock Water Use submitted by the Director of the Idaho Department of Water Resources (IDWR).

INTRODUCTION

A Motion for Determination of Deferred *De Minimis* Stock Water Use (Motion) and Notice of Claim to Water Right for water right claim no. 55-14000 were submitted to the Court on September 28, 2020. IDWR published a notice of the pendency and purpose of the Motion. *See Affidavit of Publication*, filed simultaneously herewith. The Director has now completed his examination of the claim. The examination for the above-mentioned water right claim was conducted by Craig L. Saxton, Adjudication Section Manager, on behalf of the Director. The materials used in and results of the examination of the elements of the claim are discussed below.

DISCUSSION

Priority Date

Tim Lequerica, President of Lequerica & Sons Inc., filed claim no. 55-14000 on behalf of Lequerica & Sons Inc., for the instream stockwater use. The claimed priority date of May 27, 1920, is supported by land patent #751618¹ issued to Lee Williams on May 27, 1920, and includes all the claimed place of use. The priority date is recommended as claimed.

Points of Diversion

The claimed points of diversion are in Township 9S, Range 5W, Section 23, SE $\frac{1}{4}$ NE $\frac{1}{4}$ and represent the beginning points and ending points for instream stockwater. The claimed

¹ Land Patent #751618 was established under 1877 Desert Land Act allowed settlers in some arid regions to acquire up to 640 acres of public lands by purchase if they irrigated the land. It is reasonable to assume that applicants would have stock that drank from available water sources.

points of diversion were verified by identifying stream locations using USGS Quadrangle maps. The points of diversion are recommended as claimed.

Source

The recommended source of water is Corral Creek tributary to Cabin Creek can be verified using the USGS quadrangle maps.

Place of Use

The claimed place of use is within Township 9S, Range 5W, Section 23, SE¼NE¼, and includes the quarter-quarter containing the stretch of stream between the beginning and ending points that Corral Creek passes through.

The claimed place of use is entirely within Owyhee County parcel number RP09S05W230001. According to the Owyhee County property records Lequerica & Sons Inc. own the parcels.

Quantity

The quantity claimed is for 0.02 cfs. The typical diversion rate recommended for claims for watering stock directly from a stream is 0.02 cfs. This rate is consistent with diversion rates claimed for *de minimis* instream stockwater use.

Purpose and Period of Use

The extent of the water use can be described as in-stream *de minimis* stockwater use. Water used for stockwater purposes is generally recommended for year-round use if year-round use is claimed.

CONCLUSION

There is sufficient evidence to recommend claim 55-14000 for the instream watering of livestock from a Corral Creek tributary Cabin Creek.

Respectfully submitted this 13th day of September, 2021.

CRAIG L. SAXTON
Manager, Adjudication Section
