DESCRIPTIVE SUMMARY

This is a Director's Report of Deferred *De Minimis* Stock Water Use submitted by the Director of the Idaho Department of Water Resources (IDWR).

INTRODUCTION

A Motion for Determination of Deferred *De Minimis* Stock Water Use (Motion) and Notice of Claim to Water Right for water right claim no. 55-14007 were submitted to the Court on September 28, 2020. IDWR published a notice of the pendency and purpose of the Motion. *See Affidavit of Publication*, filed simultaneously herewith. The Director has now completed his examination of the claim. The examination for the above-mentioned water right claim was conducted by Craig L. Saxton, Adjudication Section Manager, on behalf of the Director. The materials used in and results of the examination of the elements of the claim are discussed below.

DISCUSSION

Priority Date

Tim Lequerica, President of Lequerica & Sons Inc., filed claim no. 55-14007 on behalf of Lequerica & Sons Inc., for the instream stockwater use. The claimed priority date of July 21, 1921, reflects the issue date of land patent #814783 issued to Northern Pacific Railway Co. which includes all the claimed place of use.

The claimed use is within Township 8S, Range 5W, Section 35, NE $\frac{1}{4}$ NE $\frac{1}{4}$. In 1926, Township 8S, Range 5W, Section 34, immediately adjacent to the claimed place of use, was acquired by Willam J. Shea through Land Patent #990180¹ issued December 6, 1926.

It is reasonable to presume that the cattle ranged on nearby public lands and unoccupied lands owned by the Northern Pacific Railway Co. when Land Patent #990180 was issued.

¹ Land Patent #990180 was established under 1916 Stock Raising Homestead Act which allowed for homesteads not based on farming land but instead on raising cattle.

The priority date is recommended as December 6, 1926, consistent with the issue date of Land Patent #990180.

Points of Diversion

The claimed points of diversion are in Township 8S, Range 5W, Section 35, NE $\frac{1}{4}$ NE $\frac{1}{4}$, representing beginning points and ending points for instream stockwater. The claimed points of diversion were verified by identifying stream locations using USGS Quadrangle maps. The points of diversion are recommended as claimed.

Source

The recommended source of water is Cabin Creek tributary to Juniper Creek and can be verified using the USGS quadrangle maps.

Place of Use

The claimed place of use is within Township 8S, Range 5W, Section 35, NE $\frac{1}{4}$ NE $\frac{1}{4}$, and includes the quarter-quarter containing the stretch of stream between the beginning and ending points the unnamed stream that passes through.

The claimed place of use is entirely within Owyhee County parcel number RP08S05W350001. According to the Owyhee County property records Lequerica & Sons Inc. own the parcels.

Quantity

The quantity claimed is for 0.02 cfs. The typical diversion rate recommended for claims for watering stock directly from a stream is 0.02 cfs. This rate is consistent with diversion rates claimed for *de minimis* instream stockwater use.

Purpose and Period of Use

The extent of the water use can be described as in-stream *de minimis* stockwater use.

Water used for stockwater purposes is generally recommended for year-round use if year-round use is claimed.

CONCLUSION

There is sufficient evidence to recommend claim 55-14007 for the instream watering of livestock from Cabin Creek tributary to Juniper Creek.

Respectfully submitted this 13th day of September, 2021.
