13. Other Water Rights Used:

14. Remarks:

Rights 37-481D and 37-482J when combined are limited to the irrigation of 387.0 acres within the place of use described above in a single irrigation season.

The total instantaneous diversion of water from all points of diversion under Rights 37-481D, 37-482J, 37-483D, 37-577BP, 37-917, 37-11975, 37-11976, 37-11977 and 37-11978 when combined shall not exceed 26.74 cfs, a total annual maximum diversion volume of 4172.0 af at the field headgate, for the irrigation of 596.0 total acres.

Rights 37-481D, 37-482J, 37-483D, 37-577BP, 37-917, 37-11975, 37-11976, 37-11977 and 37-11978 when applied by sprinkler system shall not exceed a maximum diversion rate of 11.92 cfs and 2086.0 af at the field headgate, and when applied by surface application shall not exceed a maximum diversion rate of 23.84 cfs and 4172.0 af at the field headgate. Any portion of these rights in excess of the maximum applied rates of diversion and volumes at the field headgate shall be limited to use for conveyance losses and shall not be diverted from the river unless required for the delivery of the applied rate of water to the field headgate.

Rights 37-481D, 37-482J, 37-483D, 37-577BP, 37-917, 37-11975, 37-11976, 37-11977 and 37-11978 when combined with supplemental ground water Rights 37-2713 and 37-7356 shall not exceed the maximum applied diversion rates and volumes described above, and the irrigation of 596.0 acres to be specifically identified by the right holder prior to each irrigation season.

A portion of Right 37-577BP, 1.40 cfs, shall continue to be diverted into the Hiawatha Canal to mitigate the removal of Rights 37-481D, 37-482J, 37-483D, 37-577BP, 37-917, 37-11975, 37-11976, 37-11977 and 37-11978 diverted into Cove Canal and Kohler Ditch under Transfer 68526 until such time as the canal ceases operation. The Department retains jurisdiction in this matter for a period of five (5) years to modify the diverted amount should justification for a lesser amount be provided by the right holder within that period of time.

Use of water under this water right will be regulated by the watermaster of State Water District No. 37, Big Wood River.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement and lockable controlling works for all authorized points of diversion. The means of measurement and controlling works must be suitable for control of the diversions and acceptable to the watermaster.

This right when combined with all other rights shall provide no more than 3.5 afa per acre when applied by sprinkler system and 7.0 afa per acre when applied by surface application at the field headgate for irrigation of the lands above.

Approval of Transfer 68526 does not grant any right-of-way or easement for use of a delivery system owned by person(s) other than the right owner.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of this water right in the ongoing Snake River Basin Adjudication.
