I am also enclosing the deeds showing transfer of ownership from the Borton to Lisa Grand-Jean – I think you mentioned that you had requested these from Lisa Grand-Jean but had not yet received them, so here you go! Hopefully this will facilitate the complete and appropriate transfer to Mr. McMahan.

Dear Mr. Dreher:

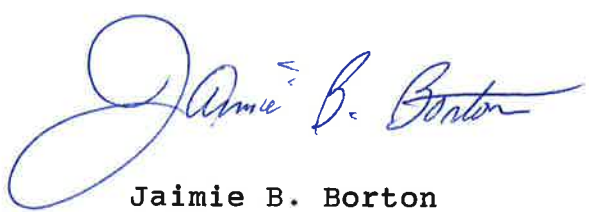

Thank you for your correspondence in reference to irrigation water rights 37-578E, 37-686C and 37-8001C that you refer to. Since about nine years ago, when John and I sold the referred parcel, we have had no involvement with the associated water rights. I do not know who the current owner is. I was a co-owner, however I was not involved with the sale or transfer of this land and it's water rights in any way other than periphally to sign my name.

I am no longer married to John Borton and I am not at liberty to share his address.

Please cc me on any further correspondence regarding this matter until it is resolved.

Dated this 26th day of

J. Glen Suptor
Chief, Water Alloc. Bureau

FROM: Allen Merritt

DATE: January 31, 1995

TO: Transfer File #4525 in the name of John Borton

SUBJECT: Review and Recommendation

This transfer proposes to move portions of Big Wood River decrees to a well drilled pursuant to license 37-08001. The license has been split by ownership change and transfer #4468 which if approved will leave 0.03 cfs on 2.0 acres now owned by Borton.

APPROVAL CONDITIONS:

Rights under transfer #4525 should be under control of watermaster of District 37 and should be regulated by priority with Big Wood rights. The well must have a meter and lockable control valve which would allow the watermaster to regulate.

The acreage approved should be limited to no more than 2.0 acres when combined with 37-08001.

The rights under transfer #4525 should be limited such that when the well is utilized to divert all rights including the remaining portion of 37-08001 that the diversion rate from the well is limited to the reasonable rate of 1.5"/acre for acreages less than 5 acres or in this case it would be limited to 0.6 cfs for the 2.0 acres historically irrigated. (See Stanton Memo 11/30/94)

The rights involved are subject to SRBA review.

Any portion not allowed to be diverted as a beneficial is left under the control of the water master for mitigation for allowing water from the well or is lost. (This should be reviewed by IDWR attorney for takings issue.)

THIS TRANSFER SHOULD BE REVIEWED TOGETHER WITH TRANSFERS #4467 & 4468 ON AJOINING PROPERTY AND FROM RELATED WATER RIGHTS.

INTER-DEPARTMENT MEMO

TO: John Borton Transfer App.

SUBJECT: Staff Analysis

FROM: Jim Stanton

DATE: 11-30-94

The applicant owns about 4½ acres of land west of Bellevue. Of this land, only about 2.5 acres have been cleared and are being irrigated. The rest of the land is uncleared waste. The licensing exam for 37-8001 confirmed this. So the proposed transfer should be limited to 2.0 acres instead of the 3.5 acres claimed. Recent use of surface rights on this ground is questionable, but watermaster records show that the water was at least put into the diversion ditch within the last 5 years. Whether the water actually reached the property is unclear. Pending Transfer #4467 covers this same system on land recently sold by Mr. Borton. Diversion rate from the well should be limited to 1.5"/ac X 2.0 ac. or 0.03 cfs in total for the decreed & licensed rights. Under proposed T. #4468, the groundwater license will supply will supply 0.03 cfs. So the surface rights should be limited to 0.03 cfs. Due to other recent work on this property, I do not plan to do another site visit.

RE: TRANSFER APPLICATION
JAMES L SMITH & ELIZABETH N ROOD
37-00578F & 37-00686D

1. The application proposes to change the P/U, ad a P/D, correct a P/D description and change the diversion of the referenced surface rights to a well to be drilled under groundwater right 37-08001D.
2. A field inspection was conducted August 26, 1994.
3. The current delivery system for the surface water is in poor condition. From the Wrencher #39 headgate to the P/U, the water must flow through a ditch full of weeds, logs and debris for about 3/4 mile. Whether water can be delivered through this system is questionable.
4. According to the water master, these rights were last delivered and assessed to John Borton in 1991. Their records also indicate there is one other user on the ditch with an equal amount of water (20" total).
5. The site of the proposed new well is about one/fourth mile West from the surface water source, Broadford Slough. The groundwater source is most likely recharged by seepage from the slough which establishes an interrelationship between the two sources.
6. The approval of this application and another pending transfer for groundwater right 37-08001D would provide a total of approximately 4.43"/acre (.86" + 3.57") from the well. I recommend the combination of all the rights be limited to the department standard of 1.5"/acre.
