E. REASONS SUPPORTING OBJECTION(S):

The claimant does not have a valid water right with the elements claimed. 1896 priority: The evidence submitted by the claimants does not support the 1896 date of priority recommended by IDWR. General grazing activities that occurred on federal land prior to patents being issued for what is now the claimants' base property were not conveyed to the claimant's predecessors. Homesteaders who received patents from the U.S. for claimants' base property would have established their own separate priority dates for water uses. Most junior priority: The earliest patent for base property was issued was in 1908 to David G. Edwards, however

it was Charles R. Edwards who submitted a grazing application with DOI and he didn't receive a Patent until 1911 (Patent 222034, 08-24-1911). Claimant Base property originally patented to Nielson, Braden, and Anna Edwards wouldn't have been grazed by Charles R. Edwards until after he acquired those parcels. There is no evidence that these patentees grazed federal land. When multiple water uses are claimed under one water claim, the priority assigned is the most junior of the uses (i.e., Patent 759345 issued 06-25-1920). Forfeited due to non-use (1993-2014): The claimants' immediate predecessor, Dotson, leased his base property to Charles Edwards. The lease agreements cover the period from 1993 to 2019. The claimant's purchase the base property from Dotson in late 2012 and filed for a grazing permit in 2013. The claimant's did not graze cattle under their grazing permit in 2013 or 2014.
