RE: Laurie Adamson's Application for Transfer of Water Right

Dear Mr. Hobdey:

Pursuant to our recent telephone conversation, I have sent the application for transfer of a water right, filed by Laurie Adamson, back to the applicant along with the applicant's filing fee. As we discussed, the signature on the application was not notarized, which prevents our office from processing the application. In addition, there were a few issues on the application that should probably be resolved before an application is submitted for processing. I have enclosed several documents that may be of use in preparing an application for resubmittal.

The first of these documents is a summary of the various Snake River Basin Adjudication (SRBA) claims that have been filed based on water right license 37-02515. Note that it appears that water right license 37-02515 has been over claimed in the SRBA. Water right 37-02515 was originally licensed for the diversion of 4.0 cfs from two wells for the irrigation of 200 acres (@ one inch to the acre). In addition, one domestic use (located within the NWNW $\frac{1}{4}$ of Section 21 according to the 1954 licensing exam) was covered under the license. Three SRBA claims have been filed based upon portions of this particular license. The three SRBA claims total 5.2 cfs for the irrigation of 234 acres with two domestic uses being claimed.

I have also enclosed copies of proof reports of water right license 37-02515 and SRBA claims A37-02515A, A37-02515B, and A37-02515C. These proof reports summarize the information on the water right license and the respective SRBA claims. In addition, I have enclosed a couple of maps that show the area(s) where water right 37-02515 was originally licensed, and the area(s) that have been claimed in the SRBA. These documents have been color coded to ease in the comparison of the information that they provide.

I have also enclosed a copy of the application for transfer of a water right that was originally submitted. I have written various comments and suggestions to help in the preparation of another application for resubmittal.

PAGE 2

As we discussed during our telephone conversation, there are some issues that will need to be addressed and clarified regarding the proposed water right transfer. Laurie Adamson's SRBA claim (A37-02515C) is for the diversion of 1.2 cfs for the irrigation of 40 acres and a domestic use in the SWSW $\frac{1}{4}$ of Section 16. However, water right 37-02515 was originally licensed for 20 acres of irrigation in the SWSW $\frac{1}{4}$ of Section 16 and the domestic use was located within the NWNW $\frac{1}{4}$ of Section 21. Based upon the licensed rate per acre, the 20 acres located within the SWSW $\frac{1}{4}$ of Section 16 would amount to 0.40 cfs of water. If Ms. Adamson's claim and transfer application reflect the 1.2 cfs, the 40 acres, and the domestic use, then some explanation along with supporting information must be submitted to explain the items that are in excess of what was originally licensed to the property.

Hopefully, the information that I have provided will be useful in the preparation of another application for resubmittal. If you have any questions, or if I can be of any assistance, feel free to contact me at your convenience.

Sincerely,

Corey Skinner, EIT
