MEMORANDUM

TO: File 37-02567A

FROM: Pam Skaggs/State Office

SUBJECT: Transfer 5238

DATE: November 24, 1999

Transfer 5238 changes the point of diversion under a portion of Right 37-02567A, splitting the right into Parts A and B. The applicant purchased the land and used a separate well to irrigate his parcel.

The transfer reflects the existing system; no physical change will occur through approval of this transfer. Although there is some evidence the original well was not used for a time in 80s, the applicant found irrigated land when he purchased the property and developed his separate well in 1990. The only drilling permit identified for the applicant in 1990 was a permit for domestic use that identifies an adjacent quarter-quarter, DP #37-90-0061-000. A copy of the approval will be sent to groundwater section to pursue any additional fees that may be required.

Review of the place of use by region staff verified irrigation of less than the 20 acres listed on the application. Region manager has recommended that no more than 19.0 acres be allowed under this approval. Further evaluation may occur through the adjudication process.

Season of use and diversion volume were adjusted to current standards. Recommended conditions include drilling permit conditions, irrigation overlap, permissible place of use and standard transfer conditions.
