Water Right Report 37-7644

2. Water diverted under this right is injected into Patton Creek then rediverted from Patton Creek to the place of use. The amount of water rediverted from Patton Creek under this right shall not exceed 98% of the amount of water injected into Patton Creek.
3. R43 The right holder shall maintain measuring devices at the points of injection into and rediversion from Patton Creek and shall maintain lockable controlling works of a type approved by the Department in a manner that will provide the watermaster suitable control of the diversion.
4. R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 37-M.
5. 065 The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
6. 104 If the surface water rights appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
7. X56 The portion of Right 37-7644 used for conveyance losses is 0.04 cfs.
8. X36 Rights 37-2649A, 37-2649B and 37-7014 are also diverted through the points of diversion described above.
9. X59 Point of diversion is locally known as The Lucke Well.
10. WB7 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 488.3 af at the field headgate for the lands above.

Comments:

1. eretelle 1/24/2005 license review
Comment:

Watermaster wants to charge 2% for conveyance loss. The well has a capacity of 4.35 cfs, re-diversion has capacity of 1.98 cfs. $1.98 \text{ cfs} \times 1.02 = 2.02 \text{ cfs}$ allowed to be pumped & injected into the stream. Called current WM (Bob Simpson referred me to Kevin Lakey) 1-31-05 to see if this is still the case. Kevin confirms that 2% is still standard for that area.

PoU needs amendment. Section 33 added. P44 if not amended.

OVERLAP:

PoD - 37-2649A and B, 37-7014

PoD - teeter canyon pump also used by 37-118 according to SRBA claim.

PoU - 37-118 decreed right claimed in SRBA. 37-7644 lies completely within its PoU of 432 acres

2. skeen 2/24/2005 Water District

Comment: The license for this right was issued with a condition saying that it is in Water District 37-N. It is actually in 37-M.

3. manders 2/12/2007 POD

Comment: Correlated PODID 637948 from SpatialDataID 383266 to SpatialDataID 357137

4. mweaver 12/23/2008 Prelim Order Correcting License

Comment: In the Fall of 2008 I assisted the Watermaster of Water District 37 in providing guidance and a plan for regulating all of the ground water rights in Basin 37 that were conditioned with Watermaster control. As part of this project I reviewed water rights 37-2649A, 37-2649B, 37-7014, and 37-7644, which all share the same artesian well (the Lucke Well) as their initial point of diversion. During this review it became evident that WRs 37-7014 and 37-7644 had been incorrectly conditioned, with combined diversion rate limits that were not based on historical evidence, and limited or injured the senior water rights 37-2649A & B. After notifying the water right holders of the potential for injury, and receiving their consent to modify their respective licenses, I prepared a "Preliminary Order Correcting Licenses", which modified the existing combined use diversion rate limits for WRs 7014 and 7644, from 7.26 and 5.00 respectively to 7.44 cfs - the value which coincided with the licensed diversion rate of the 2649 WRs. Following the issuance of the Preliminary Order, I updated the files, sent copies of the Order to the water right holders, and informed Adjudication (Doug Jones) of the changes.

I also updated the diversion works capacity from 4.3 cfs to 7.96 cfs, which reflects the maximum value of flow from the Lucke Well observed or reported by IDWR staff.

5. mweaver 12/23/2008 Amended License

Comment: I printed an amended water right license reflecting the corrected conditions.
