12. Do you own the property listed above as place of use? No

13. Other Water Rights Used:

14. Remarks:

Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.

The right holder shall use the full allotment of appurtenant surface water rights in conjunction with ground water diverted under this right and shall only divert ground water under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.

If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

This right when combined with all other rights shall provide no more than 3.5 afa per acre at the field headgate for irrigation of the lands above.

After specific notification by the Department, the right holder shall measure the diversion or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.

The total instantaneous diversion of water from all points of diversion under Transfer 69809 shall not exceed 12.68 cfs, nor a total combined annual volume of 2086.0 af.

This right is limited to the irrigation of 596 acres within the place of use described above in a single irrigation season.

Rights 37-2713 and 37-7356 when combined shall not exceed the irrigation of 596 acres.

Rights 37-2713 and 37-7356 when combined with all other rights shall provide no more than 0.02 cfs per acre at the field headgate for sprinkler irrigation of the land described above. When water is applied through a sprinkler irrigation system, the portion of Rights 37-2713 and 37-7356 used for conveyance losses is 0.76 cfs.

The period of use for the irrigation described in this approval may be extended to a beginning date of 4/15 and an ending date of 10/31 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 5/1 and after 09/01 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date of this approval.

The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.

Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.

Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.

Prior to diversion of water under this approval, the right holder shall provide a means of measurement acceptable to the Department from all authorized points of diversion which will allow determination of the total rate of diversion.
