STANDARD FORM 5

STIPULATED ELEMENTS OF A
WATER RIGHT

This form is used to report the stipulated elements of one water right acquired under state law and/or one federal reserved water right. Submission of this form will not automatically result in the issuance of a partial decree. The Presiding Judge or Special Master will conduct any hearing necessary to determine whether the facts, data, expert opinions and law support the issuance of a partial decree for the water right.

The parties agree that the Snake River Basin Adjudication Court has jurisdiction of the parties and subject matter to enter a partial decree for this water right; that they have been served with sufficient process, according to the law; and that they have appeared, prosecuted, and defended their positions with regard to this water right dispute.

The parties and IDWR agree and stipulate that the elements of this water right should be described per the attached. The parties and IDWR have further indicated their concurrence by initialing each of the attached pages.

Re: Basin 37 Part II, Van Horn Water Rights

Dear Evan:

Last week I sent you two emails regarding settlement of water right nos. 37-2726 and 37-13292. Since I have not heard from you, I am wondering if the emails went through, which is the reason for sending this letter.

Regarding water right no. 37-2726, you state in your objection that "This Licensed Right has customarily been used, in part, for heating purposes, and the use should have been included in the recommendation, as a recognized beneficial use." As I believe we discussed with Special Master Bilyeu during our last status conference, the Department cannot separately include heating as a purpose for this water right since the license did not recognize heating as a purpose. The Department can, however, clarify its recommendation through a remark specifically stating that heating is part of the domestic portion of the water right. The Department would propose the following language:

Domestic use is for _____ home(s) and may include the use of the water for the heating (and cooling) of the home(s).

I was not sure how many homes were under the heating system, so I left it blank. The December 2, 1980 order approving water right no. 37-2726 stated that there were three homes and a swimming pool. I also was not sure if water was used for cooling, so I left that as an option. Please let me know what you think of the proposed language and provide me with any edits.

Second, water right no. 37-13292 is a claim for .33 cfs for instream stockwater. The objection states "Stock watering occurs from and along the source streams in various parcels (places of Use), and the recommended diversion rate of .02 cfs evidently assumes only a single 'diversion point' will be used at a given time. Claimed diversion rate, points of diversion and places of use are accurate, and should be approved."

As correctly noted in the objection, the Department recommended the claim as de minimus instream stock with a diversion rate of .02 cfs and fewer points of diversion and places of use than were claimed. Because the Department treated the claim as de minimus, proof of beneficial use was not required for any of the elements.

If your client wishes to pursue the claim as claimed, Steve Clelland will need proof of beneficial use for each of the elements of the claim.

Please let me know if you have any questions or comments.

Very Truly Yours,
