1992 Aerial Photo

Notes

T1S R10E Sections 11, 12, & 14

- 2/10/06 - Sent letter with aerial photo to claimant asking to identify location of Domestic, Stock water from undeveloped springs, stockwater from developed springs, and in-stream stockwater use.
- 2/24/06 – Received response from claimant regarding letter. Claimant marked nine “X”s on the map, but did not identify the use.
- 4/12/06 – Information in claim and response to 2/10/06 letter does not clearly identify the location of the stockwater from developed springs and domestic uses. Recommended Domestic POU in the location that appears to have some type of building structure. One spring in NENE Section 14 and one spring in SWSW Section 11 marked in response letter of 2/24/06 are not evident on aerial photo and where not recommended. Since the developed springs are not identified, assumed all springs are undeveloped. Recommended a combined diversion rate of 0.02 cfs for all the springs and in-stream stockwater use.
